BY ABIGAIL

Results at this time are inconclusive as to whether or not Emmitsburg telephone patrons will receive additional wide-range calling privileges, it has been learned. The Chesapeake and Potomac Telephone Co. of Maryland this week stated that a decision could not be reached either for acceptance or rejection of the proposal offered by the utility. Quite a number of subscribers to date haven't answered a questionnaire sent out by the company last month. The decision lies with the number of questionnaires returned to the company. Company officials have asked for all subscribers to complete the questionnaire and send it in immediately. Should the majority of patrons desire the wider-range calling it will become effective just as quickly as the company can make the necessary equipment changes. So, my friends, if you have laid away your questionnaire somewhere, dig it up and send it in immediately, whether you desire the wider-range calling privilege or are not in favor of it. It's imperative that you vote, either way.

Add to your list of the most borsome television commercials; the one that has gal screaming about the land of sky blue waters and also the one that expounds on the land of pleasant living. They both bore me to death and I wouldn't drink their product if it were offered free.

The big Democratic convention opens Monday folks and a hot one it will be, believe me! The politicians are trying every trick in the book to belittle the candidates, even down to bringing in the health issue. Age was tried as was also maturity but now they are resorting to the candidates' health. Seems as though the matter backed through as one of the other leading candidates was found to have a bad heart. To date Mr. Symington's health has not become an issue but the fact that Harry Truman is backing him is resultant to the kiss of death. Aside from this Mr. Khrushchev also is meddling in the political turmoil on both sides and it all adds up to a rip-roaring convention. Keep abreast of it folks through your newspaper, radio and television, you'll enjoy the antics employed by the politicians, I'm sure.

Mark July 4th in your book as a record bang-up day, or weekend, because that was what it was tantamount to. No amount of pleading could sway the road demons as they headed toward their destination with their eyes focused straight ahead and their minds blank. A record number of fatalities occurred as the Grim Reaper cut down a staggering 442, by automobile alone. Just imagine, one third the population of our fair little town perished over the weekend, that is I mean the equivalent of one-third of our town's population. Even as you drove along with radio announcers imploring you to be careful, you could see many, many taking their lives and those of others into their own hands as they sped by you or passed you on a hill or a curve. They drive like they were possessed with a desire to commit suicide, and that's exactly what hundreds of them did. Anyway I'm glad to see all you dear readers back safely once again.

Garbage Collection Being Studied

The Mayor and Commissioners this week issued a warning to those persons who were dumping garbage and debris in the rear of their properties that the practice must cease or fines will be levied. This practice, the Council stated, was nearing the day when the Town will have to operate the garbage collection, adding the cost to local tax bills. A recent survey indicated that only one-third of the citizenry was subscribing to the local garbage collection service. These property-owners, tenants, etc. are dumping their garbage on other people's property, an illegal act.

Town Council Opposes School Consolidation

Emmitsburg's Town Council made it understood in no uncertain terms that it was going all out to block any consolidation moves by the Frederick County Board of Education which would consolidate Emmitsburg High with Thurmont High School.

Three members of the Town Council met with the Board of Education Wednesday morning in Frederick. Members in attendance were Mayor Clarence G. Frailey and Commissioners J. Allen Bouey and J. Norman Flax.

Acting as spokesman for the group, Mr. Flax vociferously expressed the desire of the town to retain its school in its entirety and went as far as to ask for enlargement and improvement of the present structure as well as instituting a commercial course and other recommended studies to broaden the curriculum of the local school.

The consensus of the group was that it has made a favorable impression on the Board of Education and that there was some indication that the move might have been thwarted. At times, it was learned, the discussion became rather heated. Up for debate was the purchase of land for a site for the proposed new school near Thurmont. It was pointed out by the Emmitsburg delegation that the land was assessed by the county at \$30 an acre and that several members of the Board of Education were favorable to a purchase price of \$1,000 per acre. Asked by Mr. Flax if this was good business, a member of the Board retorted that education had no price tag on it and that regardless of the expense learned, the discussion became involved the consolidation would be effected.

Following the debate it was the opinion of the Emmitsburg group that the Board of Education was split in its decision to consolidate. Should the consolidation become effective Mr. Flax stated that a hike in Frederick County real estate taxes was inescapable. Discussed also was the attitude of Thurmont itself. It is felt that many citizens there are opposed to the move realizing that their tax rate there would have to be hiked considerably to bear the cost of extending sewer and water lines to the new school, a project that would cost possibly \$30,000. It was pointed out that Thurmont's sewerage system was over-burdened at the present time and could not accommodate a school that might possibly house 700 students.

The Emmitsburg representatives pointed out that public sentiment was for the retention of the local school as evidenced by a petition with over 1000 signatures sent to the County Commissioners 2 years ago. This sentiment is even stronger today the group maintained.

Lumen F. Norris, Emmitsburg, county tax assessment supervisor, was present at the meeting and gave a general summation of the meeting indicating that the citizens of Emmitsburg were adamantly opposed to any consolidation at this time.

In an effort to ferret out local sentiment the Town Commissioners and Mayor will publish a ballot in next week's Chronicle. It is the desire and hope of the Town Council that every taxpaying citizen will clip and return the coupon immediately to the Council.

ENGAGED

Mr. and Mrs. Harry C. Saylor, Rocky Ridge, announce the engagement of their daughter, Frances Marie, to Allen Kenneth Angleberger, son of Mr. and Mrs. Worthington Angleberger, Thurmont.

Miss Saylor is a graduate of Emmitsburg High School, class of 1960. She is employed at Moore Business Forms, Thurmont. Mr. Angleberger is a graduate of Thurmont High School, class of 1957. He is employed at Cambridge Rubber Co., Taneytown. No date has been set for the wedding.

Mr. and Mrs. Glenn Reifsnider and sons, Keymar, visited recently with Mrs. Reifsnider's mother, Mrs. George Ashbaugh. Mr. and Mrs. William Umbel and family, Waynesboro, spent Sunday with Mr. and Mrs. Wilbur Umbel and family and Mrs. Edna Tressler.

Charles Peters, Philadelphia, is visiting with his mother, Mrs. Gertrude Peters and family.

SIMPSON—LEIST

Miss Helen Frances Leist, daughter of Mrs. William D. Smith, Emmitsburg, and Walter Lee Simpson, son of Walter G. Simpson, Taneytown R2, were united in marriage on Saturday, June 25, at 2 p. m. in the Elias Ev. Lutheran Church, Emmitsburg. The double-ring ceremony was performed by the Rev. Philip Bower. The church was decorated with palms, gladiolus and pompons. Miss Ruth Shuff, organist, played the traditional wedding music and Mrs. William E. Dayton, soloist, sang "Because" and "O Perfect Love."

The bride, given in marriage by her step-father, William D. Smith, wore a ballerina length gown of Chantilly-type lace of nylon and acetate with nylon net molded bodice with buttoned sleeves, and skirt of net ruffles with overskirt of scalloped tiers. Her finger-tip veil of silk illusion fell from a crown of pearls and sequins. She carried a white Bible, a gift of the bridegroom, topped with a detachable corsage of white glamelias and streamers of white Frenched chrysanthemums. Mrs. Richard Bigham, Gettysburg, sister of the bride, serving as matron of honor wore a mint green dress and carried a cascade bouquet of yellow daisy pond poms highlighted with a green daisy in the center. The bridesmaids, Miss Carolyn Wastler, Emmitsburg; Mrs. Carl Reed, Westminster R3; and Mrs. Robert Warner, Westminster R7, wore dresses identical to the matron of honor in yellow. The attendants headpieces were a Dior bow with a short veil matching their dresses. They carried cascade bouquets of green daisy pond poms highlighted with yellow daisies in the center. The flower girl, Kathy Jo Bigham, Gettysburg, niece of the bride, wore a dress with white net over white nylon and carried a miniature bouquet of yellow and green daisies. Myron Grossnickle, New Windsor, nephew of the bridegroom, was the ring-bearer. The acolyte was Harry Harner, Emmitsburg. Robert Warner, Westminster R7, was best man. Carl Reed, Westminster R3, Richard Bigham, Gettysburg and Ronald Welker, Westminster, were ushers. The mother of the bride wore a light lace dress with white accessories and a corsage of pink rose buds. After a reception at the Greenmount Fire Hall, the couple left for a wedding trip. For going away, the bride wore a beige lace sheath dress with white accessories. Upon their return they will reside at Emmitsburg R3 in their newly purchased trailer. The bride is a 1959 graduate of Emmitsburg High School and her husband is a 1958 graduate of Taneytown High School.

Out-of-town guests were from Chambersburg, Thurmont, York, Westminster, Gettysburg, Taneytown and Union Bridge.

Attorney To Aid Chest Fund Drive

Nicholas G. Fanos, chairman of the 1960 Frederick County Community Chest-Red Cross United Appeal, was recently appointed Benjamin B. Rosenstock, well-known Frederick attorney, as his vice chairman. Attorney Rosenstock, a life-long resident of Frederick, is a former member of the board of directors of the Community Chest and Red Cross United Appeal, having served on the board for several terms. He also is a past vice president of the Frederick County Chapter of the American Red Cross, serving from 1933 to the end of World War II and a former member of the Francis Scott Key Boy Scout Council where he served for 20 years. At present Mr. Rosenstock is president of the Independent Hose Company in Frederick having filled that post since 1939. Rosenstock attended schools in Frederick, was graduated from Tome School for Boys, formerly located at Port Deposit, Md., received his Bachelor of Arts degree from Johns Hopkins University and in 1925 received both his M.A. in Political Science from Johns Hopkins U. and his law degree from the University of Maryland.

Mrs. C. W. Lake and daughter, Barbara Sun, have returned to Plymouth Valley, Pa., after visiting Mrs. O. H. Stinson.

Mr. LeFevre Kerrigan, Littlestown, Pa., is visiting his sister, Mrs. O. H. Stinson.

Donald Joy, Baltimore, spent the weekend with his parents, Mr. and Mrs. Hubert Joy.

Many a man thinks he has an open mind when it's merely vacant.

ROBERT MYERS IS NEW LEGION COMMANDER

The regular meeting of the Francis X. Elder Post 121, American Legion, was held Tuesday evening in the post home with 29 members present. The meeting was conducted by the commander, Joseph Rodgers.

Two blood donors were reported: Paul Sanders and David Muench. It was reported that the summer camp recently held was very successful. The Commander thanked all members who participated in this project. Continuous membership cards were received for the following members: Clarence G. Frailey, 25 years; Thomas Hoke, 15 years; Richard H. Rosensteel, 15 years; Myrl Tauginbaugh, 5 years; and Earl McCleaf, 5 years.

It was decided to hold the Annual Picnic in August. The following were named to this committee: Clarence Shorb, Andrew Shorb, Charles Harner, Earl Topper, Robert Shorb, Curtis Topper, Thomas Harbaugh and Floyd Manning. Delegates to the Department Convention which will be held July 20-23 were named as follows: Floyd Manning, Joseph Rodgers, Charles Harner, Allen Krietz, Robert Myers and Curtis Topper.

Election of officers for the coming year was held with the following results: Commander, Robert Myers; 1st vice commander, Eugene Rodgers; 2nd vice commander, Joseph Rodgers; Adjutant, Charles B. Harner; Sgt-at-arms, Andrew Shorb and Curtis Topper; historian, George Ashbaugh Jr.; chaplain, Thomas Harbaugh; and trustee for 3 years, Richard McCullough. It was announced that membership to date numbered 188.

Hospital Report

Mrs. Charles Harner, Emmitsburg R2.
Mrs. Donald Sanders, Emmitsburg R1.
Harry Adams, Emmitsburg.
Mrs. Daniel Wolfe, Emmitsburg. Discharged
Mrs. Wayne Creeger and infant son, Emmitsburg R2.
Mrs. Earl Gelwicks, Emmitsburg. Births
Mr. and Mrs. Thomas Fogle, Emmitsburg, son, Thursday.
Mr. and Mrs. James Thomas, Emmitsburg R1, son, Friday.

College Is Cited For Articles On Chemical Research

According to a report published in the June issue of the Journal Of Chemical Education, St. Joseph College, Emmitsburg, Maryland, is one of 37 Liberal Arts Colleges in the United States averaging one or more articles a year concerning research activity in Chemical Abstracts for 1952-59.

In his article John R. Sampcy, Furnam University, Greenville, S. C., stated that the liberal arts colleges constitutes the largest unused research potential in the country. Measured quantitatively the articles represent almost the equivalent in number to three years of publication by such an active government research center as Oak Ridge, or the number of papers released by the South's most active academic institution, the University of Texas, over a five-year span at current rates of productivity.

No comparison is suggested in the quality of the research published, but there is a growing appreciation in liberal arts colleges for undergraduate research as a teaching tool, and for the satisfaction it brings to the instructor as a contributor to his own field of specialization.

The research undertaken at St. Joseph College from 1952-59 has been subsidized by grants from the Raskob Foundation for Catholic Activities and the National Science Foundation.

In the spring of this year, Sister Denise Eby, Assistant Professor of Chemistry, was awarded a grant of \$2,240 for "Undergraduate Research Training Program." Presently, Joseph A. Solomon, Ph.D., head of the Division of Science and Mathematics at St. Joseph College, is planning to do research in the characterization of bituminous coal by physico-chemical methods.

Mr. and Mrs. Charles Gutshall and daughter, Vickie, Waynesboro, visited Sunday with Mrs. Maude Harbaugh and family.
Mr. and Mrs. T. J. Norris Jr. and family have returned to Newton, N. J., after spending two weeks visiting relatives here.

Fined After Dispute With Police Chief

A 23-year-old unemployed veteran was fined \$25 last Friday in the Frederick Magistrate's Court for disorderly conduct June 20 in Emmitsburg.

On that day Donald Gross of Taneytown, barged into the home of Emmitsburg Police Chief W. E. Law. Law, off duty, refused to see Gross, who had been drinking.

There was a quarrel and it ended with Gross in handcuffs, under arrest for being drunk on a public street and the charge for which he was fined.

Gross told Magistrate Edward D. Storm he went to Law to seek counsel about domestic problems.

Law accused the young man of being profane in the presence of a number of nearby children at play. He also said Gross threatened to "fix" him, prompting the officer to use some force in the apprehension.

The bartender of the Emmitsburg American Legion, Thomas Harbaugh, said Gross had been drinking a good bit that afternoon, although not at the Legion. Gross allegedly told Harbaugh he wanted some "understanding" with Law.

The drunk charge was dismissed.

CARROLL W. STONESIFER

Carroll W. Stonesifer, 52, Littlestown R1, died while at work in the Hanover Dress Co. about 8 a. m. Friday.

He was the son of the late Mahlon and Annie Fuss Stonesifer, and the husband of Margaret Reaver Stonesifer.

In addition to his wife, four brothers and four sisters survive: Mrs. Emma Bollinger, Pittsburg; Mrs. Charles Myers, Thurmont; Mrs. Reno Eyer, Emmitsburg; Mrs. Charles Copenhaver, Emmitsburg; Robert, Taneytown; Edgar, Emmitsburg, and Leonard and Roy, Chicago.

Stonesifer was a member of the Moose lodge in Hanover and the Elias Lutheran Church, Emmitsburg.

Funeral services were held on Monday at 1 p. m. in the Fuss Funeral Home, Taneytown. Interment was in the Mountainview Cemetery, Emmitsburg, with his pastor, Rev. Philip Bower, officiating.

Palbearers were Roy Bollinger, Dallas McNair, Rodman Myers, Richard Stonesifer, Reno Eyer, and Robert Copenhaver.

Cards Trim Yanks

The Cards walloped the Yankees in the Emmitsburg Little League play Tuesday evening 26-16 by pounding out 20 runs in the sixth inning as the Yanks collapsed. Gus Rice hit a grand slam homer and Jerry Valentine a two-run homer for the winners. The win throws the Cards and Giants into a tie for second place with 2-3 records behind the front running Red Sox 5-1.

Pirates To Hold Try-out School

The Pittsburgh Pirates will conduct a tryout camp at Charles Town, West Virginia on Monday, July 18 and Tuesday, July 19. In the event of rain the camp will be held on Wednesday, July 20. The camp will be held at Legion Park and will be under the direction of Syd Thrift, Pirates' Scouting Supervisor for the West Virginia territory. Syd will be assisted by Ray Speaker. Players should report ready to go at 9 a. m. and be prepared to workout until 2 p. m.

Players must be 16 years of age to be eligible to attend the camp, and no Junior American Legion players will be permitted to participate in the camp if such participation would interfere with any Legion activities. Such participation will only be permitted with a letter of approval from either his Legion coach or the Commander of the Legion Post he represents in Legion play.

Players are also expected to furnish their own shoes, uniforms, gloves, etc., with the Pirates furnishing all other equipment. Players will also be responsible for their traveling and living expenses, if any, with the understanding that all expenses will be reimbursed to those players signed to contracts with Pittsburgh organization clubs.

Mrs. M. G. Homes and Master Ricky Homes, and Mrs. Emmett L. Randolph, were guests of Mr. and Mrs. J. Scott Randolph and Mrs. B. P. Ogle for the Fourth of July holidays.

College Professor Granted Scholarship

Miss Gertrude Hotaling, R.N., assistant professor of nursing in public health nursing at Saint Joseph College, has been awarded a scholarship by the Department of Health, State of Maryland, to attend the 1960 Summer School of Alcoholic Studies at Yale University which is currently being held.

Previous to this, Miss Hotaling attended New York University from May 23-27 where she had a Federal traineeship on Newer Concepts of Teaching in Public Health Nursing Clinical Practice. In June she attended the Workshop on Epidemiology for Nursing at the Catholic University of America on a grant from Saint Joseph College.

Miss Hotaling received a B.S. in Public Health Nursing from the Catholic University of America and a Master of Public Health from the University of North Carolina. She is a member of the American Nurses Association, National League for Nursing, American Public Health Association, Catholic Nurses Guild of Baltimore, Delta Omega and was director of Lackawanna County Catholic Nurses Guild.

After the Yale Institute, Miss Hotaling will do practical work with the Visiting Nurses Association of Scranton.

Kathleen Shorb Heads Legion Auxiliary

The regular monthly meeting of the Francis X. Elder American Legion Auxiliary, Unit 121, met at the Post Home on Tuesday evening with president Kathleen Shorb presiding. 16 members were present.

A letter was read from District Vice President, announcing Rebecca Chrismer, a graduate of St. Joseph's High School, class of 1960, as third place winner in the District Division of the Americanism Essay Contest and as second place winner in the Department Division for Senior Schools. Miss Chrismer will be guest at the delegates' luncheon on Thursday, July 21, at the convention in Baltimore.

A thank-you letter was read from Richard Swomley, recipient of the history prize donated by the Auxiliary to the Emmitsburg High School. Other thank-you letters were read as well as invitations to installations.

Madeline Harner reported that she had attended installation ceremonies at Thurmont last month. Ann Topper and Kathleen Shorb were named delegates to the convention to be held in Baltimore on July 21, 22 and 23.

The draw prize was won by Carmel Topper. Alice Frailey's name was called for the door prize, but she was not present.

Refreshment committee for the next meeting is Ann Topper, Mary Theresa Miller and Idella Fitez.

Election of officers was held with the following results: President, Kathleen Shorb; 1st vice president, Ann Topper; 2nd vice president, Madeline Harner; secretary, Virginia Sanders; treasurer, Carmen Topper; chaplain, Melva Hardman; Sgt. - at - arms, Marian Timmerman; historian, Mary T. Miller; ex. committee, Ruth Gillelan. Installation of the officers will take place next month.

The meeting adjourned and the ladies joined the men of the post for refreshments.

Field stopped Blue Ridge 11-4 on Sunday but dropped a 13-6 decision to the Summeers Monday.

A change in the schedule this Sunday finds Emmitsburg playing at Blue Ridge instead of on the local diamond. An earlier game between the teams scheduled at Blue Ridge was played here when a carnival was being held on the Blue Ridge field.

Dies While Visiting Stepson Here

Mrs. Gertrude Kelz, 79, wife of Leo Kelz, Hamilton, Ont., Canada, died Sunday morning at 2:50 a. m. at the Warner Hospital, Gettysburg. She had been admitted as a patient on June 20.

Mrs. Kelz had been visiting at the home of her stepson, William Kelz, Emmitsburg R2 since early June.

The body was shipped by the Wilson Funeral Home, Fairfield, to Hamilton where services were held.

Fractures Hand

Lawrence Rentzel, 22, Fairfield R1, an employe of Joseph Haley, Emmitsburg, received treatment Tuesday at the Warner Hospital, Gettysburg, for a fractured bone in his right hand sustained Monday when he was struck by a board.

Mrs. Dora Paidakovich, Silver Spring, was a weekend visitor of her mother, Mrs. Genevieve R. Elder.

Saint Joseph's Picnic-Supper Saturday

One of the oldest affairs of its kind, in Frederick County, the annual picnic and supper, sponsored by St. Joseph's Church, will take place tomorrow, Saturday, July 9, commencing at 3:30 o'clock when the servings of a delicious turkey and ham supper will commence.

The occasion will afford visitors vacationing here an opportunity to meet and renew acquaintances with old friends. The event will be held on the spacious rectory grounds, Fr. James Twomey, pastor announces. An invitation to the general public has been extended by the pastor for all to attend the affair.

On hand for the amusement of both children and adults will be numerous games and amusements. Pony rides for the kiddies and bingo for the adults will be featured attractions.

An added convenience for those desiring to eat at home will be the catering service provided by the committee. Those desiring to take home suppers will be accommodated providing they furnish their own containers. Admission to the supper is \$1.25 for adults and 65c for children. Aside from the price of the supper there is no admission charge to the grounds.

Father Twomey has announced the following committees: Mrs. Agnes Topper, supper chairman; sandwiches, Mrs. Carroll Willis; parcel post table, Mrs. Blanche Kepner; candy table, Mrs. Margaret Myers; novelty table, Mrs. Helen Brown; Children of Mary table, Mrs. Alice Sherwin.

Members of the Holy Name Society will act as aides at the various functions during the evening and will assist with the general running of the affair. Bingo will be in charge of Louis H. Stoner Sr. Mrs. Marie C. Rosensteel is general chairman of the event.

Fairfield at Taneytown

The Pen-Mar Baseball League inaugurated its second half play over the weekend with all teams dividing.

Emmitsburg opened the first half champs, Taneytown, on Monday, 5-1 here, after dropping a 11-5 decision at Taneytown Sunday.

Fairfield stopped Blue Ridge 11-4 on Sunday but dropped a 13-6 decision to the Summeers Monday.

A change in the schedule this Sunday finds Emmitsburg playing at Blue Ridge instead of on the local diamond. An earlier game between the teams scheduled at Blue Ridge was played here when a carnival was being held on the Blue Ridge field.

Four Students Have Perfect Attendance Records

Four sons of Mr. and Mrs. Karl Smith of Rocky Ridge, have finished school this year without missing a day.

This might not seem so unusual to you, but for Karl Jr., Mr. and Mrs. Smith's 13-year-old son, it marked the seventh year he has attended school without missing a day. Karl will enter the ninth grade this fall.

Ronald V., 12-years-old, has completed five consecutive years of school without missing a day, and will be a sixth grader in the fall.

Ten-year-old Larry Wayne, just completed five years without being absent a day, and will enter the sixth grade.

The youngest son of the four going to school, is Jerry Douglas, who has recently completed the first grade without missing any days and will try for the second year this fall.

The boys all go to the Emmitsburg Public School.

THIS 'N THAT

GEORGE W. WIREMAN

Physical Education
Physical education is one of many activities now shared by children and adults alike. Today it plays a very important part in the school program. Many parents regard this as an unnecessary part of the school program and many have even said that the child today spends more time on the playground than he does in the classroom.

Many parents too, do not realize the true meaning of physical education and what it accomplishes. Physical education is that phase of education which is gained through activities necessitating the use of the large fundamental muscles of the body.

Modern physical education activities are based on the natural physical education activities of primitive times. Even the more recent activities, when analyzed, are found to be developed from natural activities. For example, playing American football involves such basic skills, as running, dodging, leaping, striking, throwing, and kicking; and baseball also requires running, walking, dodging, throwing, and swinging a club. In fact, it's probable that the greater the variety of basic natural skills employed in a single game, the greater the resulting satisfaction and educational value of that game or sport. Among the contributions of many nations to the accumulated heritage of large-muscle or physical education activities were those of the early Greeks of the Homer era, 1100 BC-800 BC. These included javelin throwing, chariot racing, speed and distance running, discus throwing, weight throwing, boxing, wrestling, and shooting the bow and arrow.

The Romans emphasized the spectator sports, gave great importance to swimming, and played a game not unlike modern handball. Both Romans and Greeks had games resembling hockey and football.

The Dark Ages nearly obliterated physical education. However, with the coming of the Age of Chivalry and its knightly sports

of horseback riding, jousting with spears, swordplay, boxing and wrestling and swimming and archery, physical education revived and steadily became stronger.

With and following the Renaissance, from the fourteenth to the seventeenth centuries, many men contributed to physical education through their teaching and writings. Among these were: Vittorino da Feltre, Sir Thomas Elyot, Roger Ascham, Francis Rabalais, John Milton, Michel de Montaigne, John Locke, Richard Mulcaster, John Comenius, Jean Jacques Rousseau, Johann Basedow, Johann Friedrich Guts Muth, Heinrich Pentalozi, and Friedrich Froebel.

Friedrich Lodwig Jahn (1778-1852), sometimes called "Turn-fater Jahn," developed Germany's contribution to physical education activities, which included exercises on the high and low horizontal bars, the parallel bars, the swinging rings, and the mats. He also started the turnverein or Turner's Associations.

Pehr Henrik Ling was responsible for Sweden's major contributions. These included a system of free arm, leg, and trunk movements known as calisthenic exercises, and a comprehensive system of treating physical disorders by means of specific active and passive movements called medical gymnastics. From these developed the Swedish massage and some of the mechanical manipulation phases of physical therapy.

The British Isle contributed soccer, field hockey, cricket, rugby football, and many other vigorous sports. They also enriched physical education with the philosophy that the playing and enjoyment of a game is as important as winning. The English and Welsh also added to the techniques of archery. Likewise, the American Indians added skill and lore in hunting with the bow and arrow, as well as inventing lacrosse.

There is much to be gained in physical education and the values of the many activities are found in the resulting development and adjustment of the individual.

Four types of development were recognized by Clark W. Hetherington. Engaging in any activity stimulates in some degree all of these four types, although different activities emphasize them in different amounts.

Now let us look at these four types of development.

First there is organic. This is the development of power and endurance in the heart and lungs, heat-regulating mechanisms, and digestive and eliminating organs. These various organs gain power and stamina from use. The large muscles used in physical education activities exercise these organs particularly, with a resulting increase in organic development which is the basis of good health.

Another type of development is neuromuscular. The development of skills and co-ordinations required in the mastery of life's varied activities can be directly attributed to physical education; also the development of strength in the skeletal muscles used in such co-ordinations. This development starts with the skills learned in the simple play and games of childhood and increases gradually with the more complex co-ordinations of team and individual sports of later years.

Interpretive is another type of development which results from physical education activities. This type strengthens the thinking, interpreting, and problem-solving processes of the individual. It starts with the exploratory play of infancy and childhood and continues through all physical education activities as well as others. It is developed particularly in team sports through learning the rules and signals and the special techniques for such skills as pitching a curve ball; punting a spiral; executing a particular football block; and diagnosing the opponents' offense or defense and quickly making important decisions.

The fourth such development gained by physical education is the emotional type. The developing and maturing of impulses and emotions through activities which give them expression under natural controls is a great benefit derived from physical exercises. Such controls as officials, rules, traditions, and the person's desire to stay in the game and play are inherent in team sports where fear, anger, joy, and other powerful emotions are experienced.

Physical education is stressed very highly in our public schools today and to a much greater extent in colleges. The next time we condemn our schools for too much physical education, it might be well to first consider the results of such activities and of the over-all results which physical education has upon the body of the individual. It helps to build sound bodies as well as sound minds and these are qualities that every individual should not be without, whether he be six or sixty.

Physical education should play an important part in the life of every individual and should be a part of his daily schedule as is breakfast, dinner and supper. If you are one of those parents

who does not believe in physical education and have denied your child the right to take part in the many activities covered by physical education, I urge you to reconsider this matter for the benefit of your child. The results will be most gratifying, I assure you.

The University of Maryland department of zoology last fall pioneered with lectures delivered through the medium of closed circuit television.

About 900 students register each semester for Zoology 1 - General Zoology. They were formerly divided into two lecture sessions—sessions which numbered 450 students each.

The size of the lecture class was felt to be a deterrent to effective learning and when the speech department proposed the TV idea, the zoology department faculty decided to try it.

Classes are now limited to 48 students. During the academic year, Dr. George Wharton, chairman of the zoology department, appears before the television cameras at nine and again at ten on Tuesday and Thursday mornings to present the course lectures. Each class, in rooms equipped with two 21 inch TV receivers, is supervised by a graduate student, and at the end of each lecture ten minutes is provided for discussion and questions. Discussion and questions were not possible under the old method of presentation.

Each of the lecture sections is divided into two laboratory sections. Four well-equipped laboratories are used concurrently to fit in the 40 laboratory sections.

Older Homes Are Adaptable To Air Conditioning

If yours is an older house and you've fretted through too many summers of discomfort, the chances

are that you're considering ways and means of modernizing your indoor climate.

Although a new electric heating-and-cooling system, installed as an integral part of your house, is the obvious ideal solution, it might present a budget problem you are not fully prepared to cope with right at present. In such cases, the room air conditioner can come to the rescue.

Today's room units are remarkably compact and are designed to operate with maximum economy. They're quiet, too, these days—good insulation and efficient mounting motors have virtually eliminated the noise problem of former years.

Many models will cool, dehumidify, filter and circulate air in a given area. (The dimensions of that area are determined by the horsepower or size of the unit.)

Some air conditioners are now designed even for non-standard windows, such as casements. These types can be installed without alteration of the window opening.

Low ampere units are available, too, and can be plugged into any outlet, without special wiring.

Many models on the market have automatic devices to start and stop the unit at predetermined times.

Federated Charities Active In County

The Federated Charities, a member agency of the Frederick County Community Chest - Red Cross United Appeal, has been keeping up with its good work, as usual, the past month. Mrs. Helen Summers, executive director, reports the agency has furnished a new pair of shoes to a high school student, purchased a pair of corrective shoes for a lady who could not afford to buy them and has had a pair of corrective shoes repaired for a Frederick County man.

Also by way of the agency's helpfulness it came to the aid of a transient family, with funds, consisting of a man, his wife, infant and two small children, by providing them with canned meat, milk and soup to help feed them on their way.

The people of Frederick Coun-

ty will be glad to know that the money they contributed to the Community Chest-Red Cross United Appeal is used in such splendid ways to aid the less fortunate.

Everything in the modern home is controlled by switches except the children.

Blue Cross Seeks Rate Increase

The Maryland Blue Cross and Blue Shield Plans last week applied for State Insurance Department approval, effective October 1, 1960, of general increases in both benefits and rates of the Blue Cross Standard (30-day) program and Blue Shield Plan A and B.

Blue Cross also applied for approval of a new Deductible coverage, at rates somewhat below those being asked for the improved Standard program, replacing a more limited deductible presented for Insurance Department approval last January.

Blue Cross "Special" (70 and 120 day) programs and the Service Benefit Plan for Federal Employees are not affected by this filing.

The requested rate increases for the new Standard Blue Cross program, including allowances for additional benefits, vary from \$1.20 to \$2.40 per month, depending upon the type of membership. They range from 30c to \$1.20 for Blue Shield Plan A and 5c to 80c for Blue Shield Plan B.

The most significant of the proposed new benefits would provide

Blue Cross Standard subscribers with coverage of x-rays and certain other tests and examinations when performed in physicians' offices and hospital outpatient departments. Plan officials termed this a major step in promoting the more effective use of higher-cost hospital inpatient facilities and, even more important, in encouraging the detection and diagnosis of conditions requiring care in earlier stages, when they can be treated most successfully.

X-rays, electrocardiograms and electroencephalograms would be covered, with a maximum combined benefit of \$100 per year per subscriber. Also, surgical pathology examinations, up to \$50 a year. This coverage would be subject to a 20 per cent cooperative payment by the subscriber. The benefit would be for the purpose of covering these tests required in diagnosing specific ailments, but would not include physical examinations and check-ups. While included as part of the Blue Cross program, the benefit would be underwritten and provided on a combined basis by both Blue Cross and Blue Shield.

Other proposed additional Blue Cross benefits include an increase in the allowances for private room care from the present \$10 per day to an amount equal to the average semi-private charge in the same hospital; an increase in mental and nervous benefits from the present 20 days to 30 days; and general increases in allowances for care in non-member hospitals. Blue Shield benefit additions are designed primarily to place the types of physicians' services covered by Plan A on a par with those of the higher level Plan B.

He pointed out that Blue Cross reserves have been depleted by nearly \$4 million in the past two-and-a-half years, including a loss of more than \$500,000 in the first five months of this year, and that they are now well below the minimum established as necessary by the Insurance Department. Blue Cross rates were increased in 1958 and 1959, but by less than the amounts requested and, in the earlier instance, the increase was delayed more than six months beyond the requested effective date.

"Although Blue Cross pays hospitals no more for their services than it actually costs those hospitals to provide them," the spokesman said, "it is recognized that hospitals' own costs, particularly in wages and salaries, are continuing to climb. In part, this increase represents the effects of inflation, but it is also the price of the life-saving progress which

is being made today in hospital care techniques and facilities."

He continued, "Inasmuch as Blue Cross is designed to cover all or nearly all of the costs of care subscribers receive, it follows that Blue Cross costs must rise as the cost of hospital care increases."

The Blue Cross official declined to predict how long the requested increase in rates would last. "The amount requested is the minimum needed to put the Plan back on a sound financial footing, at current hospital care costs, and to cover the expense of additional benefits," he said. "But the proposed new rates are not calculated to add much to reserves, and authorities are not predicting an early end to rising hospital care costs."

"We have therefore proposed," he continued, "that the financial condition and rate structure of Blue Cross be reviewed annually by the State Insurance Department for whatever adjustment in rates may be required."

The Blue Cross spokesman said that increases in utilization of hospital facilities by subscribers constitute a relatively minor factor in rising Blue Cross costs, pointing out that utilization in Maryland is, in fact, substantially below the national average.

In nautical terminology, a painter is a rope fastened to the bow of a boat for making fast to a pier.—Sports Afield.

Germany Increasing Frozen Food Market

The Farm Bureau Foreign Trade Office in Rotterdam, Netherlands, reports that Western Germany is a ready and expanding customer for United States frozen food products.

As a result of a recent promotion program in Frankfurt, Germany, the FB Trade Office has received a larger number of requests from German supermarket buyers for addresses of American suppliers of U. S. frozen fruits and vegetables.

"The potential market is tremendous," the report states. "This market can be developed

if interested American parties move fast.

The Farm Bureau Foreign Trade Office is planning to cooperate with German manufacturers of refrigerators and deep-freeze units to promote the consumption of frozen meat, fruits, and vegetables.

The U. S. biological authorities claim the average normal life of a deer to be about 12 years; 15 years is exceptional.—Sports Afield.

There's a bright side to everything, but there's no joy when it's on your blue serge suit.

He Showed Us The Glory Of Quiet Courage

Courtesy John Hancock Mutual Life Insurance Company

In 1860 history was about to tap Ulysses Grant for a mighty big job. Grant's whole early life trained him in the tough business of hanging on when all seemed black and hopeless. He passed his course in the school of hard knocks. Grant could take it.

The character molded under the buffets of earlier years revealed itself. In the red moment of sudden danger, when other men panicked, Grant was cooler than ever. The more desperate and confused the situation, the keener his concentrated energy.

Grant didn't hold much with textbook tactics. He applied common sense to the mechanics of war. To many generals, he said, "I was always wondering

what Napoleon would do. After Appomattox they sent him to the White House. He had his troubles both there and afterwards. When cancer put a term to his life he was nearly penniless.

In this, as in all things, Grant never admitted defeat. This is the human story behind the white tomb on New York's Riverside Drive. It is a story which should hearten and inspire every American when the way is hard and the night is long.

ABUNDANT LIFE

by ORAL ROBERTS

JESUS, THE MASTER

Jesus was a master. He proved Himself a master.

During the 33½ years that Jesus spent upon this earth, He showed His mastery over all things, animate and inanimate. He always used this mastery for the good of mankind.

In the beginning of His ministry, Jesus changed the water into wine. During His ministry He subdued the elements, hushed the sea to sleep, healed the sick and conquered death and the grave.

Jesus is the master today. He is the master over sin and the sinner, over fear and the fearful, over sickness and the sick, over demons and the demon-possessed.

Jesus, the master over sin and the sinner, took Saul of Tarsus, the chief of sinners, and changed him into a chief apostle.

Jesus, the master over fear and the fearful, calmed the angry waves, when his disciples thought their ship was going down, by saying, "Peace, be still!"

Jesus, the master of sickness and the sick, proved his mastery in His own body. For He was never sick. He healed the sick. Two-thirds of His ministry was devoted to healing.

Many people feel that the most important healing in the Bible is the healing of the woman with the issue of blood. Her faith was so strong that,

when she touched the hem of Christ's garment, she was made whole.

Her story is similar to the stories of millions of people today—believing strongly in medical science, taking advantage of all that good doctors have to offer, spending all that they have to get well and yet not achieving it. Finally, they realize that if they can touch the hem of His garment, they can be restored to health and strength.

This woman in the Bible had a "point of contact" through which she released her faith. She touched Christ's garment. She believed and was made whole.

Jesus mastered death itself when He arose from the grave and looked over the silent cities of the dead. Then He proclaimed, "Because I live, ye shall live also." Jesus, the master of demons and the demon-possessed, changed the demoniac whose name was Legion by casting out the evil spirits. Christ set Legion free, made him whole.

And today, Jesus is still master. It matters not what your problem may be nor how great your need appears. Jesus is still the master. If you will believe in Him, release your faith to Him, Jesus Christ, the master, will help you conquer.

IMPROVE Your FISHERMAN'S LUCK

DON'T BE A JERKER

THE new lighter lines make distance spin casting even easier than before—you'll adorn a lot more stream-side trees with spoons and plugs, too, unless you try a few practice casts on open water. If you do get "hung-up" on a far-off branch, don't try to jerk the lure loose. Set it in motion with a light pull on the line; then follow up with a quick pull that will result in recovery 75 per cent of the time.

Distance itself is no longer a premium feature on the newer closed-face reels now that thinner lines, retaining all the strength of their heavier predecessors, have greatly reduced friction. More line per reel is another advantage in small-radius monofilaments such as Du Pont's "Stren" spinning line.

A Modern Home in the Colonial Tradition

Designed for families who like the colonial tradition, with a contemporary flair, the Aristocrat is a perfect marriage with enough dignity for the most exclusive neighborhood.

Architects Dunaway & Jones, A.I.A. have arranged for planting areas at the huge master bedroom window, at the fireplace and again at the rear terrace. Some of the featured details in the Aristocrat are double bedroom closets, a sliding recreation room door, flanked by bookshelves, folding plantation shutters, a breakfast dinette fitted with space-saving built-in appliances, an extra linen closet, and handsome columns that bespeak colonial elegance.

The garage has been turned around to hide its door. Central heating and air conditioning equipment is located in an inside utility room.

The restful atmosphere of this home is enhanced by the lighting which can be brightened or dimmed to any level by Luxtrol light control. The living room, recreation room, dining room and three bedrooms are Luxtrol equipped. In the bedrooms, lighted valances can be dimmed to push the walls and the cares of the world a hundred miles away or they can be brightened for a brisk, cheery atmosphere.

The dining chandelier can be

dimmed to candleglow, making every dinner a festive occasion with low lights to stimulate appetites and good cheer.

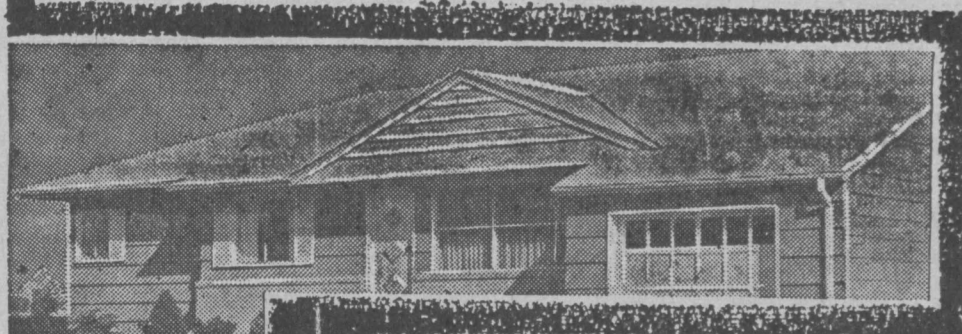

Just the right amount of dim light for comfortably watching TV can be selected in the living and recreation rooms. Or they can be brightened for reading, sewing or entertaining. An economical dim night light can be left burning all night long for safety and to discourage prowlers, because Luxtrol saves electricity when it dims the light.

Blueprints for the Aristocrat made from Architect's working drawings are available at \$20 for one set, \$5 each additional set. They include outline specifications and a lumber list, enabling you to obtain contractor's bids, arrange a mortgage, and build. Write to Associated Plan Service Inc., Box 305, Huntington, L. I., N. Y.

Dramatic Transition To Contact Lenses

"My eye physician says I can wear contacts!" Mrs. Barbara Dionne has been thoroughly examined by an eye physician. He took the measurements and referred her to the optician who will fit tiny corneal lenses and help her learn to wear them.

"The optician demonstrates how the lenses are placed over the cornea." Barbara watches carefully and then practices the technique. She will have many sessions with the optician until she is thoroughly acquainted with the procedure.

"It's easy to 'flip' the lenses out into your hand." Barbara is a particularly good student, according to the optician. She has learned to insert and remove her contacts with little more than a blink each time.

"I feel like a new woman!" Barbara's practice has enabled her to wear her contact lenses for a longer period each time. What's more, she looks younger and prettier and no one knows she wears them.

gaged in testing clot-dissolving substance as a treatment for heart attacks and strokes.

Clot-dissolvers are most effective if used as soon as possible after a clot has formed; hence both Dr. Julian and Dr. Clara are frequently called to the hospital during the night. Since the Ambruses have four children, aged three to nine, this can create problems not often faced by a scientific investigator. But so far things have worked out satisfactorily.

"Occasionally I've had to go out before my wife came back from a night call," Dr. Julian Ambrus remarked recently, "but usually there is one parent in the house.

Both Drs. Ambrus are on the staff of the University of Buffalo Medical School and Rosewell Park Memorial Hospital. Several Buffalo hospitals are cooperating in their studies, as well as several other physicians and research workers. The latter include Drs. J. E. Sokal, G. L. Collins, B. Smith, A. Reigate, D. Dunphy, D. H. Weintraub, C. Shumway, and L. Stutzman. The research is supported in part by the American Heart Association and the Genesee County Heart Chapter.

The clot-dissolver the Ambrus team is testing is an enzyme, or natural chemical expeditor, called fibrinolysin (plasmin), which has already been used successfully in humans to dissolve blood clots forming in leg veins. Now the Ambruses and their associates (in addition to investigators at a few centers in other parts of the country) are studying its potential value for treating clot-caused heart attacks and strokes. It is believed that if such clots can be dissolved quickly, damage to the heart or brain from the interruption to their blood supply may be held to a minimum.

While a commercially manufactured fibrinolysin is now on the market, the material used by the Ambruses and their associates is prepared in their own laboratory, and according to Dr. Julian, is far more potent. "Preparation of the material is a ma-

For activity in our study," he said, estimating, that the brinolysin used for each patient costs the equivalent of about \$2,000. The material is hard to handle, Dr. Ambrus added and loses its effectiveness rapidly at room temperature. Thus it must be administered by specially trained teams in rooms outfitted with instruments for testing and control. Maintained at about 40 degrees Fahrenheit in a refrigerated container, the plasmin is dripped into a vein for a varying number of hours over a period of three days.

Dr. Ambrus noted that only patients whose heart attack or stroke is less than three days old are being treated. Patients with heart attacks resulting from causes other than blood clots—such as the final shutdown of an artery which has been narrowed by atherosclerosis—are excluded.

Many Side Branches As research into the various aspects of fibrinolysin progresses, the Ambruses find that "many small side branches" keep cropping up. Dr. Clara, for example, is presently testing the enzyme for its effectiveness in a serious disease of newborn babies known as "hyaline membrane disease."

In this condition—which has become prominent in recent years as a cause of death among newborn infants—some or all of the lung's air spaces are blocked by a layer of fibrous material (similar to the framework on which a blood clot is built). Breathing may be so seriously impaired that the newborn baby may turn blue within a few hours and die. Fibrinolysin has been shown to dissolve this type of membrane material in guinea pigs, and recently Dr. Clara Ambrus began to use it with affected babies.

Another potential use of the enzyme, according to Dr. Julian, is to preserve skin grafts threatened by clots occurring in their blood vessels. This has been tried a few times as a last resort when a skin graft had turned blue and was about to fall off, he added. It seemed to work.

But to the Ambruses, as to other scientists working in this field, the main target continues to be the clot in the blood ves-

sels supplying the heart or brain—the clot that causes heart attacks or strokes. Can fibrinolysin become established as safe and effective first aid for these conditions?

"Thrombophlebitis (clots in leg veins), which is the only condition where I am absolutely sure on the basis of our studies that plasmin is beneficial, is not a major disease," Dr. Julian Ambrus summed up. "Frequently it is not a serious condition and good results can be obtained with conservative treatment or with anticoagulants. If we can prove that fibrinolysin can contribute in a major way to treatment of coronaries and strokes, a real advance will have been made. I am sure it will take a long time—and study of a large number of patients."

According to a doctor, singing warms the blood. We have heard some that has made ours boil.

What constitutes a living wage depends upon whether you are giving it or getting it.

Friends are folks who excuse you when you have made a fool of yourself.

Trace-Mineralized Salt In The Commercial Feed Lot

History was quietly being made in the Monfort Feed Lots of Greeley, Colorado last fall. The last step in a series of controlled, scientific experiments applied findings on the importance of trace-mineralized salt in cattle feeding to the commercial feed lot.

The Monfort Feed Lots fatten more than 50,000 head of cattle a year. For the purpose of the experiment, 294 good quality Angus heifers were selected and divided into two groups. Both groups were fed the same daily rations for the same period of time—109 days. However, there was one very important difference. One group was fed plain salt, the other group was fed Morton T-M (trace-mineralized) Salt. Since this was the ONLY difference between the two groups, any variations in weight must be attributed to the type of salt fed.

The experiment began on August 31, 1959, and was concluded on December 8, 109 days later. During this period the cattle were fed the following average daily ration: 9 lbs. of silage, 16

lbs. of grain, 1 1/2 lbs. of dehydrated alfalfa, 1 lb. shorts pellets with stillbrestol and 1.5 oz. of salt scattered over the feed. Free choice salt was also provided. While this was the average daily feed per head in each lot, the control group received plain salt whereas the test group was given T-M (trace-mineralized) Salt. The owners of the lots asked themselves two questions: Will there be any appreciable difference in gain between the two lots, and what will be the cost of that gain? The answer to both these questions was an overwhelming and unqualified "Yes."

The average daily gain for the control cattle (plain salt) was 2.14266 lbs. The test cattle (trace-mineralized salt) gained an average of 2.22761 lbs. per head each day, or an added .08495 lbs. over the control group. For the 109-day period, the total average gain was 233.55 lbs. in the control group contrasted with 242.81 lbs. in the test group. In other words, trace-mineralized salt provided an extra 9.26 lbs. per head. How much did this gain cost?

The added investment in feed costs amounted to 17 cents per head of cattle for the full 109-day period—based on an average intake of 2 oz. of T-M (trace-mineralized) Salt per day. However, the important consideration for the feed lot operator is how much each cwt. of gain is going to cost in terms of feed. For the control group the gain cost was \$19.97 per cwt., while the test group cost only \$18.63 per cwt., or a savings of \$1.34 per cwt. With over 50,000 head of cattle to feed each year this amounts to a very considerable sum of money. As a result, the owners of the Monfort Feed Lots, Inc. have decided to feed all their cattle T-M (trace-mineralized) Salt.

The results of the Monfort experiment prove conclusively that more efficient and productive feeding can be obtained when Morton T-M Salt is substituted for plain salt. The increased cost per head is very slight, and it represents the farmers', ranchers' and feed lot owners' insurance that they are getting the most for their feeding dollar.

Honoring Old Glory

A small item in a newspaper in a city in which I was visiting recently told of a United States flag that had been broken down in an accident and had fallen to the sidewalk in a community shopping center. For several hours people walked over it, trampling on it. The writer said this thoughtlessness indicated that American patriotism, our once high regard for our nation's flag, had dissipated through the years.

July 4th, 1960 commemorates one of the greatest acts in human history, the adoption by the Continental Congress in Philadelphia in 1776 of the Declaration of Independence. Out of the series of incidents precipitated by this day's action came the Star Spangled Banner—our immortal anthem written by Francis Scott Key.

I Am Your Flag

Many songs and poems have been written about Old Glory. Thomas E. Wicks, of St. Louis, a war veteran, has published a

moving monologue by the Flag which I commend to the attention of all citizens—especially those who thoughtlessly trampled upon the Flag mentioned in the newspaper item above:

I am your Flag.
I was born on June 14, 1777.
I am more than just cloth shaped into a design.

I am the refuge of the World's oppressed people.
I am the silent sentinel of Freedom.

I am the emblem of the greatest sovereign nation on earth.

I am the inspiration for which American Patriots gave their lives and fortunes.

I have led your sons into battle from Valley Forge to the bloody ridges of Korea.

I walk in silence with each of your Honored Dead, to their final resting place beneath the silent White Crosses, row upon row.

Honor Me!
My Red Stripes—symbolize the blood spilled in defense of this glorious nation.

My White Stripes—signify the burning tears shed by Americans who lost their sons.

My Blue Field—is indicative of God's heaven under which I fly.

My stars—clustered together unify 50 states as one, for God and Country.
"Old Glory" is my nickname, and proudly I wave on high.

Honor me, respect me, defend me with your lives and

U. Of Md. Receives TB Assn. Grant

A grant of \$13,344.00 has been presented to the Pulmonary Disease Services of the University of Maryland School of Medicine by the Maryland Tuberculosis Association. The grant was accepted by Patrick B. Storey, M.D., who was recently named Associate Professor of Medicine in this service.

In addition to serving in this post, Dr. Storey will also serve as Chairman of the Post-Graduate Education Committee and Director of the Post-Graduate Education Program. He will also be responsible for ward activities.

Until accepting this appointment, Dr. Storey has been serving as Director of Professional Services at the VA Tuberculosis Hospital in Baltimore. Previously, he has been Assistant Professor of Medicine at the University of Maryland and Johns Hopkins Schools of Medicine. He has also held posts in tuberculosis control work at the Washington, D. C. General Hospital and the Fitzsimmons Army Hospital. He is a member of the VA Executive Committee for the study of the chemotherapy of tuberculosis, and chairman of the VA Committee on chronic bronchitis.

Those who attended the grant presentation were Dr. William S. Stone, Dean of the University of

Maryland School of Medicine, Lucien E. D. Gaudreau, President of the Maryland Tuberculosis Association and Frank Jones, Executive Director of the Association.

Mr. Gaudreau said, "New information from the U. S. Public Health Service states that Baltimore has the most widespread TB problem of all our big cities. It adds that the entire state ranks all too high on the list of heavy TB incidence areas. This grant, made possible by the people who use Christmas Seals, will assure us that a major TB control program will be continued on home ground."

You can't fool all of the people all the time, but somebody is trying it all the time.

Read John 13:1-10.
He (Jesus) poureth water into a basin, and began to wipe them with the towel wherewith he was girded. (John 13:5).

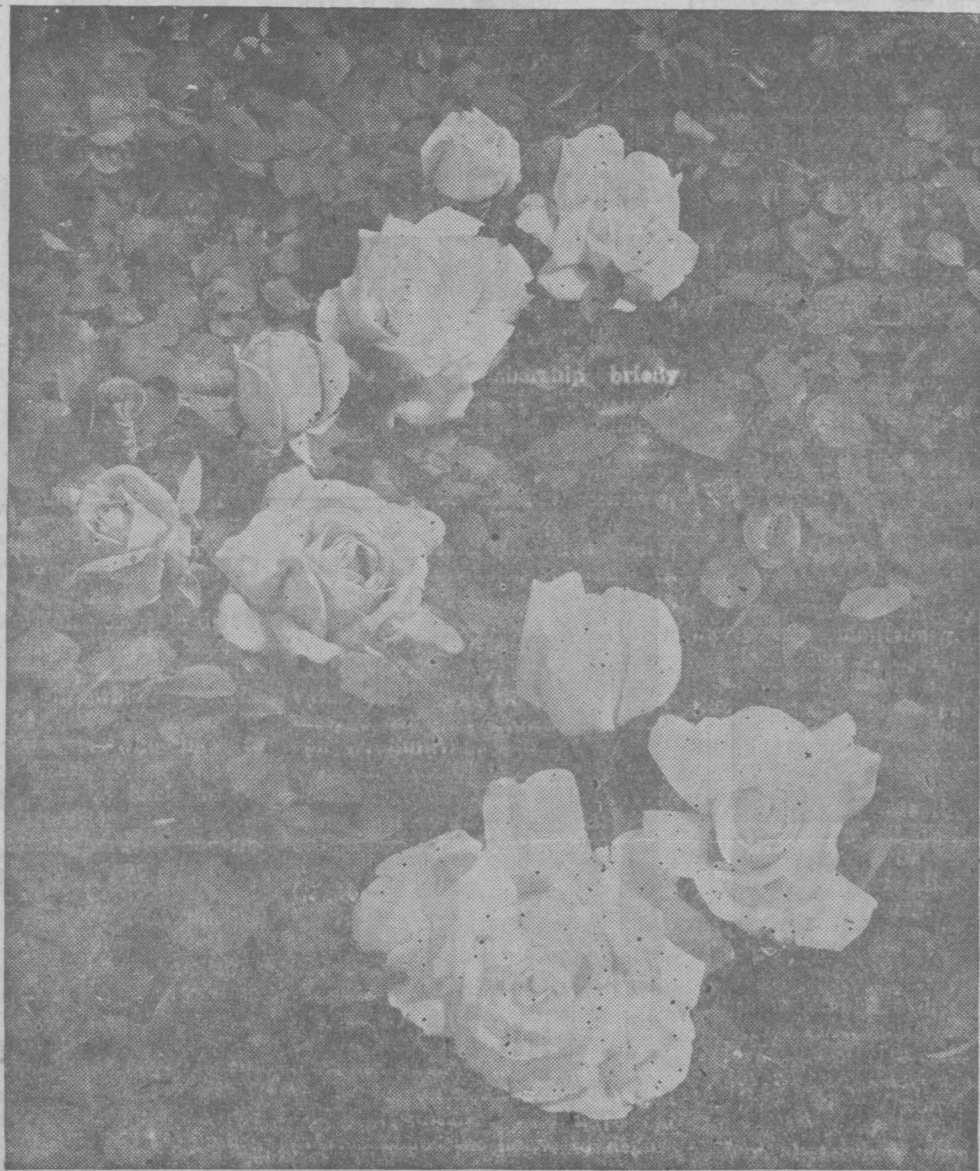

In the upper room that night, the Master might have asked John, Peter, Andrew, or another of His followers to perform the menial act of washing feet. He might have told a manservant or a maidservant to come in and do it. He might have simply omitted this much-needed service. But Jesus became the servant. He girded Himself with a towel and washed the disciples' feet.

A master cannot be served until he has demonstrated his own ability to serve. So Jesus humbles Himself to serve us. He who holds the universe in His hand kneels down before us and washes our tired, dusty feet.

So the Son of God took a towel, not simply to cleanse the feet of His friends, or only to set an example for them to follow. He did it to show unmistakably that he who is sent is not greater than he who sends. God is like that.

Prayer
O Thou Creator, who dost astonish us continually by serving us, help us to see that only with the eyes of faith can we witness the glory of Thy service for us. Why dost Thou repeatedly sacrifice Thyself for us? We have the answer in Thy great love. Help us to be grateful, even if we cannot be worthy. In Christ's name. Amen.

Thought For The Day
Jesus humbled Himself to liberate us.
T. Otto Nall (Minnesota)

ROSEDOM'S FIRST FAMILY. Many rose lovers consider the three varieties pictured here the greatest rose family of all time: Peace (top three blossoms); Charlotte Armstrong (center three blossoms), and Garden Party, result of a cross of first two varieties. Peace, an exquisite yellow hybrid tea created by famed French hybridizer Francis Meilland, was an All-America Rose Selection winner in 1945. Charlotte Armstrong, created Dr. Walter C. Lammerts, with a cross of Crimson Glory with Sister Therese, is one of the most popular hybrid teas ever introduced. It has sold in the million of plants. It is rare to find a leading hybridizer today not using Charlotte Armstrong extensively in his crosses. Garden Party, the 1960 All-America winner, is the first successful cross of Charlotte Armstrong with Peace. Garden Party is a rich ivory at the flower's heart, giving way to creamy tones and a flush of apple blossom pink. Charlotte Armstrong and Garden Party were created by Armstrong Nurseries, Inc., Ontario, Calif.

IN THIS WORLD

DIATOMS ARE FOUND TODAY MOST ABUNDANT IN THE COLD WATERS OF THE ARCTIC AND ANTARCTIC.

DIATOMACEOUS EARTH, FOUND IN STRATA 1,000 FEET THICK IN CALIFORNIA, AND USED FOR MANY THINGS SUCH AS INSULATION FOR BLAST FURNACES AND FILTERS FOR LIQUIDS IS ACTUALLY THE FOSSIL REMAINS OF MICROSCOPIC MARINE ORGANISMS KNOWN AS DIATOMS.

GREATLY MAGNIFIED (AVERAGE LENGTH 1/200 OF AN INCH).

DIATOMITE IS WIDELY USED TODAY IN PORTABLE FILTERS FOR LAWN SWIMMING POOLS TO KEEP WATER POLISHED AND CRYSTAL CLEAR.

THANKS TO THESE LITTLE CREATURES THAT LIVED AGES AGO AND THE RESEARCH IN WATER FILTRATION EQUIPMENT OF LOMART INDUSTRIES, WATER IN LAWN SWIMMING POOLS CAN BE KEPT HEALTHY AND CLEAR THROUGHOUT THE SUMMER.

CLEAR WATER (DIATOMITE) POOL FILTERS CAN TRAP ALL BACTERIA AS SMALL AS 1/500 OF A PINPOINT.

Americans On The Move

Do It Yourself—And Save!

The large number of household furnishings that can be hauled by rental trailers has helped make do-it-yourself moving popular. The items shown above will all loaded in this tandem van trailer and station wagon. Better rental companies give customers a mover's guide showing how to efficiently load and tow trailers.

In recent years, many families have found they can cut moving costs up to 75% by transporting all or part of their household furnishings in a rental trailer hitched to the family car.

For example, a typical charge for moving 2,000 pounds of household goods from Portland, Oregon to St. Louis, Missouri—a 2,000 mile trip—would be approximately \$50. Add to this the cost of gasoline (it will take extra fuel for your car to pull the added load) and the total still averages only about one-fourth the cost of moving the same amount of goods by a commercial firm.

In addition to savings, another advantage of a do-it-yourself move is having your furniture and personal belongings right with you when you arrive and need them.

Trailers are available in a variety of sizes from small 4-by-6-foot models to large 6-by-16-foot four-wheeled tandem vans. You can rent one by the hour, day or week. You can use it for short hauls, round trips to nearby points, or take it cross-country and leave it with a rental dealer in another city. Towing a trailer, no matter what size, is a relatively easy thing. No special experience is necessary. Just follow the few simple instructions given by your rental trailer dealer.

Before renting a trailer, you should make sure that cargo insurance is included in the rates for one-way trips; find out who pays for trailer repairs and tire failures on the road, and if road service is provided. The better companies include these features, as well as complete hook-up of trailer and lights, in their regular charge.

You can find the names and addresses of trailer rental dealers in the Yellow Pages of telephone directories under "Trailers—Renting," or by calling Western Union's operator 25.

BABSON

Writes . . .

BY ROGER W. BABSON

Babson Discusses Selling
BABSON PARK, Mass., July 7—Now that graduates from high schools and colleges are

looking for jobs, may I devote this week's column to a discussion thereof? Let me start by saying that the first step is to analyze oneself and ascertain the line of work for which one is best fitted.

Five Different Pathways
Most of today's graduates have come to a "parting of the roads" and are faced with five different paths which they may follow. (1) The professions. If you feel you are best suited to be a doctor, dentist, lawyer, teacher, or minister, you must go back to a college which specializes in one of these professions. I sometimes think there are enough lawyers in the country, but certainly the other groups are being amply rewarded.

(2) Engineering and Building. There are many opportunities in this line provided you work in a progressive and growing community. (3) Manufacturing. This is the line of work which will probably confine you to spending your life with one or more large companies. If you like people and are not ambitious to be your own boss, it is well to get connected with a large manufacturing company. You, however, must be willing to go where you are sent and to obey orders. (4) Agriculture. At one time this meant working on a farm, but it is not so any longer. The reason is that

raising both crops and livestock has become an intricate business. Those loving such work could take an additional course at an agricultural college. Every state has such a college with low tuition.

(5) Selling and Advertising. If you want to sit in an office and dictate to a blonde, you should not take up selling — not even selling advertising. If, however, you are willing to wear out shoe leather, ring door bells, and fight for business, selling offers you a great opportunity.

Importance of Salesmen
Salesmen have never needed a labor union in order to get higher wages or commissions. A salesman can always get well paid, according as he produces. I know a salesman who earned more money than anyone who had gone into the first four of the above mentioned lines of work. A salesman must be willing to start at an average wage; but "the sky is the limit," if he will produce. This especially applies to those who secure a position with high-grade banking houses and are able to help float important underwritings.

Another thing, all of those who choose one of the first four lines of work listed above are dependent upon the selling

of their products or services. This is especially true of construction, manufacturing, and agriculture. The customer must be "sold" if he is to buy houses, merchandise, or even farm products. Truly, "the harvest is great," although the good salesmen are few. The national problem of employment and in fact the prosperity of the nation are dependent, not on the Administration or the Congressmen and Senators in Washington, but rather upon the salesmen of the nation; they control its economic destiny. Some will wonder why I did not make a special sixth division for Banking, but the successful bankers must be excellent salesmen.

Importance of Patience
When climbing a ladder, use the first rung, and climb slowly upward. Do not try to start where your parents leave off. The fun of life is in the striving, rather than in the arriving. Present starting wages in all of the above five groups are good at the present time; but sometime there will be a day of reckoning. "Trees do not grow to the sky" and prosperity does not continue forever.

I opened this week's message by referring to graduates who are meeting a "parting of

the road." It may not be long, I fear, before these five paths may converge again into a temporary period of readjustment and unemployment. Then the travelers of all these pathways will be competing with one another, and surely with the hard-working intelligent people of Europe.

The social security law makes special payment provision for the disabled beneficiary who might undertake trial employment or rehabilitation training. W. S. King, District Manager of the Hagerstown Social Security Office, stated today.

King explained that monthly payments issued to a beneficiary and his dependents under the social security disability program are terminated when it is established that the individual is able to work. Although notice must be given to the Social Security Administration as soon as a disabled beneficiary goes to work, monthly payments may be continued for a trial period up to 3 months. A disabled person who starts working under a State rehabilitation program may continue receiving monthly social security checks for himself and family for as long as a year.

This, King said, allows the disabled beneficiary some financial security while he is attempting to regain his capacity to perform regular employment. Further information may be obtained from your social security district office.

SPORTS AFIELD

On a hot summer day, have you ever anchored offshore, and with your family or pals spent half an hour of cool fun in the water around the boat? Ten years ago, few boat owners, especially outboarders, would have answered that question with a yes. Cruiser men knew swimming from the boat; for others it was the beaches. The deep world of skin diving was just opening up. Today, if your answer is still no, you're with the minority.

The main reason for change, says Willard Crandall, Boats Editor of Sports Afield Magazine, is that modern outboard boats are much better to swim from. Boats, because they are wider, are considerably more steady while stopped, an obvious advantage. Motors also play an important part. With the simple control of

forward and reverse at all speeds, it is possible to position the boat accurately at any time. More important, perhaps, is the sureness of starting with today's motors.

Sounds as if today's family boat is just right for this over-the-side work, and that's not far from the truth, as many water skiers will testify. When the boat gets as broad, and as high-sided, as an 18-foot off-shore outboard, a boarding ladder becomes necessary. But the point here is that boarding ladders are something to be desired. They are merely lightweight shore ladders built to hook over the side of the boat and hang down into the water. These steps are flat, like those of a step-ladder. It makes getting aboard simple even for the heftiest person.

Hauling all the swim equipment aboard should be no problem—all are lightweight. Plastic inflatable items, such as beach balls, innertube rings, surfboards or one-man rafts, are so ultralight that the problem may be to keep them from blowing out of the boat while underway. All these help make swimming from the boat safe for children. The youngest ones should wear a life vest while in the water.

For any swimming from the boat, it's best to anchor rather than let the craft drift. Then there's no worry about the boat sneaking too near shallows, or where there are rocks, logs or any other obstructions. Also, anchoring makes for carefree swimming around the boat; everyone in the water knows there will be no occasion for starting up the motor and boat before all are aboard. It's best to be sure the anchor is holding properly, as well as determining if the boat is in a good swimming spot, before anyone goes into the water. Feel the anchor line; any vibration is an indication that the anchor is dragging.

If the motor is to be started for some reason such as drifting out of position, it's best to notify everyone in the water first.

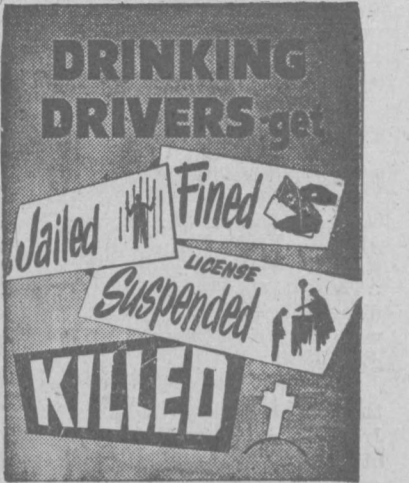

Merely check to see where each swimmer is, making sure no one is too close to the boat and motor.

Beaches readily reached by car are usually crowded in real swimming weather. With your boat, you can have a choice of secluded sand beaches that are connected to no road; or you can anchor for off-boat swimming. In either case, modern boating is the key factor in more enjoyable water-sports afloat.

Brown trout have a habit which can be fatal if anglers take advantage of it: they feed on one type of food at a time. Open the stomach of the first brown you catch and match its contents on your hook. You'll more than double your chances of landing a few of these wily fighters.—Sports Afield.

Social tact is making your company feel at home, even though you wish they were.

The fellow who thinks himself a wit is usually half right.

YOUNG IDEAS
from Polly Ponds

Q: Why is it necessary to take a bath every day, even if I look clean?
A: Because personal daintiness is the first and most important step toward real beauty. Bathing gets rid of all the near-invisible dust accumulations active people pick up during the day. They also give you the kind of clean, glowing freshness that most men find more attractive than heavily made-up glamor.

You'll enjoy your baths more if you turn them into beauty treatments:

Invest some of your allowance in a very good soap and bath oil. If these are beautifully perfumed - you will be, too.

After you've finished bathing and have dried yourself from head to toe, pat a sweetly-scented talcum powder over your skin. Choose one containing a body deodorant for extra protection that's especially important during warm weather... and don't forget to use a regular under-arm deodorant as well.

Hess Duraclean Service Provides Complete Upholstery Cleaning For Home and Auto, Finest Chemical Methods Known Used In Fire Proofing

One could travel a long time before finding a company able to help protect from soiling and spotting so many articles found in the home as the Hess Duraclean Service, 3 West St., Gettysburg.

E. Glenn Hess, proprietor, is an authorized member of the Duraclean Co. of America and received expert training in the company's plant in Chicago. As a result, he is able to feature the following services: upholstery cleaning for home and auto, including rugs, drapes and furniture; moth proofing and soil retardation and flame guard against fire, using the finest chemical methods known.

Mr. Hess also is equipped to remove spots instantly and he advises the public to call him immediately in the event of accident or damage to material. He also is able to remove cigarette burns and has a complete wall-to-wall carpet laying service, which just about rounds out his activities as a dealer in complete Duraclean service.

Four employees aid Mr. Hess who has been at his present site since 1956 after having founded the local franchise in Fairfield in 1954. Operating in a 25 mile radius of Gettysburg, Mr. Hess can be reached at EDgewood 4-5949.

Dale's Tire Shop Features Dunlop Products, Adjoining Diner Serves Finest in Chops, Steaks

Mr. Dale F. Lawler is the proprietor of two businesses adjoining each other. Although the combination at first glance seems unusual, Mr. Lawler has won friends far and near for excellent quality and service at both. We refer, of course, to Dale's Tire Shop and Diner, RD 4, one-and-a-half miles north of Gettysburg on Route 15.

In the tire business 22 years, Mr. Lawler operates a complete tire sales and service business, providing tires for the largest and smallest vehicles, including cars, trucks and tractors. He is a franchised dealer for Dunlop tires and tubes and all his products are guaranteed for the finest workmanship.

At his diner, adjoining the tire shop, Mr. Lawler serves delicious home cooking — soups, steaks, chops, fine coffee, pies, lunch, dinner and short orders. Serving a 50 mile area, Mr. Lawler can be reached at EDgewood 4-5617.

Smart people are want-ad minded!

Children's Aid Society Performs Various Duties

The Children's Aid Society, a member of the Frederick Community Chest-Red Cross United Appeal, is constantly employed in giving advice and service to people who do not necessarily need financial assistance. Often trained case workers are called upon merely to talk over family or personal problems.

In some cases involving difficulties arising between children and parents the agency may feel it advisable to work with these children in their own homes. In familiar family surroundings the case worker can more quickly and accurately discover the causes of the difficulties and present solutions, such as making the parents realize their responsibility for Harry's or Ann's delinquent behavior. Following are two typical case stories in which the Frederick Children's Aid Society was called upon to help in the past month.

One case dealt with the X family, consisting of a mother, father and three teen-age children. The father and older brother were regularly employed. The mother was in poor health and highly nervous. The youngest son had for some time caused the family grave concern due to his numerous escapades. Finally he was referred to the Agency by the police and charged with being delinquent, after being arrested for larceny. The boy was placed on probation and returned to the custody of his parents. Under the watchful eye of the Children's Aid Society he was rehabilitated, now has regular employment and is making a satisfactory adjustment.

The second case involved a young unmarried woman who was expecting a child and contacted the Children's Aid Society for help. The agency arranged for her confinement and placed the child for adoption at the young mother's request. The child was subsequently adopted by a young childless couple with the Agency's help and approval. This child will have a normal and happy childhood while its mother is now happily married, having given up all claim to the child.

The above case stories show the understanding and helpful work of the Children's Aid Society, a very important member of the Frederick Community Chest and Red Cross United Appeal—supported by Frederick County contributors.

PER CENT OF FOOD DOLLAR SPENT FOR BREAD AND PER CENT OF NUTRIENTS CONTRIBUTED IN DIETS

Enriched white bread, representing 85 per cent of all bread consumption in the United States, is the best possible nutrition buy, Dr. Robert S. Harris, Massachusetts Institute of Technology health authority, told a wheat marketing seminar held recently in Highland Park, Ill.

"A dietetic miracle happened in 1941 when enriched white bread and flour became the law of our land," Dr. Harris said. "Penny for penny, enriched white bread, farina, macaroni and spaghetti are the best nutritional buy. A government study shows that the people spent 4 per cent of their food budget for bread in 1943, and with it bought 10 per cent of their nutrition."

In a nutrition test of 45 most popular breads in 18 bread-eating countries, Dr. Harris

OBITUARIES

MRS. ROY D. McCLEAF
Mrs. Grace Longnecker McCleaf, 57, wife of Roy D. McCleaf, died at her home in York, at 2:15 p. m. Saturday. She was a member of Duke St. Methodist Church, York.

Surviving in addition to her husband are two sons, Lewis M., Dover R1, and Stuart R., York; three daughters, Mrs. Jean L. Winter, York, and Mrs. Grace M. Henry and Jane R. McCleaf, both at home; one stepdaughter, Mrs. George P. Ziegler Jr., York; two sisters, Mrs. Helen Grove, Cullen, Md., and Mrs. Luella Gross, Emmitsburg R3, and seven grandchildren.

Funeral services were held on Tuesday afternoon at the Edward W. Baumeister Colonial Mortuary, York, with the Rev. Harold E. Posey, officiating. Interment was in St. Paul's (Wolf's) Union Cemetery.

S. S. Cooperative Meeting Scheduled

The election of local board and Farm Home Advisory Committee members plus operations reports will be the highlights of the Southern States Cooperative's annual membership meeting for the Emmitsburg area on Monday, July 25, 1960 at Tom's Creek Church at 8 p. m. DST.

"Gearing Southern States Cooperative to Better Serve Stockholder Members"—a slide film presentation on the cooperative's 1959-60 operations and a look into the future—will be presented by L. B. Baldwin, an Agronomy Supervisor of the Southern States Baltimore Regional office. Harry Weber of Emmitsburg, will serve as chairman of the local meeting. Raymond Baumgardner, Taneytown, will give the invocation. Group singing will be led by Mrs. Ralph Lindsey, Emmitsburg.

A report on local operations and services will be given by Ralph D. Lindsey, manager of the Emmitsburg Feed and Farm Supply.

Nominees for the local Southern States Board for the area are Harry Swomley R2, Emmitsburg, and Robert Wood, R2, Fairfield.

Nominees for the Farm Home

Advisory Committee are Mrs. Oliver Cashell, Taneytown, Md., and Mrs. Maurice Fuss, R2, Emmitsburg.

Other nominees may be made from the floor.

Members of the board whose terms expire this year are Roy Sanders and Delbert Piper.

Members of the Farm Home Advisory Committee whose terms expire this year are Mrs. Charles Valentine and Mrs. Eugene Long.

CHAMBERS—KLIESER

Mrs. Therese Koenig Klieser, daughter of the late Mr. Paul Koenig Sr., and Mrs. Koenig of Stephens City, Va., became the bride of Gerald Freeman Chambers, son of Mr. and Mrs. Gerald F. Chambers, Mount Savage, Md., on June 16 in Sacred Heart Catholic Church, Winchester, Va.

The marriage ceremony and nuptial mass were celebrated by the Rev. Joseph Schwartz. Music for the ceremony was played by Miss Sue Dick. The church was decorated with madonna lilies and pine.

The bride, who was given in marriage by her brother, Paul Koenig Jr., of Arlington, wore a gold colored gown of brocaded roses and a gold mantilla.

The maid of honor and only attendant, Miss Dolores Bukowski of Baltimore, wore a blue gown with white embroidered roses and white accessories.

John Chambers, Cape Canaveral, Fla., brother of the bridegroom, was best man.

A reception was given by the mother of the bride at her home, Sierra Vista farm.

Mrs. Chambers has been vocational counselor at St. Joseph College, Emmitsburg, for the past year.

Mr. Chambers has been a counselor - teacher at the Maryland School for the Blind in Baltimore for the past two years. Both Mr. and Mrs. Chambers are graduates of Loyola College, Baltimore.

The couple will reside in Baltimore and resume teaching in the fall.

Fractures Nose

Tyson Welty, 58, Emmitsburg, received treatment at the Warner Hospital this week for a fracture of the nose.

COLOR IN THE HOME

By Jacquelin L. McConaughy, Du Pont Color Stylist

THE entrance hall is the first part of your home visitors see. Whether a small entry, a narrow stair hall, or a larger area used for dining and other family activities, it may be transformed into a charming and important introduction by imaginative decoration.

The proper use of color can contribute as much to an atmosphere of spacious comfort and hospitality in a foyer as size and careful architectural planning. Color experts at Du Pont have proved that color can be used to make a room appear warm or cool, intimate or formal. Color can be applied so it seems to raise or lower a ceiling, to make walls appear nearer or farther away, to cause a room's proportions to look surprisingly larger, or smaller. Colors with the most warmth are shades of the red and orange groups. A seemingly cold entrance hall may be made psychologically warmer by using colors such as pinks, peach, beige, yellow, buff, and ivory. The cool, tranquil effects of blues, blue-greens and greens will help offset warm temperatures.

Here are a few applications of these principles. You can make a small foyer seem larger by painting walls, ceiling, and woodwork in one light color. Bringing forward the end wall of a long hall is accomplished by painting it a darker shade than the other walls. To push back side walls of a narrow entry, finish them lighter than the end walls. In raising a ceiling, apply white or very light colors, or to lower it, use darker hues. Enjoy the magic of colors—and enjoy your foyer's new personality.

SPORTS FLASHES

As Provided by the Game And Inland Fish Commission of Md. Five Coast Guard Safety Suggestions —Consider what action you would take under various emergency conditions—man overboard, fog, fire, a stove-in plank or other bad leak, motor breakdown, bad storm, collision. If you don't know, or are in doubt, look into it.

2—Falls are the greatest cause of injury both afloat and ashore. Eliminate every tripping hazard where possible, make conspicuous those which must remain, have adequate grabrails and pay particular attention to the slipping qualities of footwear used aboard.

3—Have a chart of your area. You may know it well but you'll After exercising your dog in the field, it is best to wash out his eyes with a warm solution of boric acid. This will remove the weed seeds and foreign matter that have accumulated there and eliminate the possibility of inflamed and irritated eyes. —Sports Afield.

A friend forgives your defects, and if he is very fond of you, he doesn't see any.

FINANCIAL INDEPENDENCE ... for your family ... for YOU when you retire Ask Your Farmers and Trades Insurance Agent ROBERT SIMPSON Phone HI 7-2181 W. Main St., Emmitsburg

be surprised how much more the chart will disclose. 4—Check your fuel supply system; see that tanks are vented outboard, that the fill pipes are located outboard of beaming and extend to the bottom of the tank. Have an adequate filter on the fuel line. 5—Do not use kapok-filled life preservers to sit upon. Since action compresses the filler and reduces its efficiency.

Fishery Notes The past few days indicate the best fishing locations for various species of fish on the 'Shore are as follows, according to Guy Rogers, regional fish culturist: Largemouth Bass: Susquehanna Flats, Frazers Lake, Uriveville Lake, Leonards Lake, Schumaker Lake and the Pocomoke River. The Elkton and Rising Sun Community Ponds as well as the Plum Creek and Brickyard Ponds were restocked with adult largemouth bass the past week. Smallmouth Bass: Susquehanna River below the dam; Big Elk and Cotoraro Creeks. Chain Pickerel: Smithville Lake and Leonardo Lake.

TRUSTEE'S SALE OF DWELLING

By virtue of an Order of the Orphans' Court for Frederick County, the undersigned Trustee will sell at public auction at the Court House door in Frederick, Maryland, on Saturday, July 23, 1960, at 11:00 o'clock A. M. all that lot of ground and improvements thereon situated at Four Points, Southeast of Emmitsburg, in the Fifth Election District, being 150 1/4 sq. perches of land improved by a four-room dwelling with electricity, good well, metal roof, and so on. Being all and the same real estate of which Annie E. Hahn, widow, died seized and possessed. For title reference, see the deed from Susan E. Stauffer, widow, to the said Annie E. Hahn, dated April 24, 1915, and recorded in Liber 314, Folio 91, one of the Land Records for Frederick County. Terms of sale as prescribed by the Court Order—1/10 of the purchase price to be paid in cash on the day of sale; the residue in 30 days or on ratification by the Court. Purchaser shall give his note with approved security and bearing interest from the day of sale. Taxes to be adjusted to the date of sale. All expenses of conveyancing to be paid by the purchaser. Helen Hahn Gebhart, Trustee Edward D. Storm, Attorney 7/8/60
