## Most Anything At A Glance

BY ABIGAIL

The whole area has been deluged with an avalanche of small insects which have been plaguing the citizenry for the past week. Quite a number of residents were alarmed by the number of the tiny insects which appear almost everywhere, inside and outside the houses. So minute are the creatures that they are hardly visible to the naked eye. However they are not new to this section, some residents maintain. They are commonly known as "oats bugs" and will disappear just as quickly as they came on the scene.

Miraculous is the adjective to describe the escape from injury and death of a seven-year-old boy who was plummeted over Niagara Falls over the weekend. Anyone who has seen these majestic falls and the enormous quantity of water which cascades over them, shudder at the thought of anyone being swept over and the resultant 161-foot drop. Attempts to conquer the mighty falls in metal tubes and barrels have resulted in death to the would-be conquerors every time. However the small lad had no protection whatsoever, except a life jacket he was using while boating above the falls. The boat was capsized and the lad, his little sister and a man operator, tossed into the rapids. The girl was rescued by two brave men from New Jersey who were viewing the Falls at the time. The rescuers jumped in just ahead of the break and seized the girl but the boy was carried on over to the precipitous drop, nearly 200 feet below. I forget the name of the award given annually for heroism of this nature but I hereby nominate these two men for their brave and noble act of rescuing the girl, for this award. It was truly heroic.

Some clear and forthright thinking is due concerning the attempts to consolidate the local public school with that of Thurmont. It's time for both sides to get together for some intelligent discussion before drastic action is taken and which might create some bitter feeling locally. It is now time for a committee to be formed to discuss concretely and intelligently with the School Board any consolidation plans and to offer a proposed sight for a new school which would accommodate students from the two towns. In my own personal opinion I believe that a representative from every organization in town should be appointed to this committee to meet with the School Board Representatives from the Town Council, Lions Club, Chamber of Commerce, Jaycees, PTA, veterans organizations, etc., should be named on this committee and determine just what land is available, if any, between the two towns, for the construction of a new school which might possibly give our children a better educational setup and at the least inconvenience to all concerned. There is plenty of land in the seven miles between here and Thurmont and a name for the school should be given that would make all feel that equality had not been forgotten. Perhaps something like Em-Thur School or Emmitsburg-Thurmont Consolidated High, etc. could be selected so that both towns would feel that they hadn't been forgotten and that they both had equal rights and representation in the matter. This would assuage the feelings of both towns and alumni associations I feel, and both groups would work in harmony for the welfare of the school. However, someone has to take the initiative and just who is that going to be? I would suggest the general populace give some deep thought to this important matter before it is too late.

## SHRIMP FEED SUNDAY

A shrimp and chicken feed, sponsored by the Holy Name Society, will be held this Sunday afternoon at Kump's Dam Park, President Bernard Welty has announced. The affair will be staged and servings will start at 2 p. m. and continue until 6 o'clock. The tickets, selling for \$3.50 each, will be on sale at the gate and the public is invited.

## BETROTHED

Mr. and Mrs. Martin J. Kaas Jr., Thurmont R2, announce the engagement of their daughter, Virginia Ellen, to Edward Francis Althoff, son of Mr. and Mrs. Frank J. Althoff, Emmitsburg R1. Miss Kaas is a graduate of Thurmont High School, class of 1960.

Mr. Althoff is employed at St. Joseph's Central House, Emmitsburg. No date has been set for the wedding.

## Group Opposes Expenditure For New School

Editor, Emmitsburg Chronicle:

A recent article released to the newspapers by the School Board warns the taxpayers of Frederick that another High School building is needed in Thurmont, because the Thurmont High School which is now filled to capacity, will be overflowing when the children from Emmitsburg District are transferred, consequently, the School Board has voted to build a new school. While the cost has not yet been established, previous estimates by the School Board place the new structure at \$1,200,000.00.

This new structure in Thurmont is a part of the "immediate and long range school building program" set up by the School Board covering the period from 1955 to 1965 during which time they plan to spend \$13,000,000 more in addition to what has already been spent for school construction. This expenditure will increase the total bonded indebtedness of Frederick County to approximately \$25,000,000 and increase taxes about 30%.

Fact Finders, Inc., a new organization in Frederick County whose objective it is to acquaint the voting public with the operation of our local government, feels obligated to report that this expenditure would be ill-advised and improper at this time because other investments of the same nature have failed to produce the result desired — better education. We point with dismay to the \$12,386,862.00 indebtedness existing now in Frederick County because of expenditures on monumental school structures. Some of this could easily have been avoided. We point to unnecessary expenditures for architects, lavish landscaping, consolidation of schools and the monumental growth of the administrative office and supervisory force.

It is perfectly obvious to many taxpayers that the School Board has entirely lost its objective. The time is here when the primary function of the School Board should be re-established and attention focused on teaching children. Fact Finders, Inc. submits to the voters of Frederick County that the need here is not for school buildings, rather we need an administration which will provide Frederick County with a sound educational program. We should insist that our teachers be restored to a position of admiration and respect. After this has been accomplished, Frederick County can still buy athletic and shop equipment, office cars, fancy buildings and new desks for the office, things would again be listed in their proper order. At the present time, we have the cart before the horse.

Voters and taxpayers who share these thoughts and wish to put them into action, should:

1. Write a letter to the editor of their local newspaper who would be glad to publish it for others to see.
2. Call or write the County Commissioners. Insist that they tie a knot in the County purse string.
3. Call the School Board.
4. Let the candidates for public office know your thoughts.

## Sportsmen's Carnival July 21, 22, 23

The fourth annual carnival sponsored by the Indian Lookout Conservator Club will be held on Firemen's Field for three big days, President James Kemp announced this week.

The three days selected are Thursday, Friday and Saturday, July 21-23 inclusive. A fine program of entertainment has been scheduled and the patrons will find no trouble at all finding an amusement or entertainment to fill their needs. Rides for the children have been booked and in addition there will be pony rides. For the adults there'll be bingo, various other games, music and good food.

On display on the grounds will be an interesting wild game display under the auspices of the Maryland Fish and Inland Game Commission. Each night of the affair there will be valuable drawings and awards and on Saturday night there will be five big drawings. This year's affair will be an abbreviated one, reducing the program from six nights to three but the club feels that with the excellent programming scheduled there will be ample time to fill the public's quest for entertainment.

The proceeds from the affair will go towards improving the club's recently purchased tract of land near town and also to reduce the mortgage existing from the purchase. The general public is cordially welcome to attend the carnival.

## JAYCEES PLAN NUMBER OF PROJECTS

The Greater Emmitsburg Junior Chamber of Commerce went on record Wednesday evening at its regular monthly meeting as favoring an expanding curriculum and the addition of more teachers, plus other improvements at the local Public High School. If this is not possible or practical then a consolidated school located at a satisfactory point between Emmitsburg and Thurmont would be acceptable.

President Donald Eyerler presided at the meeting at which the following resolution was adopted: The Emmitsburg Junior Chamber of Commerce goes on record as favoring an improvement in the facilities, along with adequate curriculum expansion at the present Emmitsburg High School. If this is not feasible or possible then consent would be given to the erection of a consolidated plant at a point about midway between the communities of Thurmont and Emmitsburg.

During the meeting the Chapter approved the following projects presented by the various project committee chairmen: A chicken barbecue to be held in early August on a Sunday afternoon; a car wash to be held on Saturday, July 30, the charge being \$1; a minstrel show some time in the fall.

State Director George L. Danner reported the Maryland Association will hold its planning session next Friday evening in Annapolis and on Saturday the regular state meeting will be held at which time the plans for the balance of this year will be voted on. All officers were urged to attend this meeting tonight. Local officers planning on attending this session of the state group are President Donald Eyerler, Geo. L. Danner and Joseph Elliott. Members are also invited to attend.

The group decided that beginning with August the meetings will be held in the Fire Hall. The general meeting on the second Wednesday of each month will start at 8:30 p. m., and the Board of Directors' meetings will be held on the fourth Thursday of the month at 7 p. m.

## County Will Get New Radio Station

The Federal Communications Commission has granted Muscula Heights, Inc. a license for a new radio station in Frederick County. Until last week, WFMD was the lone radio outlet in Frederick.

Call letters haven't yet been assigned the embryonic project, which intends to break ground near Frederick immediately. The transmission is at 500 watts and the frequency located on the waveband at 1370 kilocycles.

## C. B. Shaughnessy, Mt. St. Mary's Faculty, Expires

Funeral services were held Monday morning at 11 a. m. at The Sacred Heart Church in Chestertown, Md., for Charles B. Shaughnessy, 63, well-known language professor of Mount St. Mary's College. Mr. Shaughnessy had been ill for about a year and was hospitalized the past two weeks. He died Friday in the Kent and Queen Anne Hospital in Chestertown where he was spending the summer months. Rt. Rev. Msgr. John L. Sheridan, president of the college, officiated at the requiem Mass.

The deceased was chairman of the Department of Modern Languages at Mt. St. Mary's, and husband of Mrs. Adelaide Kratzer Shaughnessy of Kent County, Md. He had been ill for the last year, although he had continued his teaching at the college.

A native of Springfield, Mass., he was graduated from Brown University, Providence, R. I., with a B.A. degree in 1919. He received his M.A. from Columbia U. in 1930 and attended graduate classes at many schools throughout the United States and Canada including Middlebury College, Brown University, Columbia Harvard, Dalhousie and the Sorbonne in Paris.

He taught modern languages at Washington College, Chestertown, from 1920-24. He began his 35-year teaching career at Mount St. Mary's in 1925. Dubbed "CBS" by his students, he had become a legend among Mountaineer undergraduates. He was an expert antique enthusiast and authority on rare antique children's books of which he had an extensive and unusual collection.

He was also an avid gardener and his home opposite the college on Rt. 15 is a showplace.

He was a member of the American Association of Teachers of Spanish and the Modern Language Association. Interment was in Sacred Heart Cemetery, Chestertown. The pallbearers were Dr. John W. Richards, Prof. Richard J. McCullough, James J. Phelan, Guy A. Baker Jr., and John J. Dillon, members of the Mt. St. Mary's faculty, and Alex A. Koswick.

## Funds For School Site Purchase Are Denied

The Board of County Commissioners stated Wednesday they "do not concur" with a proposal made by the Board of Education for the purchase of a school site at Thurmont.

The Commissioners acted Wednesday after receiving a letter from Dr. James A. Sensenbaur, Superintendent of Frederick County Schools, asking their opinion on the purchasing of a 35 acre site at Thurmont to be used for building a school at a future date. Dated July 7, the letter stated that the property at Thurmont is presently owned by John C. Royer and Albert L. Staub and is in the vicinity of Royer's Restaurant.

The letter stated that the site is sewerable and can be reached by water from the Thurmont facilities.

The Board of Education is not interested in constructing a building in the immediate future at the site, the letter indicated, but "feels it is desirable to buy the site now that it is available."

There are sufficient funds in an interest account to cover the cost of the property which is reported as \$30,000, the letter continues. The Commissioners did not elaborate on their decision.

Mrs. Marie Hubbard and children, Charles, Suzanne, Roland and Patricia, Mrs. Marie Gellwicks and Mrs. Ethel Jones, vacationed several days last week at Ocean City, Md.

## Reader Discusses School Situation

Editor, Emmitsburg Chronicle:

I am impressed by the fact that among the people whose names have appeared these last few weeks spearheading "total opposition to any consolidation," not one has a child in the Emmitsburg Public School. Perhaps they can afford not to be concerned with the real issue at stake—a better education program for our public school students of Emmitsburg.

Last year there were 85 students in the Emmitsburg Senior High School, each with varied interests and abilities. The Board of Education apparently feels it can better serve the needs of our senior high school students, the needs of our community and the taxpayers of Frederick County with a consolidated senior high school for this area. This would also result in advantages and improvements for our remaining elementary and junior high school. Improved conditions, facilities, and opportunities for the education of our children hardly seems a step in the wrong direction.

Actually the articles which have appeared in the paper have left me a little confused as to whether the group is fighting the amount of real estate tax for education or senior high school consolidation. One article said "should consolidation become effective a hike in Frederick County real estate taxes was inescapable."

In these articles which have been so strongly "totally opposed to any consolidation" and which state that steps are being taken to block any consolidation move, there appeared one reference which caught my attention — "many citizens from both Emmitsburg and Thurmont would rather see a new school erected about half way between here and Thurmont." Could we have some discussion on a suitable and acceptable site for a new school instead of just "total opposition?"

Signed—A hopeful, interested parent and resident of Emmitsburg.

## NIKIRK MUST FILE ANSWER

Three judges have refused dismissal by demurrer of disbarment proceedings against former State's Attorney Edwin F. Nikirk and have ordered an answer from him concerning the charges recently brought by the Frederick County Bar Association.

The three judges from Montgomery County sat in Circuit Court in Frederick on June 30 and heard arguments for and against the dismissal.

In an order received Thursday by the Circuit Court, Nikirk is ordered to file an answer on the charges by July 20. Signing the order are Judges Thomas M. Anderson, Kathryn J. Lawlor and James H. Pugh sitting as judges of the Circuit Court for Frederick County.

They say in the order: "It is the Court's opinion that the petition of the Bar Association of Frederick County (a petition for disbarment of Nikirk) against Edwin F. Nikirk presents a cause of action against" him.

The Court said it has given "careful consideration" to the arguments and authorities presented by counsel for both Nikirk and the Bar Association.

The Bar Association moved for disbarment proceedings against Nikirk after he had pleaded nolo contendere to an income tax charge and was sentenced in a federal court in Baltimore on his plea. Nikirk served four months of a year's sentence in a federal prison in addition to being fined \$7,500.

Former Judge Cornelius P. Mundy of Baltimore, Benjamin B. Rosenstock and Wm. M. Storm, Frederick attorneys served as counsel for Nikirk in the demurrer hearing.

They contended that a "nolo contendere" or no contest plea did not prove guilt of a person, and that under the Maryland law it is necessary to prove guilt of an alleged wrong for a disbarment proceeding.

It was also pointed out the Bar Association would have to prove guilt in the tax evasion case through its own efforts since the local Bar would not be given tax investigation records by the Federal officials. It was also stressed that nolo contendere plea leaves no presumption of guilt in a subsequent action.

Charles U. Price, Robert E. Clapp Jr. and James McSherry representing the Bar Association in the demurrer arguments claiming that a conviction on a plea of nolo contendere is sufficient evidence to raise a presumption of guilt.

## ENGAGED

Mr. and Mrs. R. Shaffer Bailey of Thurmont, announce the engagement of their daughter, Catherine Roddy, to Michael Anthony Topper, son of Mr. and Mrs. Frank S. Topper, Emmitsburg. Miss Bailey will enter her senior year at St. Joseph College, Emmitsburg in September. Mr. Topper is a student at Mount St. Mary's College, Emmitsburg.

## Local Man Injured In Vehicular Mishap

An Emmitsburg area man, Martin Stouter, 49, was painfully injured last Friday afternoon at about 12:45 o'clock when the road roller he was operating was struck by a passenger car on Route 97. Stouter was thrown from the vehicle and hurled some distance away landing prostrate on the highway. So terrific was the impact that it turned the roller completely around in the opposite direction and demolished it.

Police Chief W. E. Law who investigated the accident just east of Flat Run Bridge in the Emmitt Gardens area, said Stouter was headed east as was the vehicle which was traveling at a high rate of speed and operated by William Conrad Renner, 45, of Baltimore.

Renner was uninjured but a passenger in his car, Mrs. Hazel Carmichael, 37, of 101 Fourth avenue, Landsdown, was treated at the Gettysburg hospital for cuts of the face and knee and numerous contusions and bruises. Stouter was hospitalized for two days.

Law said both the 4-ton roller and car were demolished.

Carole Wensehof, 17, Fairfield R1, was admitted to the hospital with lacerations of the nose, upper lip, right forearm and left knee as a result of an accident just west of Emmitsburg on the Waynesboro Rd. at 4:45 o'clock Friday afternoon.

Homer Anusmus, 35, Temperance, Mich., also injured in the head-on collision between two cars, was treated at the hospital for a severe ragged laceration of the lower lip, a broken upper front tooth, and multiple cuts and contusions of all extremities.

## Local Grange Favors "Midway" School

The Emmitsburg Grange met at the cottage of Norman Shriver with Master Bernard Welty presiding. There were 30 members and their families present for the annual weiner roast.

A letter was read extending an invitation to the members to visit the industries in Frederick in late October.

Community Service Contest entries were ordered sent to the Deputy.

Mrs. Clara Harner thanked the members who helped clean up the debris at her farm which was caused by the recent storm.

It was announced that the 3rd quarterly meeting of Frederick County Pomona Grange will be held the last Saturday of July at Ligonore Grange in Unionville.

Also announced was that the baking contest will be run off on the first Saturday in August. There will be a bake sale in conjunction with the contest at the Fire Hall, Mrs. Pauline Watkins reported.

The Grange went on record as opposing the moving of the senior department of the high school to Thurmont, but would consider a point for the location of the new school midway between Thurmont and Emmitsburg.

The next regular meeting will be held at the home of Mr. and Mrs. Wilfred Watkins on Aug. 17, beginning at 7:00 p. m. It will be a covered dish supper.

The only things worth saying are those all men know, but which they have forgotten.

## Lutheran Church Picnic-Supper Saturday

Final preparations for the annual Festival and Ham Supper sponsored by the Lutheran Church have been made and the affair will get under way Saturday afternoon.

The feature of the affair of course will be the serving of the delicious supper. Supper will commence at 4 o'clock and continue until all are served.

The affair, which annually draws hundreds to the church grounds will have the gala air of an old time country festival. On sale will be a host of home-baked products and the local public's favorite country store will be available to those wanting to purchase various items. Music will be furnished by the Church Band during the evening. Rain or shine, Pastor Philip Bower says the affair will be held, retreating, if necessary, into the parish hall. Suppers will sell at \$1.25 and the general public is invited to the event.

## LIONS CLUB PLANS BROOM SALE

President Ralph F. Ireland presided at the regular meeting of the Emmitsburg Lions Club held Monday night in the Lutheran Parish Hall, 20 members in attendance.

During the meeting a broom sale was discussed and it was decided to hold a sale sometime in the near future. The brooms will be ordered from a Taneytown manufacturer and the proceeds from the sale will be used for the club's community work fund.

The date for the annual picnic was set for sometime in August. William G. Morgan gave a progress report on the Horse Show which will be held Sept. 18. Mr. Morgan thanked the advertising committee for its excellent work to date stating that better than half the advertising for the catalog had been sold. Plans were made to ready the grounds for the show. Permanent seats will be placed on the grandstand and other property painted in the near future. Dr. D. L. Beagle, chairman of the old eyeglasses drive, announced the drive was completed but that if any citizens had any old glasses about their homes they would still be accepted provided they were deposited at the receptacle located in The Farmers State Bank. The glasses will be shipped to Lions International in the near future for world-wide distribution to indigent families and individuals. Discussed also was a sale of used clothing for migrant workers. Vice President William Morgan, a member of the Employment Security Office in Frederick reported there were hundreds of migrants in the county at this time of the year and were in need of used clothing. The club decided to under take the project in the near future.

Firemen Give Correct Method Of Reporting Fires

In an effort to avert future confusion when calling in fires in this area, the Vigilant Hose Company this week listed the following procedure when reporting all fires. The information gives four important steps to be taken when reporting a fire. In order these steps should be observed:

1. Know the phone number—Hillcrest 7-4141.
2. State name and COMPLETE address.
3. Say what is on fire.
4. Stay on the phone until you are sure all the facts are received correct.

You cannot forget or let out one of these steps. An example of reporting a fire is:

Dial 7-4141—"Hello, I want to report a car on the Taneytown road just east of the John Doe farm. I am John Doe and will meet you at the car"—then keep on the phone until the person answering it tells you to hang up.

If you leave the phone before all the questions are answered, it will cause needless delay in the arrival of the Fire Co. If you are new to this area—ask who your neighbors are and the name of the former owner of your property, this will help in locating you quickly.

Remember—The fire company can only act quickly when the facts and location are known. Help us serve you better by knowing how to properly report a fire.

# THIS 'N THAT

GEORGE W. WIREMAN

Editor's Note: This is the first in a series of articles on Civil Defense and the important part it plays in our every-day life. Civil Defense is of great importance today and as world conditions grow worse with each passing day there is a great need for the public to be educated to the facts regarding Civil Defense. Civil Defense Today

Bolstered by Nikita S. Khrushchev's warning that Soviet rockets could strike the United States if Cuba were attacked, Prime Minister Fidel Castro last week summoned his followers to new and greater demonstrations against American "aggression."

President Eisenhower fired back an abrupt warning to Khrushchev to keep his hands off Cuba and told him the United States would not stand for a Cuban regime dominated by international communism.

Now, more than ever before, in the face of these warnings, there is a greater need for civil defense. American citizens must be prepared for any danger that may result. There are so many citizens today that think and say: "Russia wouldn't dare attack the United States. She is afraid of our strength and position in the world." I only wish that I could sincerely believe this, but I can not. I live from day to day knowing it can happen and the mere thought of it drives me to the belief that those citizens who take for granted our civil defense program and its work, are citizens who have little or no respect for their country or their fellow

American citizens. Newspapers, radio and TV have all pledged to support civil defense, but yet the public is hearing very little about it. Why? Well, when material is submitted for publication or for broadcasting, those in charge of these informative sources are a bit slow in their cooperation. I know of several cases where material on civil defense was submitted to newspapers but it was never published. One newspaper editor went so far as to state that he would "publish the material when space was available." To this editor I say, "That time may never come and if and when he finds the time, and the space in his publication, it may be too late. Now is the time to educate the citizens on civil defense and not wait until after the attack has become a reality. It will be too late then."

President Eisenhower once said, "Informed citizens are the guardian and spirit of democracy." And so I take this opportunity to inform the readers of this publication on the facts of civil defense.

Perhaps the most educated man in this area on civil defense is J. Franklin Fox of Rocky Ridge, Maryland, who is Frederick County Regional Officer of Maryland's Civil Defense. Just recently I read an article written by Mr. Fox on Civil Defense work and with his permission, I plan to devote the next few weeks to the facts and figures as compiled by him and sincerely hope that the readers of this column will un-

derstand a little bit better the civil defense program and the work it has accomplished thus far and the work that remains to be done.

"I wish to relate some of the statistics of civil defense structure relative to our state of readiness. I hope that when talking about civil defense we are talking about a program which is a deterrent to war and therefore a force for peace, all of us have the greatest desire for peace and it is my judgment that home preparedness is one of the steps that will prevent war in the world."

"An unprepared home front is an inviting target for an enemy and weakens our diplomats at the bargaining tables of international negotiations. Not only in Government, but in industry and business as well, civil defense is being pursued. We are happy to hear about these concerns which are interested in the welfare of our nation. As examples we can cite Public Utilities and banking, food and transportation industries, and this is as it should be, business and government working together."

"I will confine my remarks to our present non-military defense readiness from a national standpoint, the basis for improving this readiness and what we are doing to improve it. You are all

familiar with the threat we face, so I won't go into that. You know, and I know that a nuclear assault today against the 50 most important metropolitan areas of the United States, and that includes Baltimore and Washington, would bring 55 per cent of our population and 75 per cent of our industry under direct attack. What are we doing about it on the national level? Should an attack occur today, our operations plan, facilities and personnel are closely tied into the distant early warning system, and Conelrad would be used as one means to alert the public and to broadcast instructions. Today there are 45 Federal agencies prepared to move to 92 locations sites near Washington as soon as a warning is received. These same agencies also have selected 315 relocation sites in the field for their staffs . . . all outside primary target areas and many of these are in Maryland."

"Our national staff operations are dispersed to facilities in Battle Creek. A sub-basement provides some fall-out shelter protection and we are improving this. Eventually we hope to have all Regional Headquarters to secure sites underground. Congress last year appropriated funds to build the first one at Denton, Texas for Region 5. Each regional headquarters has plans to

expand in an emergency . . . drawing heavily from the regional offices of other Federal agencies, such as Military Units, Industry, Colleges and Universities and other private groups. We have an active executive reserve and staff reserve. Our capability for detection and measurement of radiation is substantial."

"Today, more than 720,000 radiological instruments are in the hands of state and local government agencies and schools. We have an additional 80,000 instruments in reserve. Some 80,000 persons have been trained to measure radiation and in reporting procedures. Some 7,000 qualified instructors are busy teaching additional thousands, daily. Over 7,000 high school science departments are now using radiological defense kits which are distributed by O.C.D.M. and an additional 8,000 kits are currently being distributed to other high schools, Colleges and universities for use in their science courses. Municipal and State Police, Fire and Health departments have developed radiological defense monitoring capability, as well as many other agencies of local, and state governments, and the field establishments of Federal agencies."

"The O.D.M. National staff colleges; the instructor training centers at Manhattan Beach in New York and at Alameda, Cali-

fornia and the fifty-three or more state and local training facilities throughout the country must be considered as a part of our readiness situation because, every day these institutions are adding to the number of persons with the skill and knowledge essential to management of war-caused or natural disasters."

The facts and figures as presented above by Mr. Fox will serve as a means of informing us that this thing called "civil defense" is by no means child's play. It might be well to state here that all these instruments and training in civil defense is useless unless the general public is willing to face the facts that, should war come, it will be a war for survival, and we in the United States will feel its effects far greater than we did during World War II. How well we meet these effects depends upon each individual and the interest he takes in civil defense.

Next week I shall cover some facts on stockpiling as related to civil defense and the important part it plays in our present state of readiness. I should also like to take this opportunity to thank Mr. Fox for the material which he has submitted for this series of articles. Without his cooperation and his interest in civil defense this series would have been impossible. Join me next week by means of this column and learn more of the work that is going on in civil defense. Why, you might ask? Well, it's being done in the interest, safety and welfare of every American citizen, and that includes YOU.

## OFF AND RUNNING by John I. Day

### ... Gone With the Wind

A racing mystery that Spencer J. Drayton's Thoroughbred Racing Protective Bureau need not concern itself with is why, each year, nearly one million dollars goes unclaimed at the pari-mutuel windows.

In New York this spring \$191,781.35 was turned over to the state treasury because tickets worth this amount were never presented. In New Jersey each season the windfall amounts to about \$100,000, and in California the state's yearly harvest averages nearly \$200,000. For 15 years, in New York, about 40% of every \$1,000 wagered remains unclaimed, a ratio which puts the national figure over \$900,000.

Apparently many of racing's \$3,000,000 fans are unaware that if they bet a horse to place (run second) or to show (run third) and he wins, their ticket is good. Similarly, if

bet to show and he runs second the show ticket is cashable. Destruction of tickets before a race is declared official accounts for another portion of the unclaimed fortune. Some, taking a hasty look at the odds board, confuse the horse's number with the figure designating his odds and buy the wrong ticket. The number they received by mistake may prove to be the winner but the player, knowing his own horse lost, unwittingly throws away the cashable ticket. This unclaimed money eventually augments the \$186,000,000 which 24 racing states annually collect from Thoroughbred racing.

\$1,000,000 IN UNCLAIMED TICKETS!

Fitez, President of the Homemakers' Club, is in charge of local arrangements for volunteers to assist with registrations. On Wednesday, July 20, the Unit will be stationed at the H. O. Toot Shoe Company from 9:30 to 12:00 and at the Emmitsburg Manufacturing Company from 1 to 2 p. m.

**FAMOUS AMERICAN TAVERNS**

The Pirates' House in Savannah, Georgia

Where Captain Flint's Ghost Still Walks

The oldest house in the State of Georgia serves today as the entrance to one of the South's most colorful taverns, once a favorite rendezvous for pirates from the seven seas. Earlier still the building's history was linked intimately with the founding of the colony by General James Edward Oglethorpe and his pioneer band, who first landed at what was to become the city of Savannah in February, 1733.

Certainly General Oglethorpe did not have it in his mind to attract buccaneers to a Pirates' House when he caused to be erected a small garden house on the land of the "Trustees Garden," the first agricultural experimental plot in America where were developed the cotton and the peach trees that made Georgia famous before "Gone With the Wind." Oglethorpe did not foresee that Savannah would rapidly become a thriving seaport, that an inn for seamen would be erected adjoining the garden house and that pirates would flock to the tavern from all parts of the Spanish Main—with shanghai gangs following closely on their heels.

The taproom of the Pirates' House is on the ground floor where once seamen gathered to swap their tales, drink their ales and sing their sea chanteys. In a chamber nearby,

known as the Captain's Room, short-handed ships' masters negotiated to impress unwary sailors into their crews. Stories persist of a tunnel, extending from the old beer cellar beneath this room, through which men were carried somewhat unconscious to ships waiting in the harbor.

Today, travelers, responding to the ancient lure of "15 men on a dead man's chest," through the Pirates' House. The tavern itself is fashioned of stout hand-hewn ceiling beams joined with wooden pegs, and the stairways which lead to the sleeping quarters above are steep enough to make the timid dizzy.

One of the charming legends of the old tavern is that Captain Flint of Stevenson's "Treasure Island" died in an upstairs room with his first mate, Billy Bones, at his side. On moonless nights it is said that Flint's ghost still walks

their employees to have a Chest X-ray. Individuals may avail themselves of the X-ray service at the location most convenient to them.

Many residents of this area are inquiring about "freezing" their social security benefits because their earnings have either stopped or are a lot less than they were in years past, Mr. W. S. King, District Manager of the Hagerstown Social Security district office stated today.

Some people have the idea that they can "freeze" their earnings record simply because they are no longer working or their earnings have dropped, he said. This is not true.

The only individuals who can "freeze" their earnings records are those persons who have passed retirement age and those who have stopped work due to a severe disability. The disability must be so severe that it keeps the individual from doing any substantial gainful work. These persons also must have been completely disabled for a period of six months and must have worked in a job covered by social security for a period of five out of the ten years just before the disability began. Most of the disabled persons that "freeze" their earnings records are those under age 50. Cash payments start at age 50 for the older disabled person.

Remember that unless you have reached retirement age or are totally disabled and meet the disability requirements you cannot "freeze" your earnings record, Mr. King pointed out. He urged that persons who have questions about their social security status should write, phone or visit the local office at 59 North Cannon Avenue in Hagerstown. The phone number is REgent 9-3232.

The survey is a community health service conducted as a joint project of the Frederick County Health Department and the Frederick County Tuberculosis and Public Health Association. Medical aspects and general supervision of the program are under the direction of Dr. Forbes H. Burgess, Frederick County Health Officer. The TB Association is in charge of schedules, volunteers and statistical data. The survey is one phase of the program for the detection of tuberculosis, said Dr. Burgess.

Last year thirty-four new cases of active tuberculosis were reported in Frederick County and several hundred non-active cases are being followed in the Chest Clinics of the Health Department. However, it is not this known group that is giving us most concern, said Dr. Burgess; it is the "pockets of infection" that we are unable to locate which are giving cause for alarm.

If all people with active tuberculosis could be found and treated before they had a chance to spread their infection, the disease could be eradicated. But problems of detection are becoming more complex and varied year by year rather than less so, stated Dr. Burgess.

With approximately every 4th person in our population carrying TB germs, one never know when or where the hidden enemy may strike, continued Dr. Burgess. New cases of TB now come primarily from old infections that have been dormant in the individual for varying periods of time until conditions are right for development of active disease.

The public has become overly optimistic, misled by the decrease in the number of deaths and particularly by much publicized closing of outmoded hospitals. Many people are not even vaguely aware of the continuing dangers of tuberculosis in their communities, stated the Health Officer.

All employers are doing a worthwhile service in community health when they arrange for

**SPORT FLASHES**

From the Maryland Game and Inland Fish Commission

Maryland and U.S. Fish Kill Survey

The U. S. Public Health Service has begun a nationwide survey of pollution-caused fish kills. They have requested the cooperation of the Maryland Board of Natural Resources and will receive help in reporting the frequency and areas of pollution.

The public is urged to report mass fish deaths in non-tidal waters to officers of the Department of Game and Inland Fish and in tidal waters to the Department of Tidewater Fisheries.

This is the first effort at tabulating such reports on a state and national scale and it will be an effective means of obtaining the information needed to determine just how pollution affects our national water resources. When the study is completed the Public Health Service will send reports to the cooperating agencies, organizations and individuals who request them.

New Small Boat Daytime Distress Signal Is Announced

The Coast Guard has announced the approval of a new small boat distress signal for daytime use according to the Maryland Game & Inland Fish Commission. The signal is made by slowly and repeatedly raising and lowering the arms outstretched to each side. Use of a conspicuous object held in each hand while making the signal is optional.

Montgomery County Ikes Promote Access Areas

In cooperation with the Game and Inland Fish Commission and Montgomery County officials, the Izaak Walton League Chapters have completed and improved 2 access areas to the Potomac River, according to a Commission spokesman. The Edwards Ferry area near Poolesville, has a boat loading ramp with Keep Maryland Beautiful trash barrels. The other, Sycamore Landing near Seneca has only trash barrels.

The Commission urges conservation and sportsmen groups to assist in promoting public access to hunting and fishing areas.

Allegany County Boasts Large Food Patch Acreage

Mr. Howard L. Roberts, Refuge Caretaker of the Game Management Division, in Allegany County, reports large food patches have been established in the past few months primarily for forest game, which includes deer, wild turkey, grouse, rabbits and squirrels.

Food plantings established and maintained on powerlines and telephone line rights-of-way are 100 feet and 60 feet respectively. On State Forest land there are 52 food patches totaling 29 acres. Food patches established on Game Commission owned land total 31 in number with 92 acres. There are a total of 74 acres of food patches established on 26 privately-owned farms in the county. 235 acres is the total food plant-

ings in the County. Mr. Roberts reports seeing plenty of deer in the past few weeks, and in one herd, seven bucks were observed, six of which had large antlers.

**IMPROVE YOUR FISHERMAN'S LUCK**

**KNOTTY PROBLEMS**

FISHING is an art, but tying knots can be a science. Laboratory researchers have come up with this welcome intelligence. Virtually 100 per cent of the strength in a line or leader can be retained in any good fisherman's knot (the clinch, blood, end loop, etc.) if five complete turns are taken around the standing part of the line.

The Du Pont Company has found that knot strength in any monofilament falls off sharply as the number of turns decreases. Four turns drop the strength of a 10-pound monofilament down to about 3.5 pounds; three turns, 7.5 pounds; two turns, six pounds.

**CCC Storage Loan Available To Farmers**

The Commodity Credit Corporation storage facility loan is available again this year for farmers who need additional storage capacity on their farms, according to William L. Dudley, Chairman of the Maryland Agricultural Stabilization and Conservation Committee.

The loans are available to provide new farm storage facilities for most storable crops. County ASC committees are authorized to approve applications for loans up to 80 per cent of the cost of storage structures. The loans are payable in four annual installments beginning one year after the loan is made. The rate of interest is four per cent. Applications may be filed at the county ASC office.

Since the inauguration of the storage facility loan in 1949 more than 126,000 loans had been made to farmers as of April 30, 1960. The loans helped finance storage structures with an aggregate capacity of about 498.5 million bushels.

Holders of Series E bonds who wish now to receive regular income may exchange their E for Series H bonds. These yield 3 3/4% when held ten years to maturity. Income tax on interest earned on E bonds thus exchanged may be deferred until the H bonds are cashed. See your banker.

# EFFICIENT FEEDING AND LIVESTOCK MANAGEMENT

By Gustav Bohstedt  
Emeritus Professor of Animal Husbandry  
University of Wisconsin

## Sudan Grass and Sorghum Poisoning Easy to Avoid

Sudan grass and sweet sorghum are excellent forages and highly palatable too. At times, however, they have given trouble from prussic acid poisoning. The danger of poisoning the livestock may be easily avoided.

The University of Wisconsin dairy herd has been on Sudan grass pasture during some 30 different pasture seasons without a single death from poisoning. Management of the herd and crop may give a clue to this record of immunity.

Dr. Bohstedt

Cattle are never turned into Sudan pasture until the grass is at least "belly high" to a cow, therefore at least a foot tall.

Furthermore, the cattle are never ravenously hungry when first exposed to this kind of pasture, whether at the beginning of the season or at the beginning of the day. Before the cows are turned out in the morning they have had at least a little barn feed of one sort or another.

The necessity of these precautions is seen in a prussic acid poisoning report from southern Wisconsin. During a very dry midsummer a herd of hungry cows on a parched bluegrass pasture broke through a line fence into a neighbor's field of somewhat stunted but deep green Sudan grass. . . 17 of the cows died in less than an hour.

It is the early growth, especially stunted growth, of Sudan grass and sorghum, that is dangerous. Some reports indicate a frosted crop of either kind is equally dangerous, but I have personally fed as much as 80 pounds of frozen sweet sorghum daily per head to cows, day after day, and they never exhibited any symptoms other than wanting more of it.

The fear of frozen sorghum may have originated from experiences in the fall of the year when after a killing frost, succeeded by pleasant weather, the roots send up new sprouts alongside the mature but killed stalks.

We found five-inch sprouts simply loaded with prussic acid, which is hydrocyanic acid. Cattle or sheep pasturing on them would almost surely die. By knowing the peculiarities of the two forage crops, poisoning and livestock losses need not occur.

Question: In my boyhood during hot summer days in the harvest fields we frequently drank lukewarm coffee instead of a lot of water to avoid the rather common dizzy and weak feeling. Could it be that coffee was a substitute for the additional salt now recommended by safety people for farmers and others working in extreme heat?

Answer: Coffee seems to cut down on water intake. The more water one drinks the more one is likely to perspire, and perspiration takes a lot of salt out of the body. Coffee drinking as you practiced it may well have helped stave off heat sickness, but modern recommendations include being sure of adequate salt intake and drinking water frequently through the day.

## Looking Ahead

...by Dr. George S. Benson  
DIRECTOR - NATIONAL EDUCATION PROGRAM  
Searcy, Arkansas

### Federal "Aid"?

The forces demanding Federal "Aid" to education have been more active this year than ever before. A toe-in-the-door was achieved when Congress, under heavy pressure from a small organized group, passed the school construction aid bill two years ago, and soon thereafter the legislation extending Federal aid to college students through a Federal lending agency. Now a considerable force within the educational establishment of the nation seeks Federal money to pay teachers' salaries.

The gradual federalizing of educational financing is a dangerous business. No person can successfully disprove the fact that some degree of power-to-control goes with Federal "Aid" payments. This is entirely proper. The only real question is whether we want the Federal

al government to gradually take over the operation of our schools and ultimately dictate what is to be taught and by whom.

An Educator Speaks  
At a recent Freedom Forum conducted by the National Education Program approximately 30 educators were conferees, representing school systems and colleges in twelve states. A few of them felt that Federal "Aid" to education is desirable. Most of them didn't. One of these, Marvin E. Amerson, a high school principal from a Texas city, asked to be heard. He came forward to the lectern and said:

"I wish to make the following statement on the advantages of Federal Aid to Schools: '1. It will eliminate money shortages - Federal money comes from an inexhaustible source.

"2. It will eventually eliminate the need for irksome local taxes—all taxing power should be in the hands of experienced experts.

"3. It will eventually eliminate the need for local tax elections - asking the people for more money is outmoded too slow, cumbersome, risky, and no longer necessary.

Bureau Operation  
"4. It will take the schools out of politics—this will allow schools to be operated on a sound, sensible basis as other government affairs are operated.

"5. It will eventually put the schools into the hands of a bureau of experts—then everybody will learn his lesson well—well?

"6. It will soon eliminate all the confusion as to what we want and need in our schools.

"7. Under Federal management surplus children can be stored or shipped overseas as Foreign Aid.

"8. Under this system teachers' salaries can be doubled and superintendents' can be tripled. Never A Shortage

"9. It will put spending into the hands of experienced experts who really know how.

"10. Schools cannot be financed locally.

"11. Only the Federal government can do unlimited deficit spending; it can print more money as needed, therefore, there is never a shortage.

"12. Finally, it's free! It won't cost us anything!"  
Of course Mr. Amerson gave the above "advantages" in all good humor, and his remarks were well received. But everybody present knew that some of these "advantages" are actually being put forward by people advocating the financing and control of all education by the Federal government.

Instead of the trend being toward further centralization of economic and political power, it should be in the other direction, toward local management and financing. Through centralization of power we will lose our individual freedom. That's why our Founding Fathers so widely dispersed the powers in the functioning of our American way of life.

## OUR STATE UNIVERSITY

A three-year study of small business in the general area of electronics, and related research and development industries in the State of Maryland and the Washington Metropolitan area will be made by the University of Maryland department of economics.

According to the project director, Dr. Spencer Smith, specific objectives of the research, which will be financed by a \$40,000 grant from the U. S. Small Business Association, will be to determine: small business potential, deterrents to small business that are prevalent in many industries as to their application in the case of small business development in the electronics and related fields, and whether small business can contribute to innovations for industrial growth.

"The most important factor in this work will be the publication and dissemination of information on this subject of small business potential which would provide information for investors, and stimulate economic growth and public welfare," Dr. Smith said.

Dr. Smith pointed out that he had received a great deal of cooperation from a number of small business concerns already and that it was imperative to the success of the study that business concerns surveyed cooperate to the best of their ability.

"This cooperation is tantamount to the success of the project," he declared.

The study will get underway immediately.

THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE

Read Matthew 18:21-27. All the law is fulfilled in one word, even in this; Thou shalt love thy neighbor as thyself. But if ye bite and devour one another, take heed that ye be not consumed one of another. (Galatians 5:14, 15.)

During the American Civil War, when hatred between the North and South was bitterest, a White House reception was given. One of the guests overheard Abraham Lincoln as he made a kindly remark about the South. She immediately assailed him saying: "Why, Mr. Lincoln, how can you say kind things about your enemies? You should want to destroy them." Lincoln looked at her and said slowly, "Madame, do I not destroy my enemies when

I make them my friends?" This is the Christian way: get rid of the hatred. The result is that your enemies are gone also. Jesus was saying exactly this when He said, "Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you, and persecute you; that ye may be the children of your Father."

**Prayer**

Our Father, help us this day to show love for all our fellow men in us. Make us to walk together before Thee as those who have been forgiven a great debt. In the name of Jesus. Amen.  
**Thought For The Day**  
More hate cannot drive out

hate—only love can do that.

## SPORTS AFIELD

By Ted Kestme

It's a good long jump until next hunting season. But that is no reason why you should let your good gun dog languish in his kennel like a military prisoner. He's already had a lengthy rest from what might have been a strenuous hunting period, but in all probability he is extremely eager to ramble again over the fields and woods he loves so well.

Henry Davis, Sporting Dog's Editor of Sports Afield Magazine, says enforced inactivity at this time is frustrating to your dog's eager hunting desire, and it can be detrimental to his physical well-being as well. For many of us are prone to let our dogs lie around in idleness, putting on extra pounds through lack of exercise. There are many ways of giving them that needed exercise without violating the law by taking them for runs in the fields. In fact, through a planned program of daily activity, our dogs can be kept in fine hunting condition without ever having left our backyards. Brush-up lessons in retrieving for bird dogs, retrievers or spaniels; drag-hunts for hounds of all breeds or just ordinary road work will keep those muscles in hard condition and pay big dividends when the regular hunting season arrives.

If local restrictions will not permit jaunts through open country or light cover with the dog running free, road work on a leash will do much to harden the muscles. Start out by giving him a workout of a half of a mile each way on a road that is fairly free from traffic. Then gradually increase the distance.

The amateur one-dog owner can take a leaf out of the professional's book and give his dog the same sort of exercise by employing a strong, young boy and his bicycle. He should make sure that the boy is a responsible youngster who will stay away from automobile traffic. Regardless of what method is used, daily workouts NOW, whether the dog is running free, pulling on a lead or walking quietly at heel, will pay big dividends in added pleasure when the hunting season rolls around.

As the dog's muscles harden and his exercise periods are increased, an extra helping should be added to his daily ration. The nationally advertised commercial dog foods are an excellent and well-balanced ration, but the gun dog that works hard sometimes needs a bit extra and supplementing this diet by adding raw beef is advisable. Chopped beef hearts and kidneys, with some vegetables added, make fine stews with which to soak the commercial dog meal or kibbled biscuits and provide energy - building nourishment.

Conditioning the hunting dog is not done overnight. It is the result of regular periods of exercise, short in the beginning and gradually lengthened. If the

## YOUR PERSONAL HEALTH COLUMN

### Warm Weather Warning

The chicken salad smells delicious. Tastes wonderful, too. And it can put you in the hospital. . . . Because Mother boiled the chicken in the morning and left the pot on the back of the stove to cool for three hours. Some "staph" got in — they're everywhere, just everywhere — found the food good and the temperature just right, settled down to

multiply and produce their own particular poison. Then Mother fished out the chicken, cut it up, added celery and onion and mayonnaise and put the result in the icebox.

An hour before dinner, out came the chicken salad. It set on the table for a couple of hours more, while the family took showers, had cooling drinks. The "staph" germs were delighted. If there's one thing they like better than chicken left at room temperature for several hours, it's mayonnaise. They remultiplied—the icebox had temporarily inhibited them—produced more poison. The poison has no taste or smell, so the unwary family ate up all the chicken salad. Two hours later they were all in the hospital, not a bit consoled by assurances that they weren't going to die because they wished they could.

Any dish containing poultry, ham, cream, custard or mayonnaise should go straight from stove to icebox, and from icebox

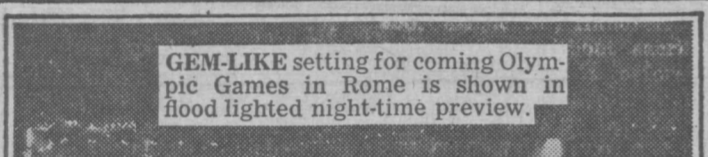

to table only when it is going to be eaten immediately. Don't take these foods on picnics unless you have a portable refrigerator to keep them in. This column is sponsored in the interest of better health by your Tuberculosis Association.

One article that has not gone up in price since it went on sale in May 1941 is the Series E Savings Bond. It still sells for 75¢ on the dollar of maturity value—and matures in 7 years and 9 months instead of the original 10 years.

## People, Spots In The News

GEM-LIKE setting for coming Olympic Games in Rome is shown in flood lighted night-time preview.

STERN-VISAGED "teacher" is actually just an arrangement of cup, bowl, brush, etc. by Lloyd Jones, news photographer of Youngstown, O. who specializes in such kitchen caricatures.

SPACE-CONSCIOUS grocer finds he can stock 22 per cent more goods on typical shelf through new "sideways" design of Nutrena dog food package, which also has higher visibility.

SEX-PUPPLETS on best behavior are progeny of "Marley's Moon Rocket" (left) and his mate, in Bradenton, Fla.

## BUSINESS CAN BE A PLEASURE

Dr. H. C. Byrd, Chairman-Director of the Tidewater Fisheries Commission, served as a judge in the annual QUEEN OF THE CHESAPEAKE contest at the Maryland Yacht Club. He availed himself of the opportunity to spread the word among the officials and members of 21 yacht clubs attending, that July 3rd is the dead line for the showing of Maryland registration numbers on boats in Maryland waters.

Left to Right: Miss Charlotte Cantwell, Cambridge Yacht Club; Miss Joan Peters Johnson, Retiring Queen; Dr. H. C. Byrd, Chairman of Department of Tidewater Fisheries Commission; Miss Linda S. Watkins, New Queen of the Chesapeake; Miss Sandra Carole Jarboe.

# Busy mother of three finds telephone gives 21 extra hours in two weeks...saves \$17<sup>38</sup> and 200 miles of traveling

Mrs. Duden uses her phone to find out if a local fabric store has some material she needs.

Mrs. H. Richard Duden of Annapolis recently kept a two-week record of all her family's telephone calls. For each call she also estimated any expense, time and traveling that were saved by being able to telephone.

At the end of two weeks, her tally showed that the telephone had given them almost a full day of extra time, and had saved far more in traveling expenses than

the cost of their telephone service.

Whether it was a call to summon a washer repairman or rounding up the youngsters, the phone made busy days easier.

Mrs. Duden found, too, that some calls provide pleasure and peace of mind that can't be measured in time or money saved. For instance, her husband who is an insurance representative and football coach, had to make a busi-

ness trip to Florida. His Long Distance call to the family went into a "special" category of her telephone diary.

Perhaps you might like to keep a diary to see what your telephone does. We think you'd find, too, that your telephone saves much more in time, trouble and expense — than the cost of having it.

### Lions Elect International President

Finis E. Davis of Louisville, Kentucky, was elected International President of Lions International at the Association's 43rd Annual Convention in Chicago. Lions International, with 610,000 members in 106 countries or regions, is the world's largest service club organization.

Lions International is best known for its many youth programs, community service projects, sight conservation activities and aid to the blind. Last year Lions Clubs around the globe completed more than 192,000 individual community service projects.

**BABSON**

Writes . . .

BY ROGER W. BABSON

**Babson Discusses  
Railroad Mergers**

BABSON PARK, Mass., July 14 — This column first warns readers that the days of passenger trains are nearly over. Several roads now operate only one passenger train a day; while passenger service is being cut by all railroads. This is further hastened by talk of railroad mergers. Let me give you some illustrations.

**The Gravity Roads**

The first recent important railroad consolidation was that of the Norfolk & Western and the Virginian Railway. These two highgrade roads did not need to consolidate for financial reasons. However, they both serve the soft-coal fields of West Virginia, hauling coal to the seaboard at Norfolk, Virginia. Merger was thus very natural; in fact, the Virginian perhaps should never have been built.

I have been especially interested in the above two roads because they profit so much from Gravity, which readers know is a hobby of mine. Gravity not only enables the trains to "coast" down from the West Virginia mines, but Gravity also generates some of the electricity used in bringing the empty cars back. I believe Gravity will be a factor in many other railroad consolidations. At present, it is used industrially only in connection with water power. It surely

will sometime be used for irrigation and small power requirements.

**Baltimore & Ohio—  
Chesapeake & Ohio**

One of the largest railroads is the Baltimore & Ohio; this road duplicates the service of the Chesapeake & Ohio. The two roads can be consolidated with considerable savings to both shippers and investors. If the I.C.C. gives a "green light," and if the stockholders of the two roads and other interested railroads agree, such a consolidation will take place.

The Chesapeake & Ohio stockholders now feel that the Baltimore & Ohio needs them, rather than vice versa; they believe the Chesapeake & Ohio stock is worth considerably more than the Baltimore & Ohio is offering in exchange.

**New York Central Situation**

Ever since the suicide of Robert Young, the New York Central has been a great disappointment to its stockholders. In view of the previous fight for control, most stockholders felt that the stock was very valuable and refused to sell it. This was a great mistake. (Incidentally, a proxy fight often affords a good opportunity for stockholders to take profits, as the price usually declines afterward.)

In looking for a friend, the New York Central officials have flirted with the Pennsylvania Railroad, the Baltimore & Ohio, The Chesapeake & Ohio, and the Erie, but nothing concrete exists at the moment.

**Florida Railroads**

Negotiations between the Atlantic Coastline and the Seaboard have proceeded almost to the point of final agreement. There is no doubt but what the Florida East Coast should also merge with the above two roads.

Both the Atlantic Coast Line and the Seaboard are in excellent condition. The history of the Seaboard is, from an investment point of view, truly miraculous. Large amounts of money were made by the purchase of Seaboard stock directly after the reorganization. In fact, only directly after reorganizations do I buy railroad stocks.

**Northwestern Roads**

There is always talk of a consolidation of the Northern Pacific, the Great Northern, and the Burlington. At one time merger was almost certain, but it was stopped by a court fight that triggered the panic of 1907. There also is constant talk of merging the Boston & Maine, the Maine Central, and the New Haven; but no one now seems

to want the New Haven. All of these New England railroads are "short line" roads which are being avoided by careful investors.

Railroad officials blame the I.C.C. for holding up these mergers. But the truth is that every consolidation means that certain officials, employees, and directors will be thrown out of jobs. The labor unions therefore insist on being heard, as well as certain of the small-town shippers. Such opposition, however, is largely motivated by personal selfishness rather than by consideration for the good of the nation as a whole.

A sharp tongue and a dull mind are usually found in the same head.

**New Developments  
Aid In Lighting**

Today's families are becoming more light-conscious than ever before—thanks to the almost revolutionary new developments made in recent years by lighting designers and manufacturers.

For instance, noisy switches—operating one light only—rapidly are becoming obsolete. Now there can be far more flexible control for the home's entire lighting system. Some of the electrical conveniences making this possible are dimming devices, multiple switch panels, and remote control of lights as well as many electric appliances.

Low-voltage switching makes these advances possible. What is it? In simple terms, a low voltage system uses 24-volt current at the switching point to activate up to 115-volt current in remote

lighting or equipment. The advantages are many:

Long-distance control, indoors and out, can be had from various points in your home. You can make a path of light ahead of you by lighting rooms before you enter. From bedside, you can control the coffee-maker in the morning, or at night flood outdoor areas with reassuring light to ward off prowlers.

Low-voltage switching is safe:

there's no danger of getting a shock from the 24-volt current at switch plate.

Because 24-volt wire is much smaller than conventional 115-volt wire, it is more easily concealed in modernizing operations.

When you plan to modernize your home's electrical system, consult your qualified electrical contractor. If you're not an expert, leave your lighting problems in his capable hands.

**Fireman, Save That Boat!**

Boat owners should take a careful look at their fire extinguishers before they set sail this summer.

The reason is that the Coast Guard has banned all types of vaporizing liquid extinguishers because of their high toxicity. As a result, industry sources say, seven out of every ten boatowners must replace their carbon

tetrachloride extinguishers before January 1, 1962, with one of three approved agents—dry chemical, foam, or carbon dioxide. However, every new boatowner must purchase an approved extinguisher immediately if the boat uses motor power.

How do the various approved agents differ? CARBON DIOXIDE is a gas that smothers flammable liquid and electrical fires. It is most effective indoors but cannot be recharged at sea.

FOAM is a frothy mixture of gas or air-filled bubbles that also smothers the fire by excluding oxygen. While quite effective against huge fuel fires on shore, it is not generally used on small boats because of its slow action and the weight and bulkiness of its containers.

DRY CHEMICAL is plain baking soda, ground very fine, with chemical additives that make it free-flowing.

Pound for pound, it is rated by Underwriters Laboratories twice as effective, at least, as other extinguishing agents on flammable liquid

fires, and can be used effectively even by novices. It is a non-conductor of electricity, non-toxic, non-abrasive and non-corrosive.

The most important development in marine fire extinguishers is the newly introduced Ansol Monitor. Shaped like a bowling ball and carrying Coast Guard approval, the Monitor is rated by experts as the most powerful extinguisher for its size ever produced, expelling 2 3/4 pounds of dry chemical from a factory-sealed disposable shell. It has as much fire-killing power as eight ordinary pump-type carbon tetrachloride units or one five pound carbon dioxide extinguisher, even in the hands of a novice. It is activated by squeezing the trigger handle.

When the ball is exhausted, the operator simply unscrews the empty shell and replaces it with a factory-charged spare unit in a matter of seconds, thereby achieving continuous fire protection afloat. The Monitor is available through most marine dealers.

Table with columns W, L, Pct. for Emmitsburg, Fairfield, Taneytown, Blue Ridge.

Sunday's Scores Emmitsburg 4; Blue Ridge 3 Fairfield 6; Taneytown 5, (12 innings).

Sunday's Games Emmitsburg at Blue Ridge Taneytown at Fairfield

Emmitsburg and Fairfield scored one-run victories in Pen-Mar Baseball League action Sunday.

Emmitsburg edged Blue Ridge 4-3 on the loser's diamond as Larry Topper pitched shutout ball for seven innings as the locals won their second straight and are tied for the league lead with Fairfield.

Fairfield took a 6-5 victory at Taneytown in an exciting 12-inning game. John Mort, winning pitcher, hurled shutout ball over the last nine innings.

License Issued

A marriage license was issued in Frederick this week to Thomas M. Leonard, Elizabeth, N. J., and Yvonne A. Clements, Emmitsburg.

Two Men Injured In Car Crash

Two men were injured Sunday night at 9:30 o'clock when their car skidded on the Gettysburg Rd. four miles north of here, left the highway, struck a telephone pole and stopped in a field.

According to the officers, Robert Joel Meyer, 23, Hyattsville, Md., was driving north when his car skidded on the Gettysburg Rd., went off the west berm, knocked down a pole owned by the United Telephone Company, broke down a fence owned by Charles Ferrin, Gettysburg R2, and came to rest in a field.

Meyer suffered a laceration of the left eyebrow and a broken nose. A passenger in his car, Howard C. Ankeney, 20, Takoma Park, Md., had brush burns of the forehead and right elbow. The two men were removed in the Gettysburg Fire Department ambulance to the Warner Hospital.

State Police estimated damage of \$910, of which \$10 was to the fence, \$200 to the pole and \$700 to the front end of Meyer's 1959 car.

Local 4-H Club Holds Meeting

The monthly meeting of the Emmitsburg Boys 4-H Club was held Monday evening, July 11 at the home of Dick and Kenneth Swomley.

It was announced that the club would enter a team in the County softball tournament on Saturday, July 16.

Present at the meeting was Robert Stansfield, who came in place of David Eigenbrode, who was unable to attend.

The next meeting will be held August 8 at the home of James Houck. After the meeting, watermelon was served.

MRS. C. D. WOODRING

Mrs. Frances (Fannie) C. Woodring, 71, Waynesboro R4, died last Thursday evening at the Waynesboro Hospital. She had been in failing health for the past year and critically ill since May, and had been confined to the hospital since June 29.

She was born at Emmitsburg, May 17, 1889, the daughter of the late Isaac and Rebecca Fleagle Bowers. Her early life was lived in Emmitsburg and she removed to the Waynesboro area in her early teens.

Mrs. Woodring had been employed by the Waynesboro Shoe Factory for 13 years, retiring four years ago.

She attended Calvary Chapel, She attended Calvary Chapel, Seatons.

Surviving are her husband, Charles D. Woodring; a son and four daughters: Walter Bowers, Waynesboro; Mrs. Herman Green, Mrs. Catherine Aughinbaugh and Mrs. Beulah Rook, all of Waynesboro R4; Mrs. Donald Aldridge, Chambersburg a brother; Thomas C. Waynesboro; 24 grandchildren, 33 great-grandchildren.

Funeral services were conducted Monday afternoon at 2 p. m. from the Grove Funeral Home, Waynesboro, with the Rev. J. Boyd Davis officiating. Interment was in Green Hill Cemetery.

FIREMEN PLAN CRAB FEED

President John J. Hollinger presided at the regular monthly meeting of the Vigilant Hose Co. held Tuesday night on Firemen's Field, 36 members in attendance.

Fire Chief John S. Hollinger reported that two fire calls had been answered since the last regular meeting. The first fire was answered at the James Hill farm where a tractor had been become ignited. The second call proved to be a false alarm at Mt. St. Mary's College.

The president announced that the annual crab feed would be held at Kump's Dam Park this year on August 2 starting at 7 p. m. Chief Hollinger has scheduled a full-fledged practice session to be held next Tuesday evening, July 19 and all active members are asked to be present at this practice session. Three new members were voted into the group at Tuesday's meeting. They were William D. Boyd, Irvin Tokar Jr., and Arthur S. Elder.

Drunken Driver Fined

An Emmitsburg man, Daniel F. Shorb, was fined \$160 by Magistrate Coady in Frederick recently for operating a motor vehicle while under the influence of alcohol.

He also was fined an additional \$50 for operating a car while on a revoked license.

A depression is a period when people do without the things their parents never had.

WASHINGTON AND "SMALL BUSINESS" By C. WILSON HARDER. Out in Sacramento, California, a major retailing operation is trying a new plan, that of selling groceries on credit cards issued by a bank. In other words, customers merely show their bank credit card, and the bank bills and collects for them along the same lines that bank credit cards are used to many other purchases. C. W. Harder Of course, the customer pays the bank a service charge. In addition, the retailer pays the bank a charge which is currently running about 3%. But then comes the interesting part. This particular retailing operation has for some time given trading stamps with the goods purchased from their stores. They are continuing to do this, with this exception. When a customer buys on his credit card, he receives no stamps. The management of the stores compute that it costs 3% of the price of the goods they sell to support the trading stamp plan. With credit purchases costing them 3% bank charges, if they gave stamps with such credit purchases, it would total 6%. Hence, the customer can have credit, or stamps, but not both. Thus, there comes into sharp relief the fact that in cities where practically all grocery stores have some sort of a trading stamp plan, the consumers are paying a charge of at least 3% on their food purchases, or around \$100 per year in the average family. © National Federation of Independent Business

Rocky Ridge 4-H Club Active

The Rocky Ridge Progressive 4-H Club met recently at the home of Randy, John and Harold Bollinger. The roll call was made by each member present giving a good health rule. The vice president, Marshall, presided at the meeting.

Douglas Valentine gave the results of the County-wide judging contest, where president of the club, Randolph Valentine, placed third.

Plans were made for making a float to put in the various parades.

The Bollinger brothers had the program for the evening on the raising, feeding and grooming of beef cattle. Dale Valentine and the Smith brothers showed pictures and gave a short lecture on gardening.

The next meeting will be held July 22 at the home of Linda Keilholtz.

Serves As Parade Marshal
J. Franklin Fox, Rocky Ridge, served as parade marshal on Thursday, July 7 for the Gettysburg Firemen's 97th anniversary parade. Mr. Fox who is Frederick County Regional Officer of Maryland Civil Defense, was a member of the Grand Marshal's staff which included Capt. Donald Doersom, commanding officer of the Gettysburg National Guard and General Weikert, who was Grand Marshal.

Mr. Fox has been active in Civil Defense and was recently appointed by the Frederick County Chapter of the American Red Cross as an emergency first aid mobile unit, subject to call 24 hours a day. He has also served as Police of Frederick County Civil Defense Agency, and during the visit of Khrushchev at Camp David, served as a guard.

GUARD UNIT HOME AFTER SUMMER TRAINING IN SOUTH

Company B (Forward Support) 729th Ordnance Battalion, Maryland Army National Guard, Highfield, Md., returned to its home station Sunday, after completing 16 days field training at Fort Bragg, North Carolina. For the second consecutive year the Unit received a superior rating for the encampment, and distinguished itself by having the highest rating for a Company-sized unit in the 29th Division.

The unit is composed of 5 Officers, 3 Warrant Officers and 81 Enlisted Men. These men come from Highfield, Blue Ridge Summit, Waynesboro, Thurmont, Emmitsburg, Smithsburg and Hagers-town areas.

Co. B is commanded by Capt. Charles A. Warner of Blue Ridge Summit, Pa.

Appreciates Support Of Newspaper

Editor, Emmitsburg Chronicle: In the report from the A.A.A. for 1959 on the winners in the 21st National Pedestrian Program For States, Maryland led the Nation in the Public Information Section with 100%. The average for states in this section was 54%. Maryland was the only state to achieve 100% for Public Information. We are very proud of this record and feel that the credit for this outstanding accomplishment should go to the Newspaper Industry in Maryland because of the wonderful cooperation, support, and aid they have given in publicizing pedestrian safety in our State.

Please accept our sincere thanks and congratulations for a job well-done. We need your help and support to promote safety in Maryland and we hope you will continue to give us the excellent cooperation which you have always given us in the past that made it possible for us to obtain this high rating.

Paul E. Burke, Executive Director, Maryland Traffic Safety Commission

LITTLE LEAGUE

The Cardinals whipped the Red Sox 16-11 paced by Gus Rice's two homers for their first win over the league leaders this season. The winners are now just a half game off the pace in Emmitsburg Little League play as the Sox have dropped their last two games.

The Cards whipped the Giants 14-4 last Thursday evening as Johnny Sherwin spun a neat four-hitter and had fine support from the plate. The loss dropped the Giants into the cellar.

Yankee hurler Forrest Knipple won his third straight game in Little League play with his big bat and fine clutch hurling that overcame fielding lapses as the Yanks edged the Giants 10-9 Tuesday evening.

Down two runs in the bottom of the sixth, the winners picked up three runs after two were out with unusual base running that wound up with the Giants throwing the ball into center field as the winning run scored. Knipple had two hits and knocked in three runs. He scored the tie-breaker by coming home on a passed ball.

PERSONALS

Mr. and Mrs. Frank Dubel, Emmitsburg, spent the 4th of July with his brother and sister-in-law, Mr. and Mrs. Charles Dubel and family, Hartford, Conn. The children accompanied them on the return trip.

Mr. and Mrs. Charles Dubel and children, Hartford, Conn, visited his parents, Mr. and Mrs. Ernest Dubel, DePaul St., and Mr. and Mrs. Frank Dubel and friends recently.

Daniel Saffer, Baltimore, spent the weekend with his mother, Mrs. Marie Saffer.

Those who spent Sunday at the home of Mr. and Mrs. Harry Wantz, DePaul St., were: Mrs. Gary Trout and Miss Margaret Galbraith, Gettysburg; Mr. and Mrs. John Trout and children, Karla and Keith of Rockville; and Mr. and Mrs. Charles Dubel and children, Michael and Ann of Hartford, Conn.

Mrs. Jeane Frock and children, Littlestown, spent Thursday with her parents, Mr. and Mrs. Lester Wastler.

Recent visitors of Mrs. Mae Lowe were Mrs. Elizabeth Grey and Mrs. Lisa Harbaugh, Hagers-town; Mr. and Mrs. Robert Lages, Baltimore; and Mr. and Mrs. Gerald Freeman Chambers, Baltimore.

Mr. and Mrs. William Vinck, Baltimore, visited over the weekend with Mrs. Vinck's parents, Mr. and Mrs. Andrew Jordan. Fred Lefler of Statesville, N. C., is spending a few days this week with his sister and brother-in-law, Mr. and Mrs. Irvin Tokar, Center Square.

Mr. and Mrs. William Hopkins, York, spent the weekend at the home of Mrs. Hopkins' parents, Mr. and Mrs. Andrew Jordan. Miss Lynn Paidakovich, Silver Spring, is visiting her grandmother, Mrs. Genevieve R. Elder, S. Seton Ave.

Mr. and Mrs. Eugene Kraemer returned home Monday after vacationing for a week in Spartansburg, S. C.

Mr. and Mrs. John L. Baumgardner and family; Mrs. Carrie Fuss Long, Emmitsburg; Mr. and Mrs. Robert L. Baumgardner and family, Fairfield; Mr. and Mrs. Donald Wantz and family, Mr. and Mrs. Raymond Baumgardner, and Mr. and Mrs. Murray Baumgardner and family, all of Tan-

eytown; and Mr. and Mrs. Robert Fuss, Covenia, California, were among those attending the 25th wedding anniversary of Dr. and Mrs. George M. Baumgardner of Baltimore, on Sunday, July 10.

Mr. and Mrs. Ralph D. Lindsey and family have moved from the Motter's Station - St. Anthony's Road to the Carroll Frock farm on Kump's Dam Road.

Mr. and Mrs. John E. Baumgardner and family have moved from their home in Baltimore to Kalamazoo, Mich., where Mr. Baumgardner has been given a higher position in the Upjohn Drug Company. Mr. Baumgardner was previously a supervisor of the Upjohn Company in Md. He is the son of Mr. and Mrs. John L. Baumgardner of near Emmitsburg.

Clean Pastures Urged By State Veterinarians

Keeping pastures free of debris and poisonous weeds and

keeping fences in good repair are important steps in safeguarding the health of livestock, the Maryland State Veterinary Medical Association said in a report today.

The veterinarians pointed out that loose wire in fences can cause needless injury to livestock and scrap metal left near fence repair areas may be swallowed by cattle during grazing.

Poisonous plants, old battery cells, paint cans, spray vats and fertilizer bags are common cause of illness and death of cattle or calves on pasture.

The association said that pasture policing is even more important during summer months in areas where vacationers may litter the edge of roads with tin cans and other trash.

Genius may have its limitations, but stupidity is not thus handicapped.

The greatest paradox of them all is still civilized warfare.

Medical Milestones

New Drug Treats Old Ill

Medical developments that apply to all of us are few and far between. But one was recently announced—a real medical milestone—in the form of a new and superior drug for the treatment of diarrhea, a "disease" that affects young and old alike.

Actually diarrhea is not a disease itself, but is rather a symptom of some gastrointestinal disorder. These disorders may be caused by faulty nutrition, bacteria or virus, or a nervous condition. The latter is the most common offender.

But whatever the cause, the resulting diarrhea, if permitted to continue, can lead to more serious complications, such as severe dehydration or vitamin deficiency. There are two types of diarrhea: acute, lasting from several days to a week or more; and chronic, lasting for years, with bowel movements sometimes numbering as many as 25 a day. Both can be quite debilitating.

What are the mechanics of diarrhea? After you eat food, it passes through the digestive system by a series of muscular contractions, over which we have no control. During this passage enzymes are added, and eventually the usable nutrients are absorbed by the blood stream. In the large intestine (the colon) excess water is absorbed out of the waste matter. If, for some reason, these muscular contractions are speeded up, food passes through the digestive system too rapidly to be properly digested and the excess water is not absorbed.

Before the physician can find and treat the underlying cause, he must treat the diarrhea. His task here is two-fold: he must slow down the speeded up muscular action of the intestines, and he must absorb the excess water. The new drug, known to doctors as Sorboquel, attacks both of these things with specific
