BY ABIGAIL

Thinking of spring? And who isn't at this time after enduring such a rugged winter. Anyway there are harbingers of the coming change of seasons which will occur this month. If you've dared to venture outside for a peek about the premises you'll discover that certain foliage has given signs of returning to life. Already the first robin stories are trickling in and by this evidence you know that spring isn't far away and that you can at least commence dreaming of that balmy breezy time of the year we all love so much.

Last weekend it seemed that March had backed into February as high winds played havoc with roofs and TV antennas in the area. Winds up to 50 m.p.h. tore through the town and some damage to property occurred. Rather extensive property damage has occurred here this winter as the result of the heavy snows, freezing, thawing and high winds. Sidewalks and curbing are in a mess in many instances and will have to be repaired. Soft earth has caused many houses to have cracked walls, broken water mains, etc. There'll be plenty of work for repair men just as soon as the weather permits.

Unemployment figures continue to mount in Maryland and the latest figures tabulated show that 87,000 are out of work at the present time. This is an enormous figure for a small state and there is no indication things will improve at this date, not for some time at least. The pinch has been felt locally also with factories laying off workers who never before knew what it was to be unemployed. Let us hope this condition is only a temporary one because directly or indirectly it affects every single one of us.

Action taken this week by Commissioner Flax to keep school children off the Square is welcome news indeed. Efforts to correct this dangerous situation have been made before but to no avail. Already two children have been struck by cars and it is only by the grace of God that a fatality hasn't occurred. There is absolutely no reason why provisions couldn't be made to pick up the children at the school of their choice, even if it costs a trifle more. At the present time the little tots are forced to brave the cold weather for a period of 30 to 45 minutes while waiting for their school bus. Swift action to correct this injustice to the children of the Mother Seton School. Already a member of the School Board has been here to investigate the matter. Our thanks again to Commissioner Flax who journeyed to Frederick and sought relief.

Three Nominated To School Board

With 26 county schools represented Wednesday night, the screening committee of the County Council of PTA's selected three of the eight nominees for appointment to the May 1 vacancy on the Board of Education.

The vacancy on the Board is created by the expiration of the six-year term of Board member Mrs. Paul Wise of Lewistown.

Selected by the screening committee to fill the vacancy are Ellsworth E. McGaha, Middletown, A. Atlee Radcliffe, Frederick, and Mrs. W. Cash Smith, Woodsboro.

The names of Mr. McGaha, Mr. Radcliffe and Mrs. Smith will be submitted to Gov. Tawes, State Senator S. W. Barrick and the State Central Committees of the Democratic and Republican parties for consideration.

Mr. McGaha, who was endorsed by the Yellow Springs Elementary School PTA, is a partner in the Young Men's Shop, Frederick. Mr. Radcliffe, who was endorsed by the Parkway PTA, is vice-president of the Farmers and Mechanics-Citizens National Bank of Frederick.

Mrs. Smith, who was endorsed by the Walkersville Elementary School PTA, has served for the past six years as a member of the Frederick County Welfare Board.

Easter Seal Drive Begun Here

For the second consecutive year, James A. Grove, Frederick postmaster has been named as chairman of the county Easter Seal campaign. Funds are used in projects for crippled children and adults and finance work at the three-county Easter Seal Treatment Center located at the Odd Fellows Home, Frederick.

Working with Grove will be the county postmasters, many of whom will serve as chairmen in their respective communities.

The Easter Seal sale opened on Wednesday and continues through the month of March.

Serving as neighborhood chairmen for the Emmitsburg District will be Mrs. Madeline Harner and L. H. Stoner as co-chairmen.

Funds are secured from the sale of Easter Seals which will be mailed to local residents during early March. Coin containers are also placed in the business houses and paper lilies are offered for sale. Also a number of local organizations stage benefits.

The Easter Seal Center serves Frederick, Washington and Carroll Counties. Offered are speech therapy, physical therapy and occupational therapy. The Center also maintains a loan closet of wheel chairs, crutches and other needs of the crippled.

The center is operated by the Maryland Society for Crippled Children and Adults.

Lions Club Holds Regular Meeting

Six guests and 15 members were present at the regular meeting of the Emmitsburg Lions Club held Monday night at Fitzgerald's Mason-Dixon Inn. President Ralph F. Irelan presided over the meeting. The six guests were from Frederick and Middletown.

Thank-you notes were read from the Beagle and Sharpe families. All members were invited to attend a district zone meeting to be held at Unionville on March 7.

A hospitality night will be held by the zone's clubs at the Venice Restaurant in Hagerstown on Apr. 22. An invitation from the Glade-Valley Lions Club was received and invited all Lions to attend a smorgasbord to be held in the Woodsboro Fire Hall Saturday afternoon and evening from 4 to 8 p. m.

President Irelan appointed the following nominating committee: Joseph W. Sullivan, J. Ralph McDonnell and Charles F. Stouter. Nominations will be made at the next regular meeting which will be held in the Lutheran Parish Hall.

Sportsmen Purchase Stock Fish

Thirty-five members were present at the regular monthly meeting of the Indian Lookout Conservation Club held in the Fire Hall Tuesday night. President James Kemp presided over the meeting.

Special guests present for the meeting included Guy Gearhart, regional game warden, Robert Abraham and Richard Jacques, both game wardens. Warden Gearhart addressed the group and his topic was an antlerless deer season and herd management.

The club voted to erect a new regulations sign this season at Rainbow Lake. It was announced that the group provided 500 lbs. of feed and grain for this area's wildlife conservation during the winter to date.

In an effort to improve fishing conditions in the district the Sportsmen allotted a sum of \$250 for the purchase of stock fish which will be placed in local streams. Membership cards and identification buttons will be distributed at the next regular meeting, it was announced.

Three new members were admitted to the organization at the meeting. They were Thomas Bollinger, Frank R. Fraley and Thomas A. White. A monetary award was made to Charles E. Keepers.

Mr. Rudisill of the State Game Commission has offered his services in assisting the club to map out plans for its proposed clubhouse and the improvement of the grounds it already owns north-east of town.

Three members of the 1947 Dodgers became big league managers—Cookie Lavagetto, Bobby Pragan and Eddie Stanky.

EHS's Horine Coach Of Year

John Horine, in his first year as basketball coach at Emmitsburg High School, was chosen as Frederick County's Coach of the Year. Horine, a graduate of Frostburg State Teachers College, guided the Liners to a 15-3 seasonal mark. He toppled Walkersville twice, the only team in the area to turn the trick, beat the other class B contender, Brunswick, twice, Middletown, class B, twice and Thurmont, class B, once.

His only losses were suffered at the hands of St. John's twice and Thurmont once.

After being graduated in June, 1959, Horine worked in the county's elementary school physical educational play during the 59-60 school year.

In September of 1960, he replaced John Weaver as physical education instructor at Emmitsburg High School. The native of Myersville also coaches soccer and baseball in addition to the cage sport.

"Potato Man" Succumbs

George W. Wilhide, 85, well-known retired farmer and auctioneer of Lantz, died Tuesday morning at Washington County Hospital, Hagerstown.

He had won a reputation throughout the county as the "potato man" because of the large potatoes he raised as a hobby.

A son of the late Josiah and Julia Freeze Wilhide, his wife, Mrs. Anna Adelsberger, Wilhide, died January 25. He was a member of the United Brethren Church of Lantz.

Surviving are the following children: Lloyd Wilhide, Thurmont; Chester Wilhide, Waynesboro, Pa.; Albert Wilhide, Lantz; Calvin Wilhide, Thurmont, and Mrs. Charles Wastler, Graceham; one sister, Miss Nora Wilhide, Sykesville.

Funeral services will be held this afternoon (Friday) at 2 p. m. at the Creager Funeral Home, Thurmont. Interment will be in the Blue Ridge Cemetery, Thurmont.

MILTON A. DORSEY

Milton A. Dorsey, 69, Hagerstown, died at Mercy Hospital in Baltimore last Thursday evening after an illness of three months.

Born in Woodsboro, he was the son of Claggett and Laura Harne Dorsey. He was a member of Lapran's St. Mark's Episcopal Church, Hagerstown, and had been a vestryman and senior warden for the past 25 years.

Surviving are his wife, Jeanette (Sterling) Dorsey; sons, Sterling C. and Paul W. Dorsey, Hagerstown; daughter, Mrs. Mildred J. Mertes, Portland, Ore.; brothers, Harry, Buffalo, N. Y.; Hallard, Oneonta, N. Y.; sister, Mrs. Margaret Brown, Emmitsburg, and one grandchild.

Funeral services were held Sunday afternoon at 2 p. m. at St. Mark's Episcopal Church with the Rev. C. Robert Sutton officiating. Interment was in Rose Hill Cemetery.

World Affairs Talk At Local College

The sensitive topic, "Arab-Israeli Tensions in the Middle East," will highlight discussions on world Affairs Day at Saint Joseph College in Emmitsburg Saturday, March 4. Students and faculties from several area colleges will attend the presentation of the International Relations Club in the Green Room on the college campus.

Representatives from the embassy of Israel and the embassy of the United Arab Republic, will present their respective sides of the serious problems that exist between the two nations. The program, of special interest due to the fact that the United Arab Republic does not recognize the diplomatic existence of Israel, will consist of a presentation by each representative followed by a question period.

Students Joanne Barkley and Catherine Dignan are co-chairmen of the World Affairs Day under the direction of Dr. Gilbert L. Odo, chairman of the Social Sciences Division at Saint Joseph College.

Some folks have private phones... others have teen-age children.

The Audubon Society is launching a nation-wide, five-year survey of the bald eagle's nesting and migrating habits.

Seeks Better School Bus Service Here

At a meeting of Towns Incorporated, Frederick County, held last Thursday night in Frederick, Town Commissioner J. Norman Flax addressed the group relevant to complete transportation for the students at Mother Seton School, Emmitsburg. Mr. Flax stated that numerous complaints from parents had been received because school children were forced to gather on the Square while waiting for a school bus and that in other cases students were forced to walk from the Mother Seton School to the Public School to board buses. The group referred the matter to the Board of Education which immediately dispatched one of its representatives to Emmitsburg to investigate the situation. The matter is now under advisement.

The group represents teachers, principals and town officials. Discussed during the meeting also were these matters: School conditions in general, taxes, water, inflationary prices and unemployment. Mr. Flax, in calling the group's attention to the bus situation, stated that already two of the little students had been struck by cars while waiting on the Square.

Murder-Suicide Near Keymar

Maryland State Police from the Randallstown barracks are continuing their investigation of a double shooting at Keymar, Tuesday evening which they said appears to be a case of murder and suicide. The dead are Mrs. Margaret Emma Miller, aged 36, wife of Robert Maxwell Miller, near Keymar, and a boarder in the Miller home, Waldo Jackson, 28, an employe of the Carroll Transportation Company, Union Bridge.

Police said Mrs. Miller was shot in the forehead while Jackson had been shot four times, twice through the chest, once in the hip and once in the left hand.

Officers said Mrs. Miller apparently killed Jackson and then took her own life. The bodies were found about 10:45 o'clock by Mr. Miller in a first floor bedroom. Dr. James Marsh, Carroll County Medical Examiner, was called and said both had died of gunshot wounds. A semiautomatic .22 caliber rifle was found near the bodies, the officers said.

No further details about the double shooting were available. The bodies are at the Fuss Funeral Home in Taneytown where arrangements are being made to bury Mrs. Miller Friday while Jackson's body will be sent to his former home in Kentucky.

Mrs. Miller was a daughter of the late Charles U. Mehring and Mrs. Nellie (Lookingbill) Mehring of Keymar. Besides her mother and husband she is survived by a sister and a brother, Mrs. Forrest Roser and William F. Mehring, both of Keymar.

She was a member of the Haugh's Lutheran Church, Ladiesburg. Funeral services will be held at the church Friday at 2 p. m.

Accepts Position With Hanover Shoe Co.

John M. Fuss Jr., R2, Emmitsburg, recently accepted the position of assistant to the Treasurer of the Hanover Shoe Inc., of Hanover, Pa. Mr. Fuss is a Certified Public Accountant and for the past five years has been associated with Arthur Anderson and Co., a world-wide public accounting firm. For the last three years he has been senior accountant in their Philadelphia office, serving various clients in Pennsylvania and Maryland. He is a member of the American Institute of Certified Public Accountants, the Maryland Association and Pennsylvania Institute of Certified Public Accountants, and the National Association of Accountants.

Enlists In Marines

William Ott Jr. enlisted in the U. S. Marine Corps. He left from Friendship Airport Feb. 23 for Parris Island, South Carolina. He is a graduate of St. Joseph's High School, class of 1960 and is the son of Mr. and Mrs. William Ott.

The world's smallest republic is San Marino, located on the slope of Mount Titano in the Apennines in the heart of Italy. The little nation covers only 38 sq. miles.

Waters Gas, Nabs Thieves

Irritated over repeated thefts of gasoline from a storage barrel at his home, Raymond Scott, Gettysburg R2, trapped suspected thieves after he filled the fuel container with water.

Clifton Forsythe, 18, Orrtanna, R1, and James L. Musselman, 23, Gettysburg R3, were arrested by state police of the Gettysburg detail after Scott sprung his scheme. A 16-year-old juvenile also picked up by police was released in custody of his parents.

Scott told police he filled the barrel with water after it was drained free of gas.

He told troopers he had been in Gettysburg shopping and while en route home came across a stalled car about a half-mile from his home. Three youths were in the car at the time, Scott said.

Scott said he traced the car tracks right back to the spot where the water-filled barrel was sitting and then called police.

The youths are scheduled to be given a hearing on larceny charges.

Marillac Award To Richmond Woman

Saint Joseph College will award the Saint Louise de Marillac Medal for dedicated personal service to her fellowman, to Mrs. Clara Somma Fowler, of Richmond, prominent in charity activities with needy and underprivileged children of the Richmond diocese. Sister Hilda Gleason, President of Saint Joseph College, will bestow the Medal on Mrs. Fowler at the annual Convocation on March 11 in the college auditorium.

The Most Reverend John R. Russell, D.D., Bishop of Richmond, who confirmed the selection of Mrs. Fowler of his diocese as the recipient of the award, will preside at the Convocation and will deliver the principal address.

Mrs. Fowler, a former teacher in the Richmond public school system, has been an active leader in the Catholic Daughters of America, the Altar Societies of Saint Benedict's and at Saint Brigid's, a group working for Crippled Children's Hospital. Her civic interests include the Red Cross, Community Chest, and the Muscular Dystrophy and Heart Fund Campaigns. She is a past President of the Children of Mary Sodality at St. Benedict's, and participated in fund-raising efforts for the Little Sisters of the Poor.

The children of St. Joseph Villa have been a major interest to Mrs. Fowler. The first President of the Buddy Club at the Villa, an office she held from 1947 to 1960, she also became the first President of the group when it was reorganized as the Ladies of Charity in 1957. Secretary of the Franciscan Guild, which assists the Franciscan Sisters working with Negro children, her works included the duties of organizing the Sewing Guild, and serving as troop leader for girl scouts at the Villa.

Saint Joseph College senior, Lynn Marie Murray, of Chevy Chase, Md., winner of the 1961 Saint Louise de Marillac Speech Contest, will deliver her award-winning presentation at the Convocation. The topic will be "Saint Louise, Patroness of Social Workers."

The Saint Louise de Marillac Medal is awarded to a lay woman from a different diocese each year. The two laywomen honored previously are Miss Alice R. May, assistant director of Catholic Charities in Baltimore, and Mary Amabilis Dixon, last year's winner from the Washington archdiocese. The medal was first presented in 1958, when Saint Joseph College honored Sister Mary Basil Roarke, Councillor General of the Community of the Daughters of Charity, in Paris.

CYO FILMS DRAW WELL

The Religious Committee of the Seton Catholic Youth Organization, Emmitsburg, will present the third of its religious films for Lent this Friday night at 8:15 in St. Joseph's High School. The feature will be a fifty minute color film of the Manifestations of Our Lady at Fatima in 1917. There will also be a short film on the work of the Maryknoll Fathers in Japan. Mrs. George Arnold is Adult Advisor to the Committee. Lawrence Orendorff and Theresa Weedon are conducting the program.

Plan Dance

The Social Committee of the CYO announced last week that it will conduct a St. Patrick's Day Dance on Friday, March 17, from 8 to 11 p. m. in St. Joseph's High School auditorium. Music will be by the Vibrators, a local dance orchestra. The theme will be Irish and community singing of Irish melodies will be a feature. Admission will be seventy-five cents to non-members of the CYO and fifty cents to members.

Ronald Stouter is chairman of the committee, assisted by Monica Norris, Dianne Topper, Gwendolyn Shorb and James Sanders. Mrs. Lumen Norris is the Adult Advisor to the group.

PTA Smorgasbord At Thurmont

The seventh annual Smorgasbord Dinner, sponsored by the Thurmont Parent-Teachers Associations, will be held March 10 and 11 at the Thurmont High School Cafeteria. Dinners are available between the hours of 5 and 8 p. m. Friday and 4 and 8 p. m. Saturday.

In addition to the unusual feature of allowing ticket holders all they can eat, the Smorgasbord features a wide choice of dishes as well as a variety of desserts and beverages.

Tickets for this largest-single community fund raising event may be purchased at the door at the same reasonable prices as in the past years. Live musical entertainment will compliment the dinner each evening.

Sodality To Sponsor Special Day

At the monthly meeting of the Ladies Sodality of St. Joseph's parish on Monday evening it was decided that the Sodality would sponsor a day of Recollection for its members and other Catholic women on Sunday, May 7, from 11 to 5 p. m. at St. Joseph's Monastery in Catonsville. Reservations and further information can be obtained by contacting members of the committee in further information can be obtained by contacting members of the committee in charge, namely: Mrs. Paul Sherwin, Mrs. Henry Gerken and Mrs. James Adelsberger. It was also decided that the business part of future meetings will always be concluded at 8:45, leaving the members free to depart at that hour or to remain for the social afterwards.

There were 32 members present at this meeting, presided over by Mrs. Curtis Topper. The following joined as new members: the Misses Gertrude Hotaling and Shirley Dutrow; Mrs. Patrick Warthen, Mrs. Robert Warthen and Mrs. Rita Stahley.

Potomac Edison Co. To Advertise Civil War Centennial

The Civil War Centennial is being commemorated by the Potomac Edison Company for the next four years through enclosures in its monthly bills to consumers. The first enclosure with the March bill is a scene of Union troops during the period of tranquility at Harpers Ferry, W. Va., in Mar. 1861. The attractive color photograph is postcard size and can be mailed to friends and relatives who are potential tourists.

A total of 150,000 of the Civil War enclosures will be sent out each month by Potomac Edison, which has developed a program designed to promote interest in this historic area.

Another Potomac Edison promotion will be the publication of a Civil War newspaper, which will be distributed to schools, libraries and other interested persons or groups.

If you want it to be a short winter, just sign a 90-day note.—Marshalltown Times-Republican.

Invitations To Jaycee Banquet Mailed

Invitations to the Businessmen's Banquet which will be sponsored by the Greater Emmitsburg Junior Chamber of Commerce have been mailed, George L. Donner chairman of the project announced this week. The affair, which will feature the presentation of an award to the community's outstanding young man, will be held on March 23 in the VFW Annex.

The chairman announced that the invitations had been extended to both men and women operating businesses in Emmitsburg. Expectations are that a large turnout will be on hand for the affair. Admission to the banquet is free and all expenses involved will be borne by the local Jaycees. Rev. Nevin D. Smith, Hanover, will be the principal speaker at the affair.

Recipients of invitations are asked to notify Chairman George Danner of their acceptance.

EHS Players On All-County Basketball Team

Emmitsburg and Walkersville, both Frederick County champions, dominate the 1960-61 News-Post All-County Basketball Team. It marks the second year in a row in which these two teams have placed the most number of players on the two squads.

(Frederick High School players are not considered for the All-County team because the Cadets do not play county teams).

Ron Linton, Walkersville, is making his second appearance on the first team. A senior, the 6'3 Linton led the Lions in scoring this season and to their 15-4 record including the class B county title.

Terry Fleagle, Emmitsburg, is being selected for the second time, but this time he's on the first five. In 1959-60 Fleagle, one of the highest scorers in the county this year, was placed on the second team. During the 60-61 season he has led the Liners to a 15-3 record and the class C crown.

Bill Kubet of Brunswick, has been called "the best player in the county" by many of the fans in the area. He has all the moves says his coach Herb Daugherty.

Along with the Railroader ace in backcourt is Emmitsburg's Don Sweeney. Sweeney is the smallest man on the team at 5'6. He is the playmaker for the Liners and was instrumental in Emmitsburg's two victories over Walkersville plus the other 13 Liner wins.

Ron Dougherty of Walkersville rounds out the first team. Dougherty, a late starter, landed his berth on the dream team because of his consistent scoring and rebounding for the Lions. The 6'1 senior, not a high scorer, was a key man in Walkersville's drive.

On the second team, John Buttery of Middletown and Ron Dorsey of Walkersville, head up the backcourt men with John Wenner, the only junior on the second five, from Brunswick at center. In the front court there's Emmitsburg's Bill Nail and Ken Thompson of Lincoln.

Mount Enters Conference Finals

Mt. St. Mary's College, which drew a bye in the regionals of the Mason-Dixon Conference basketball playoffs, met Bridgewater in a first-round game last night of the conference finals which is being held at Catholic University in Washington.

Other pairing in opening-round games included Western Maryland vs. Randolph-Macon, Washington College vs. American University, Baltimore vs. Catholic University.

The Mount was awarded its bye by sweeping through 14 regular season M-D games unbeaten to take the North League title. Jim Phelan's outfit is 20-3 overall. The semi-finals and finals of the tournament will be held tonight and tomorrow night.

Results of Saturday's regionals follow:
At John Hopkins — Baltimore 72, Loyola 69; Western Maryland 86, Johns Hopkins 65; Washington College 86, Towson 51.

At Bridgewater — Bridgewater 71, Roanoke 68; Catholic U. 25, Gallaudet 48.

At Randolph-Macon — Randolph-Macon 94, Hampden-Sydney 69, and American 89, Lynchburg 54.

The one sure way to find missing relatives is to get rich.

Easter Seal Drive Had Humble Beginning

In the early 20's a small sewing group was started in Baltimore. Originally organized to aid the elderly person, the group became devoted to giving the handicapped an opportunity to work. In 1927, realizing the tremendous need for service in the field of the handicapped, this sewing group, with the help of Dr. William S. Baer, formed a voluntary health agency which became known as the Maryland League for Crippled Children and Adults.

Through the help of Dr. Baer, Dr. George Bennett, Dr. Allen F. Yosheff and other orthopedic surgeons, the group introduced diagnostic clinics throughout the State of Maryland. At this time, follow up and treatment were primarily handled through Baltimore, and very little more than diagnostic work was being handled in other parts of Maryland.

In 1936, the state legislature enacted a law making Services for Crippled Children a division of the Maryland State Health Department.

They took over the diagnostic clinics in Orthopedics, Plastic Surgery and Cerebral Palsy in the counties. The Maryland League withdrew its activities to Baltimore City with the exception of some handicapped adults in the counties.

A sheltered workshop for crippled adults became the major interest of the Maryland League along with health and special education problems of the handicapped school child.

Camp Greentop, a resident-camping program in the Catoctin Mountains, was a valuable project originated by the Maryland League.

President Eisenhower was a welcome camp visitor.

In 1946, after being a contributing member of the National Easter Seal Society for over 15 years, it was decided to ask the National Society to survey the state and investigate the possibilities of becoming an affiliated unit with the National group. In 1949, the Maryland Society for Crippled Children and Adults came into being, with the Maryland League becoming the Baltimore League for Crippled Children and Adults serving Baltimore City and Baltimore and Howard Counties. The Allegany League for Crippled Children which had been formed in 1933, also became an affiliate of the newly formed Maryland Society for Crippled Children and Adults.

The newly created Maryland Society set out to interest the people of Maryland in working with crippled children and adults on a

basis of helping solve the total problems of the handicapped individual. This meant utilizing all of the existing clinical facilities and informing the parent of the resources already available.

This was done through co-operation with the office of Vocational Rehabilitation, Public Health Departments and Boards of Education—through sponsoring parent, public and professional institutes dealing with the problems of the physically handicapped—through the purchase of artificial limbs, wheel chairs and braces—through the establishment of speech clinics and the introduction of nine speech therapy programs in nine counties into the respective Boards of Education classes throughout the state.

In the past few years nine treatment centers for Maryland's disabled have been established by the Maryland Society for Crippled Children and Adults and its affiliates. These treatment centers, providing direct services to the local community—such as occupational therapy, speech therapy, the loan of invalid equipment, parent counseling and public education—are located in Aberdeen, Baltimore, Cumberland, Elkton, Easton, Frederick, Hughesville, Lanham and Rockville.

previously denied. Anyone who has tried to get social security checks within the past six years, but was turned down because of too little work credit, may now be eligible.

According to W. S. King, District Manager of the Hagerstown Social Security Office, many retired workers may get social security checks because the work requirements are now easier to meet. Many workers born after 1888, and many survivors of workers who died since 1953 will be helped by this change in the work requirements. King said that no one knows exactly how many are in the area. His staff is trying to locate all those who will be helped by this change.

Anyone in the area who has turned down for retirement or monthly death payments within the last six years, should go by the social security office. The social security people can check and see if the new changes will help. The office is at 59 North Cannon Avenue, Hagerstown.

Southern States' Volume Up

Overall volume for Southern States Cooperative and its affiliates for the first six months of the 1960-61 fiscal year stood at \$98,071,826—an increase of 2.8% over the same period last year—according to a mid-year report just released.

The report was prepared for presentation at a series of 45 regional board meetings just completed at points throughout the cooperative's five-state operating territory. Southern States operates in Virginia, Maryland, Delaware, West Virginia and Kentucky.

The report—covering the period from July 1 through December 31—showed Southern States feed tonnage, down 6% for the period,

amounted to 328,317 tons. Fertilizer tonnage was up 4.4%. Total tonnage for the period was 104,781.

Seed volume—down 10%—amounted to \$1,925,769.

Miscellaneous farm supply volume for the six-month period was \$6,956,676—down 8% from last year.

The volume in petroleum products was up over 6,100,000 gallons as compared to last year—an increase of 18.5%.

Southern States grain marketing reached 7,418,375 bushels. This was an increase of 17.6% over last year.

Net savings for Southern States and its affiliates for the six-month period amounted to \$1,506,852 as compared with \$152,728 for the same period last year.

SOCIAL SECURITY NEWS

Recent changes in social security allow payments to many people

Necessity is still
The Mother of Invention

When engineers repositioned the fuel tank in the 1961 Chevrolets they also developed a deep-well cargo space in the trunk. Necessity being the mother of invention prompted perky Judy Cooper, Mountain View, Cal., to tie a clothesline onto the raised trunk lid and fill the new well with water. A washboard and detergent completed the "laundry room" for washing out those things which needed washing during a motor trip. "It worked quite well," said Judy, "we didn't have to carry an extra washtub."

YOUNG IDEAS
from Polly Ponds

Q: Is there anything a pre-teen can do to protect her skin from breaking out and looking awful, later on?

A: Indeed there is. Follow the three basic rules of cleansing, diet and rest and you'll have a good chance of looking forward to a clear, unblemished complexion during your teens.

CLEANSING: Wash your face with soap and water at least twice a day. Make sure your skin is thoroughly rinsed and dry after each of these sessions. Treat your complexion to a nightly deep cleansing with cold cream.

DIET: Try to limit your intake of candy, rich desserts, soft drinks and fried foods. Eat plenty of fresh fruit and drink three glasses of water a day.

REST: Eight hours sleep each night is your minimum—and try for ten if you've been very active during the day. Whenever you feel troubled or unhappy, learn to relax by listening to music or reading a book.

BABSON

Writes . . .

BY ROGER W. BABSON

Babson Forecasts Free Generating Power

BABSON PARK, Mass., Mar. 2—It has long been thought by scientists that the sun should some day give us free power. Unfortunately, the clouds and storms have prevented this. Furthermore, nations in different latitudes would get different amounts of sun power, and all latitudes would get varying power according to the time of year.

Harnessing Power Of Gravity

I again call readers' attention to the work which the Gravity Research Foundation of New Boston, N. H., is doing in fundamental physics. By giving grants to colleges the Foundation hopes to interest students in harnessing gravity to supply free power anywhere in small units. But first it must discover a partial insulator, or absorber, of gravity.

The Foundation now has the world's best files on gravity and is giving \$1000 annual awards for the best original essays upon the subject. These essays average over eighty a year and come from the United States, Great Britain, France, Germany, and other countries.

Discoveries In Space Exploration

While the Defense Departments of the United States, Russia, Great Britain, and other countries have been spending billions on missiles, the American Telephone and Telegraph Company has been making some very important experiments. By the use of microwaves and other processes they have succeeded in sending signals through space hundreds of miles above the earth, — with power waves "bounced" from one orbiting object, or man-made satellite, to another.

These experiments have aroused in me a great interest in "space travel." I am not interested in having men go to the moon or having the military attack any enemy from a hundred or more miles up in the air. I, however, am greatly interested in the work of the Telephone Company. This will first be used in sending messages and television waves. I earnestly watch the newspapers each day for such "Space News." Powerful Electric Waves Showering The Earth

The next step will be to capture and harness the electric waves which are coming toward us every hour of every day. They cannot be cut off by clouds or storms; they fall upon all nations equally. Their power, all of which now goes to waste, is terrific. I believe that the Telephone and electric utilities will combine to concentrate these waves over all nations and give each free power. This would be far better and cheaper than the use of uranium. My use of the words "free power" refers only to the generation of electric power. Distribution systems will continue to be needed. Hence I am more bullish on electric power company securities because they may have no generating costs.

154 Nominated For Preakness

BALTIMORE — Every known hopeful for racing's three-year-old championship was included in a list of 154 nominations announced this week for the eighty-fifth running of the \$150,000 Preakness at Pimlico on Saturday, May 20. The Preakness is the richest race in the world for three-year-olds and the middle jewel in the Triple Crown embracing the Kentucky Derby on May 6 and the Belmont Stakes on June 8.

I forecast that each of the fifty largest countries in the United Nations will have its own "transformers" in the sky securing electricity from the radiation off the thousands of galaxies in the sky. For years the astronomers have known of these galaxies and of the electrical rays they are emitting; but their intensity has been known only since the "Space Age" discoveries and measurements.

I understand that the future space program will now be under the personal attention of Vice President Lyndon Johnson. He says we may expect the landing of a planetary space craft in 1962; and in 1963 the safe landing of certain instruments on the moon. Our "Midas," under the direction of Dr. Wernher von Braun, now of the Huntsville Center, can be depended upon to make more new and important discoveries.

These governmental developments will primarily be to warn us of what the Russians, or other potential enemies, may be doing as well as to give us knowledge of impending hurricanes and other destructive forces. Although paid for by us, they will be given freely to all nations. The next step will be the study of these electrical currents which will finally be harnessed to give each free nation free power. This would do much to hasten world peace. P.S. In fairness to readers I should add that the nuclear fusion research with hydrogen (obtained from water or air or chemicals such as lithium) may even give free power before the harnessing of electric waves above described.

Homemakers' Meet

"What is the easiest and simplest way to do one's work?" This was the object of a lesson in work simplification given at the Emmitsburg Homemakers' Club meeting held Thursday afternoon, Feb. 23, at the home of Mrs. Charles Fuss. Mrs. Cregger and Mrs. Harner were the Home Management Leaders, who showed us by making baking powder biscuits how we could save time and work in the cooking chores. They made biscuits by four different methods; from scratch, rolling them and cutting with a biscuit cutter; by combining some jobs and using less materials, and using a loaf pan, and cutting the biscuits with a knife before they are baked; by using a commercial mix, and lastly, by using ready to bake biscuits. These four methods took 10, 7, 5, and 1 minutes respectively, to prepare. After tasting them,

we could see very little difference in the taste or quality of biscuits. The business meeting was conducted by the president, the minutes, and treasurer's report given. There was correspondence, and committee reports discussed. The annual meeting to be held at Hood College was discussed; hostess, the delegates, and flower arrangers were appointed. One new member was enlisted.

After the meeting was adjourned delicious refreshments were served. Watch Your Step returned to the races this winter at Hialeah after treatment at Ohio University with radio active cobalt. The horse was believed to have cancer of the bone.

Tydings Named U. S. Attorney

President John F. Kennedy announced this week the appointment of Joseph D. Tydings, 32 year old member of the Maryland Legislature from Harford County, as United States Attorney for the District of Maryland. Mr. Tydings, who has recently been the leader of a bitter legislative battle for reform in the Savings and Loan field, is a son of the late United States Senator Millard E. Tydings.

Mr. Tydings was an honor student and varsity lacross player at the University of Maryland, and he will be the youngest United States Attorney ever to take office in Maryland. He is a graduate of the University of Maryland Law School, Class of 1953, where he was on the Board of Editors of the Law Review. He was first elected to the Legislature in 1955 and re-elected in 1959.

Mr. Tydings served with the Army of Occupation in Germany in World War II. He is married to the former Virginia Reynolds Campbell of Philadelphia. The Tydings have three children, Mary Campbell Tydings, Millard E. Tydings, II, and Emlen Davies Tydings. Although Mr. Tydings has been associated with his father's

Belmont Stakes on June 8.

The nominations include the names of the first 14 horses in training from the 1961 Experimental Free Handicap and 21 different stakes races winners, according to Louis Pondfield, executive director of Pimlico. It also contains the names of six fillies, an unusually large female representation, headed by Brookmeade Stable's Bowl of Flowers, unanimous choice as two-year-old filly champion last year. Only four fillies have won the Preakness since its inception in 1873 and the last of these was Nellie Morse in 1924. Preakness nominations at \$150 each closed on February 15 for the one-mile-and-three-sixteenths classic which for the third consecutive year carries the largest added money purse ever put up by a track.

law firm, Tydings & Rosenberg, in Baltimore in the practice of law for the past eight years, he and his family make their home at Oakington near Havre de Grace, Maryland.

"With Flameless Electric Heating, We Enjoy Total-Electric Living For just \$25.93 a Month!"

This includes lighting, cooking, water heating, washing clothes, refrigeration, and the use of many, small electric appliances.

says Mr. J. Gordon Brant 214 Linden Avenue Frederick, Maryland

Heated throughout with ceiling cable, the Brant home has 1200 square feet of living area, yet they have found that electric heating costs so little. Mr. Brant points out that they especially enjoy the draft-free comfort of electric heating, and their total electric bill is just \$25.93 a month.

TWO TYPES OF HEATING EQUIPMENT

CEILING CABLE

BASEBOARD UNITS

Here are some of the reasons the Brant Family selected electric home heating. It's safe... no open flames or fumes. It's clean... electricity just doesn't make dirt. It's comfortable... even warmth, no drafts. It's flexible... temperature control in each room. It's dependable... fully automatic, trouble free. And Electric Heating is whisper quiet.

NOW NEW LOW RATE! Electric rates go Down, while other fuel costs continue to rise! Hundreds of families, like the Brants are now enjoying electric home heating. Before you buy, build or remodel, find out how you, too, can enjoy Total Electric Living.

FREE information on heating your home electrically (whether old or new) is available for the asking. Just contact our Residential Representative. His services are available at no cost. Write or phone—

THE POTOMAC EDISON CO.

Island In The Sun

This is your island in the sun... a refreshing dip in a private pool, the blue-green waters of the Caribbean beyond. Tropical palms shade the sun-splashed patio as you sit back and look forward to relaxing days ahead.

Your Jamaica vacation can be as real as this—enjoying the leisure of an afternoon in the sun at the Golden Head Beach Hotel, one of the island's newest north coast luxury resorts.

Once, sometimes twice a week, a colorful banana loading scene can be viewed from the hotel's terrace. Kerosene torches blaze in the night and the chanted lyrics of native songs reach your ears from the Oracabessa loading dock situated across an inlet.

A beautiful ridge of lush, green mountains borders the landside of the 250-acre resort

estate—which is noted for its fine continental cuisine.

At the height of the tourist season, December 15 through April 15, 128 guests can be accommodated in the Golden Head's air-conditioned private cottages or spacious rooms—each with its own terrace.

A shopping center offering a great variety of native and free port merchandise is within walking distance on the estate.

Special rates and vacation plans are available through local travel agents or the hotel directly. From mid-April through mid-December, this island in the sun is a vacation paradise all the year 'round!

SPEAKING & CARDS

CIVIL WAR CARDS

War time has often inspired card designers and manufacturers to produce special decks of playing cards. No exception was the great Civil War whose centennial we are celebrating this year.

Now on display at the Peabody Museum in Baltimore are more than 200 decks of cards covering a span of seven centuries and valued at more than \$150,000. Included among these rare decks are special packs made especially for both Union and Confederate forces during the great "war between the States."

One deck used by Union forces had for its red suit signs American flags and stars and in place of the black suit signs shields and American eagles. The kings were infantry officers in full dress, the queens goddesses of liberty and the jacks artillery commissioned officers in fatigue uniform.

A pack of "Picture Playing Cards" showing portraits of Union Generals was made by M. Nelson in New York in 1863. A Confederate pack was made in London, by Goodall, the backs

being decorated with Confederate flags. An American issue, apparently to counteract these, displays the Stars and Stripes as its back design.

The Confederacy had a deck which retained the conventional suit signs but depicted a whole galaxy of Confederate generals and statesmen including President Jefferson Davis who appeared on the nine of spades. This deck, incidentally, has even greater value as a collector's item since it was manufactured in New York City in 1863 and apparently smuggled into the South.

Another pack of Civil War cards made in New York was called "Army and Navy Cards." The suit signs were drummer boys and zouaves in the hearts and diamonds suits, and the black suits were the famous Monitor and Merrimac. In addition to the manufacturer's name, the ace of spades from this deck bears the words: "To commemorate the greatest event in naval history, the substitution of iron for wood," referring, of course, to the famous Civil War battle between the two iron-clad ships. The cards were made in 1865.

Up to the time of the Civil War, it was necessary to keep playing cards in card presses when not in use to prevent their curling up. Civil War card decks also did not have "double-headed" face cards, or rounded corners with index markings on them. These were later innovations.

"Soup Shortcut—Traditional Result"

The north wind does blow and we shall have snow... and now is the time to plan a dinner around a thick, rich, hearty soup. Potato cheese soup, a traditional Canadian food is delightful served steaming from a tureen with a variety of crisp crackers or breads, a salad and a substantial dessert such as deep dish apple pie.

- Canadian Potato Cheese Soup
1 cup hot water
2 chicken bouillon cubes
1 9 oz. package frozen French fries
2 teaspoons instant onions
3 cups milk
1 10-1/2 oz. can condensed cream of celery soup, undiluted
1/8 teaspoon paprika
1/8 teaspoon pepper
1 8 oz. package process American cheese, shredded

Combine water, bouillon cubes and frozen French fries in saucepan. Cook until potatoes are mushy, about 5 minutes. Beat until smooth with rotary or electric beater. Add remaining ingredients, except cheese. Heat. Add cheese and stir until melted. Serve hot, plain or garnished with additional shredded cheese and minced parsley or chopped chives. Yield: 4-5 servings.

Health Racketeers Bilk Millions From Afflicted

WASHINGTON — Dr. Austin Smith, President of the Pharmaceutical Manufacturers Association, said that the new Congress should launch a public crusade to stamp out a "growing quasi-medical underworld" that bilks the nation out of an estimated \$750,000,000 annually in quack cures.

He asserted that evidence taken by Senate investigators showed that some \$250,000,000 is spent each year by arthritics alone on useless quack remedies and an additional \$100,000,000 on phony cancer cures. He added: "Coexisting in our society with legitimate medical care is a growing quasi-medical underworld which grosses each year from its victims a sum equal to nearly one-half the annual sales of legitimate manufacturers of ethical drug products."

He said a full-scale investigation by Congress coupled with past warnings not only of the Cancer Society and the Arthritis and Rheumatism Foundation, but hundreds of professional and public service organizations in the health field might prevent thousands of afflicted people from falling prey to health racketeers and racketeers.

"Moreover," he added, "Congressional interest could add muscle and morale to the Food and Drug Administration in its tireless efforts to track down and weed out substandard and dangerous drugs. And such an investigation would have the enthusiastic support of the pharmaceutical industry."

Dr. Smith said the public will see the cost of medical care "decline in their lifetimes" as more drug cures and preventives replace hospitalization and costly therapy. He added: "We are going to help close down, board up hospitals all over the country in just the

way we are helping close down mental hospitals and TB sanitariums today; in the same way that we eliminated surgery for mastoids with a drug cure; in the same way that we dismissed the pneumonia ward with a drug cure; in the same way that we have enabled thousands of arthritic cripples to throw away their crutches and walk again, while we continue to seek the ultimate arthritis cure.

"We are going to find drug cures for some forms of cancer. And we are going to find preventives, even cures for some types of heart disease, for multiple sclerosis, cerebral palsy, and for other killers and cripples. These are the things we are working for today in our own laboratories and in other laboratories supported by the industry. This is the research being financed from the drugs we sell today. And tomorrow's drugs will be produced in the new plants that we finance from the profits on sales we earn today."

"So we say to every American, when he pays for a prescription that may save his life or ease his pain, he also is paying a premium on the finest life insurance in the world. He is making a small investment now that will return perhaps to him and certainly to his children a thousand-fold through tomorrow's drugs."

ALL ABOUT BABIES...

A Public Service of the National Baby Care Council

BABY FOOT CARE
By Dr. Joseph Lelyveld
Chairman, National Foot Health Council

Although it will be several months before your baby starts to walk, you must plan now to give those little feet some thought

SEZ WHO

Ore Rush Moves Onto Indian Reservation

NEW YORK — The Wild West where prospectors once made fortunes in furs, gold and land is now the scene of a new "rush" — iron ore.

Steelways, official publication of American Iron and Steel Institute, said that "rush" was instigated by the nation's steel industry in its never-ending search for iron resources essential to fuel the giant blast furnaces.

The magazine disclosed that ore prospectors of one company are now concentrated in Cibecue, Ariz., deep in the White Mountain Apache Indian Reservation where the Bureau of Mines estimated the existence of at least 10 million tons of ore.

What the steel geologists seek to determine is whether the quality of the ore justifies commercial extraction. Steelways said that though the ore is needed, the deposits not only must be large enough but also good enough to defray a cost of many millions of dollars to get it out of the wilderness and into the company blast furnaces.

Steelways said the Apache Indians stand to strongly better their economic lot if the ore "rush" develops. The Apaches were paid a \$42,100 bonus for the right to prospect a 118-square-mile section of the 2601-square-mile reservation. The agreement also stipulates that if the land is leased for mining, the tribe will get a dollar an acre per year for rental plus a royalty of between fifteen and twenty cents a ton of ore shipped from the mine.

The publication said the search for further iron ore resources in the American west involves a substantial segment of the domestic steel industry and virtually amounts to a re-

assessment of the west's mineral resources. Two major factors have led to the "re-prospecting" there — the steel industry's need for new domestic ore reserves and the industry's growing ability to beneficiate (improve) uneconomical ores.

The steel industry has spent more than a billion dollars in the last decade developing overseas sources of iron ore to meet immediate and foreseeable needs. By 1959 overseas and Canadian ores accounted for about one-third of the iron ore used in domestic steel production, up from approximately one-tenth from 1950.

Simultaneously, the industry has invested millions in the development of ore beneficiation processes. These, though expensive — its estimated that beneficiation plants expenditures for the ten year period between 1953-63 will be more than \$1 billion — make possible the use of lower grade ores remaining on the American continent after years of depletion of the higher grade ores. This, in effect, adds potentially enormous quantities of ore to our domestic supply.

and care if you want him to go through life comfortably.

In the beginning, your baby should be encouraged to creep but never persuaded to walk too soon. When a baby's muscles, balance, and confidence have developed he will stand or walk of his own accord—but when helped to stand or walk too soon the legs and feet may become weakened and their development retarded in other ways.

As soon as the child shows an inclination to stand, soft-soled shoes should be fitted, but the child's feet should always be protected with socks. Some pediatricians feel that mercerized cotton socks equalize the temperature of the child's feet and aid the body circulation.

It is extremely important that booties and first socks be properly fitted. They should be large enough to avoid any pressure on the soft, developing foot structure. One-size stretch socks, supposed to fit children of several foot sizes, can restrict the foot like tight shoes as the foot grows and cause toes to curl under.

The proper sock for a child's foot is one that extends a good half-inch beyond the longest toes. Many mothers prefer moisture-absorbing durable mercerized cotton yarn.

The first-step shoes, as well as the first walking shoes should be at least three-quarters of an inch longer than the toes (which is the width of your thumb), and wide enough so that you can draw the leather slightly together with your fingers over the top of the toes.

Although every foot has its own growth schedule, most size changes take place every one to two months up to the age of six. When shoes or socks become too tight, they constrict the feet, deform

the toes, and prevent the feet from functioning freely.

Foot growth and shoe sizes should be re-checked every few months. Both feet should be measured and the longest and widest measurements accepted as the correct size.

If you think your child is developing any kind of foot trouble, have his feet examined by a podiatrist, chiropodist, or orthopedist who can also advise you about the right kind of socks and shoes for your baby's feet.

Excessive Speed Factor In Accidents

Excessive speed was a factor in 37% of the fatal accidents which occurred during the last year in Maryland, stated the Maryland Traffic Safety Commission. In recent years speed, unsafe for conditions has been a contributor to 175 or more fatal accidents annually in our state. The tendency of people to appraise their driving skill solely in terms of speed plays no small part in this annual highway tragedy, the Maryland Traffic Safety Commission pointed out. When a motorist drives too fast an accident is more likely to happen, the Commission emphasized and when it does those involved are more likely to be killed.

"Stopping distances increase as speed increases. Good brakes can stop a car within 25 feet at 20 miles an hour but it takes 188 feet to bring a car to a stop at 50 miles an hour." "Another danger of speeding is a condition similar to 'Tunnel Vision' in which drivers are less able to see objects on either side of them, contributing to sideswiping and passing accidents. One study has

shown that this condition effects all drivers at speeds over 60 mph or more.

These dangers all make good reasons for everyone to cooperate to their greatest ability. Therefore, The Maryland Traffic Safety Commission requests everyone to give heed to the following six-item "Safe Speed Check List":

1. Drive at a speed so you can stop in the assured clear distance ahead.
 2. Slow down before you get to curves and intersections.
 3. At night, drive at the speed which will let you stop within your headlight range.
 4. Drive with traffic. You are probably going too fast if you are passing many cars—Too slow if many are passing you.
 5. Where children are playing, be able to stop in a car length or less.
 6. When you are tired or inattentive, stop.
- If every driver will develop the

habit of following these check points, the purposes of the Maryland Traffic Safety Commission will be accomplished.

Our State University

Maryland local chambers of commerce, the U. S. Small Business Administration and the University of Maryland will offer an eight week Business Management Institute beginning on April

Lectures and group discussions, which will be conducted by faculty members of the university's College of Business and Public Administration, will be held on Tuesday of each week from 7:30 to 10 p. m. in the auditorium of the Health Science Laboratory on the Baltimore campus.

Weekly institute small business subjects will include problems; or-

Tea For Three

Lee Tracy and Leora Dana, stars of the current Broadway hit comedy, "The Best Man," take time out between acts for a cup of tea with Mrs. Helen Britt (left), home economics director of The Nestlé Company. During a recent matinee performance of the play, Mrs. Britt, who is an old friend of Miss Dana's, went backstage to say hello and was invited to join Mr. Tracy and Miss Dana in an impromptu intermission tea party in his dressing room. Mrs. Britt was pleasantly surprised to find a handy hot plate and Instant Nestlé tea are dressing room standbys. "The Best Man" will soon celebrate the start of its second hit year on Broadway.

Brush Up On Your Dog's Health

If you've just finished wrestling with your dog—through his bath-time—you'll be glad to hear there's an easier way to keep him clean! Brush him!

This word of advice comes from Clarence C. Fawcett, dog authority of the Purina Dog Care Center. He says that regular brushings are more healthful for your pet... than frequent baths.

Here's another point to consider. When you and your dog are lathered up with soap suds... you can hardly get a good look at the condition of his skin. And that's a factor worthy of your constant attention.

Signs of ill health often show up first in the pet's skin and coat. As you brush him, keep a watchful eye ready to detect danger signals... ticks, parasites, broken skin, rashes, discolorations.

At the first sign of anything suspicious, visit your veterinarian. Give your pet this kind of health insurance... and you prolong his life by many years! Fight the temptation to save

yourself the cost of a visit to the vet's. "Do-it-yourself dog care," says Fawcett, "is not the solution... it is likely that you know more about caring for your own health—than you do about dog care."

A balanced program of health treatments will include a regular check-up at the vet's. The number one pet killer is distemper... an infectious virus disease of young dogs. Has your dog been inoculated? The vet can immunize your dog against hepatitis, an inflammation of the liver. If necessary, de-worming can be handled at the vet's too.

Do you know how to take care of your dog's teeth? The vet will instruct you in the safest and quickest way to clean tartar accumulations from between the teeth... and you can probably do the job yourself after that.

Help for Aged Build for Senior Citizens of Eight States

The Christian Benevolent Association of Greater Cincinnati, Ohio, composed of members of the churches of Christ and Christian churches, will build a non-denominational home for the aged to serve an eight-state area.

It will be located in Mt. Healthy, Ohio, just north of Cincinnati. It will serve an area including Ohio, Kentucky, Indiana, Michigan, Pennsylvania, Virginia, West Virginia and Tennessee.

Plans became a reality at a January meeting of the association, when Standard Publishing Co., Cincinnati, the firm which publishes religious materials for these churches, donated four acres of beautifully landscaped ground and a nine-room home to C.B.A. The donation includes property valued in excess of \$100,000.

According to E. Richard Crabtree, minister of Cincinnati's White Oak Christian Church and president of C.B.A., a drive will be undertaken immediately to raise funds for an additional building on the grounds. The existing home and grounds were formerly owned by Willard Mohorter, retired secretary of Standard Publishing and a member of Cincinnati's New Burlington Church of Christ. The Mohorter home is one of the oldest buildings in the Mt. Healthy area; portions were built prior to the Civil War. For many years, it has been included in the Cincinnati Garden Tour.

Upon receiving the deed, Mr. Crabtree noted, "The Standard Publishing Co. has long been a valuable servant of our brotherhood. This gracious gift adds a chapter to the long history of valuable contributions to the Restoration movement on the

This nine-room home, parts of which pre-date the Civil War, will serve elderly persons from eight states under sponsorship of Cincinnati's Christian Benevolent Association. Construction will be started soon on a new facility designed to accommodate 50 residents.

part of this great publishing house. This gift opens the way to a whole new era of benevolent activity."

He announced that at a recent meeting of the association's board of directors, a two-fold program was adopted. First, C.B.A. will begin limited operation of a home for the aged as soon as possible. Second, they will begin working towards construction of a new \$500,000 home, to house 50 residents.

Late in 1960, C.B.A. was granted a charter as a non-profit corporation by the State of Ohio. Personal gifts to the association should be directed through a local church for tax deductible purposes. The new tax law requires a non-profit organization to wait 15 months for government recognition. The Christian Benevolent Association of Greater Cincinnati is headquartered at 3675 Blue Rock Rd., Cincinnati 30, Ohio.

FAMOUS AMERICAN TAVERNS

Stonehenge in Ridgefield, Conn.

"We Charge More, We Care More, We Give More"

Stonehenge, in Ridgefield, Connecticut, is one of the most unusual of the famous inns and taverns in the eastern part of the country. Established only since World War II, it has achieved a remarkable atmosphere of antiquity in a comparatively few years. Converting a beautiful 125-year-old house was a good start in that direction, but it was something unseen, something more subtle which has truly made Stonehenge "an inn in the early Connecticut tradition" and a favorite resort of public personalities.

One does not have to look far for this elusive quality, this sense of "timelessness." It is to be found in the character of the innkeeper himself, Victor Gilbert. To make a point at once, he doesn't call himself an innkeeper; he calls himself "skinker," which in archaic English meant a taster of beers and ales. And Skinker Gilbert provides the best of traditional refreshments in the Druid Bar-Parlour of his inn. The inspiration for a different kind of inn was genuinely acquired. During the war, while stationed near historic Stonehenge on England's famed Salisbury Plain, the idea for a "dream inn" came to Skinker Gilbert. The dream inn would have the best, house the best and be the best. The dream has been substantially realized, at some expense to both the host and guests.

"We charge more, we care more, we give more," Skinker Gilbert says.

Few very inns have so much to give as Stonehenge—rare antique furnishings, a collection of 200 ancient clocks dating back to the 16th century, breakfast in bed until noon, sixty-five acres of lovely field and woodland. And, on the modern comfort side—a heated swimming pool, television and radio in every room, outside window thermometer, color telephone in every bedroom and every bathroom and a superb pianist in the Druid Bar-Parlour, where one cannot refrain from raising one's mug of beer and crying "Wassail!"

What is Stonehenge? An unknown poet said, "It is the roofless past; man's ruinous myth; his uninterred adoring of the unknown..."

Skinker Gilbert has put a roof on his Stonehenge where it is possible to adore the unknown in easy comfort.

for the Perfect Wedding.

CANCER AND YOU

Editors Note—This is the third in a series of monthly columns to be published by this paper as a public service for the purpose of educating the public about their responsibilities to themselves and their families, with regard to cancer and to encourage the individual to seek prompt medical treatment if and when cancer's danger signals appear. This series is in cooperation with the Maryland Division of the American Cancer Society. The American Cancer Society is the pioneer organization in cancer control in the United States, and is the only voluntary medical health agency engaged in the comprehensive programs of cancer research, education and service.

Causes Of Cancer

Almost half a million people in this country alone fall victim to cancer each year and it kills more than 265,000. Its specific cause or causes are still unknown. It is not considered to be contagious; no proof has been produced that cancer can be "caught" from someone else.

Why cancer cells become abnormal in the first place is not known, but it is widely believed that cancer cells are the result

of mutation. Mutation can be the effect of changes of genes—changes that may produce defects and which can be inherited. Mutation can be the result of damage to the cells caused by carcinogens, mechanical irritation of tissue, radiation, infection by a virus or some unknown cause.

Although the actual mechanism that sparks the abnormal cell development in man, is still not completely understood, some conditions are so frequently associated with cancer that they are recognized as predisposing causes, or factors that pave the way for cancer.

Biological Factors

HEREDITY—is apparently not an important factor in human cancer. There is no significant proof that the common types of cancer are inherited.

AGE—cancer is primarily a disease of middle and late middle age and many cancers are the result of the natural degeneration that goes with the process of aging, or are the result of many years of some kind of irritation. The risk of developing cancer increases with age and is greater at age 20 than at birth but not by much. At age 25, the rate rises some what more for both men and women, with more cancer among women than men until the age 55. After 55, cancer is more significant among men. Although there is a higher rate

among older people, cancer is found frequently in infants and young people and in the United States today cancer kills more children from one to fifteen years of age than does any other disease.

VIRUSES—these tiny bodies that can be studied by the aid of a powerful electron microscope and which we know are the causes of certain other types of diseases (such as polio, virus pneumonia, small pox, measles and the common cold) are being intensely investigated both as a possible cause and possible treatment for cancer. Virus as a cause of malignant tumors in humans, is suspected and is the subject of intensive research going on today into the causes of human cancer.

HORMONES—a possible relationship between hormones and cancer is also being investigated. The exact connection between them is not clear but there is evidence that some hormones stimulate growth while others retard the growth of some other cancers. That hormones are associated with the growth of cancer, is apparent from a number of experiments. One example, the removal of the ovaries, prevents breast cancer in female mice known to be susceptible to it while it can be caused by injecting large doses of female hormones into mice of a strain resistant to breast cancer.

ENVIRONMENTAL FACTORS

—environmental cancer is a term covering many types of the diseases, largely preventable, acquired by people in the course of the work they do or because of how and where they live. It undoubtedly includes such factors as exposure to frictional and chemical irritants and irritation caused by habits such as cigarette smoking and to a degree air pollution.

OCCUPATIONAL EXPOSURE

—the first occupational cancer recognized as such, almost two hundred years ago, was cancer of the scrotum, common among English chimney sweeps. Chemical irritants in chimney soot were stated to be the cause but it was long before scientists knew how to prove it. Actually it was not until 1915 that two Japanese scientists proved by experiments that cancer could be caused by chemical irritants.

One of the most dramatic revelations of an occupational hazard occurred in the 1920's when it was found that a group of women, who illuminated figures on clock dials with radium paint had become ill with a strange disease. It was learned that they were in the habit of using the tongue to put a point on their brushes. Most of them had swallowed enough of the radium to cause fatal bone cancer.

CUSTOMS AND HABITS—the human race in some cases has cultivated habits and customs which have been harmful. In some Asiatic countries chewing the betel nut, chewing a mixture of tobacco and lime and smoking cigars with the lighted end in the mouth, have probably led to cancer of the oral cavity (mouth, lips and tongue). In Egypt and India a custom of keeping a heated earthenware pot next to the skin for

warmth sometimes leads to cancer of the abdominal skin. In India also cancers developed around the loin cloth because of the custom of not bathing this area.

SMOKING—in our country, more than 20 years ago, a correlation between smoking and life expectancy were pointed out by a statistician. Since then the great increase of the death rate from lung cancer has caused intensive study of tobacco smoking as a probable cause. In 20 years the disease has increased six times, the most rapid rise ever reported for non-infectious disease. Research in this field has been carried on in many countries and many independent studies show statistical relationship between smoking and lung cancer.

AIR POLLUTION—There is some suspicion that irritants in the air from automobile exhaust fumes and industrial processes cause a small percentage of lung cancers.

RADIATION—with the advent of the atomic era radiation has become the concern of everyone in the world. Scientists agree also that the large amounts of radiation caused by atomic fallout can produce a genetic defect on the reproduction cells causing mutation of cells which could be the precursor of cancer. Also they recognized that use of radiation can prove to be a most powerful weapon in the treatment of cancer when properly controlled.

Next Month's article—"The Detection of Cancer."

If you have any questions regarding cancer, please write in care of this paper. Answers will be printed in a later article.

THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE

Read Matthew 26:36-46.
"My Father, if it be possible, let this cup pass from me; nevertheless, not as I will, but as thou wilt." (Matthew 26:39. RSV.)

In anguish because He was shortly to be betrayed, persecuted, and put to death, Jesus was still positive of God's love. His surrender to the Father's will made the way clear for the resurrection and eternal life.

Because God loves us, we know we can trust Him. However, it is not easy to pray, "Thy will be done." Submission to God's will is difficult. We may reverently will in theory, but too often we steadfastly hold on to our own will in reality.

Because we know that the will of God is always best, we need to dedicate ourselves in self-surrender to reap the rewards of sincere faith.

We prove our faith when we ask for God's will to be done. We open the way for greater good to pass into our lives as God wills it for us. In Him we have growth, fulfillment, perfection.

Our Father, it is hard for us to accept and practice letting Thy will be ours. We pray for Thy spirit to strengthen us that we may conquer ourselves. Let Thy will be in us and manifested thru us. In the name of Christ, our Saviour. Amen.
Thought For Thy Day

God helping me, I will accept His will and put it to work in my life.

NAME 'EM—WIN 'EM!

WHAT'S BETTER THAN A GIFT HORSE? That's easy, two gift horses. These handsome two-year-old thoroughbred racehorses have everything but names—and owners. They are the two first prizes in the Eighth Annual Kentucky Club Derby Day Contest which has a double feature this year. The Ballydam colt, left, and a beautiful filly by the famous Roman will go to the person who comes up with winning names for them. The contest is now underway and ends on April 10. Your tobacco dealer has all the details.

"Subtle Seasonings Flavor Frozen Peas"

The subtle flavor of curry lends a true gourmet touch to this pleasing casserole of fresh frozen peas, carrots and potatoes. High in nutritional value, easy on the budget and short time needed for preparation make this a most enticing dish.

Frozen Peas In Vegetable Curry

- 1 10 ounce package frozen green peas
- 1/2 teaspoon salt
- 1/2 teaspoon sugar
- 1 cup cooked, diced potatoes (or small potato balls)
- 1/8 to 1/4 teaspoon pepper
- 3/4 cup cooked, diced carrots
- 3/4 teaspoon curry powder
- Curry Sauce, made of: 1-1/2 cups milk
- 1 teaspoon grated onion, including juice
- 2 tablespoons butter
- 1 tablespoon flour

Make curry sauce first. Melt butter, add flour, salt, sugar, pepper and curry powder and blend well. Stir in milk gradually until smooth and slightly thickened. Add grated onion, cover and cook over low heat 8 to 10 minutes, stirring constantly. Cook peas by "flavor-saver" method. Add to curry sauce along with potatoes and carrots. Let stand over low heat until all vegetables are hot.

If desired, vegetables and curry sauce may be arranged in layers in a buttered casserole, topped with buttered crumbs or potato chips, and baked until crumbs are browned (15 minutes at 375°F.).

IN THIS WORLD

THE NATION'S FIRST GASOLINE TAX WAS IMPOSED BY THE STATE OF OREGON IN 1919... PURPOSE: TO PAY FOR HIGHWAYS.

LOYAL M. GRAHAM, OREGON LEGISLATOR WHO PROPOSED THAT TAX, RECENTLY SAID: I NEVER THOUGHT IT WOULD GET OUT OF OREGON!! BUT IT DID!

TODAY EVERY STATE HAS A GASOLINE TAX. ON A NATION-WIDE AVERAGE THESE TAXES COME TO 10 CENTS A GALLON, INCLUDING A 4-CENT FEDERAL LEVY, AND THEY BRING IN MORE THAN 5 BILLION DOLLARS A YEAR.

L.M. GRAHAM OF FOREST GROVE, ORE. CELEBRATED HIS 100TH BIRTHDAY, NOV. 20, 1960.

ON JUNE 30 THE FEDERAL GASOLINE TAX IS SCHEDULED TO RETURN TO 3 CENTS A GALLON, AT THE SAME TIME SOME OTHER HIGHWAY-USER TAXES NOW SPENT FOR GENERAL PURPOSES WILL GO TO HIGHWAY FUNDS, RESULTING IN A NET GAIN OF OVER 200 MILLION DOLLARS PER YEAR FOR THE FEDERAL GOVERNMENT'S HIGHWAY FUND.

ABUNDANT LIFE

by ORAL ROBERTS
DON'T LET FEAR GET A HEAD START

A minister was driving along the highway on a cold, rainy night, headed for Colorado. He was alone in the car. Wheeling down the road, he became lost in thought.

"Suddenly," he related later, "I was engulfed in the thickest fog that I have ever seen. It seemed as if my car were literally swallowed up, and as if I were just hanging there in the midst of nothing. I couldn't see a foot ahead of my headlights.

"Fear gripped my heart. I broke out into a cold sweat, and my heart began to pound. My eyes fell instinctively to the gasoline gauge. Almost empty! Fear was getting the best of me. Suddenly I began to panic. I jammed on the brakes and stopped the car right in the middle of the highway. I couldn't see to drive, not even to pull over to the side of the road.

"Fear began to magnify itself. What would I do? Each new fear seemed to bring an onrush of other fears.

"Then the presence of God manifested Himself. Immediately a Scripture came to my mind: 'Fear not, for I am with thee.' Then I recalled the Psalmist's words, 'I will lift up mine eyes unto the hills

from whence cometh my help.' And as I glanced up instinctively, I caught a glimpse of the moon, hanging low over the distant mountains. The fog lifted as suddenly as it had overwhelmed me!

"I started the car. And just over the next hill I found a service station. I encountered no more fog that night!"

In his moment of difficulty the minister said that he began to do just what he had urged his own church members never to do. He let fear get a head start.

"That was a good lesson for me," he said. "I knew I had to begin practicing what I had preached. I believe God threw that fog at me to test my faith, to show me how important it is to trust in Him first!"

Friend, the thing for you to do is to nip fear in the bud before it gets a chance to bloom. Stop fear before it gets a head start on you. If you let fear get ahead, then you're sunk because fear will multiply upon fear, to the point that you will actually panic.

Don't let fear get a head start on you! Trust in God to see you through any difficulty no matter what it is. He'll help you. But you must give Him the chance to help.

The Outdoor Scene

The good news, after a long winter, is announced by Director Ernest A. Vaughn that trout stocking will start on all major trout streams of Maryland Friday, March 3. Mr. Charles H. Milton, Jr., Regional Fish Culturist, says 1,000 rainbow trout will be stocked in the Gunpowder River on Friday afternoon and another 1,000 on the following Friday, March 10.

As a result of predicted good weather and average stream flow, Mr. Albert M. Powell, Superintendent of Hatcheries, advises that the Fishing and Hunting Creeks will receive trout on March 3 and 10, since road conditions are satisfactory for stocking and much interest has been expressed in early fishing this year.

Mr. William E. Harman, Regional Fish Culturist, and Mr. Joseph Minke, Regional Warden, have advised that, weather permitting, they may start stocking on the 3rd and 10th, and that local papers will advise the details of this program.

Recent allocations of trout have made this early fishing possible state-wide, according to Mr. Edward M. Barry, Chief, Inland Fishery Management Division.

A list of all trout streams to be stocked for the entire trout season will appear in the newspapers next week.

Will Appear At Apple Blossom Festival

WINCHESTER, Va.—Ray Price, the Cherokee cowboy, singing star of the country music field, will be one of the headliners at the Shenandoah Apple Blossom Festival here on April 27-28-29.

RAY PRICE
The Cherokee Cowboy

A member of Nashville, Tennessee's Grand Ole Opry, Ray Price is known, through the medium of radio, records and personal appearances, to millions throughout the country. Twenty-five of his hit songs have appeared in the top 10 on national record charts in the short span of nine years. Many of his songs, "City Lights," for example, have remained on the charts for more than 20 weeks.

Ray Price and his band, "The Cherokee Cowboys," will highlight a brand new festival attraction, the Shenandoah Country Music Jubilee which, on Friday, April 28, will present four events—for Festival visitors—two morning shows at local theatres, a Country Music Contest at 6:30 p. m. and a Country Music Dance from 10 p. m. to 2 a. m.

Opening of the Country Music Jubilee will be Thursday night, April 27, when a "Get Acquainted" Dance will take place for all participants in the contest to be held the following day. The Friday Country Music Contest is expected to bring singers, bands and specialty acts from a wide area and

Ray Price himself and members of his band will be judges. Top winners in the contest will be given auditions by RCA Victor, Decca Records, Four Star Recording Company and Capitol Records.

Winner of many awards, Ray Price, in 1959 when his "Heartaches by the Number" was a top tune, won Billboard's Magazine's Disc Jockey poll and was named "Number One Country and Western Artist." His most recent award is Music Reporter Magazine's plaque for his 1960 hits, "Same Ole Me" and "One More Time."

A native Texan, Ray Price is extremely proud of his part Cherokee ancestry. His Western costumes, among the most elaborate in the country, feature an Indian chief's headdress embroidered in rhinestones.

The country music singer, one of the topmost artists in his field, studied veterinary medicine for three years at North Texas State Agricultural College before deciding music was his field. During World War II, he served with the Marine's famed Second Division on Tarawa and other Pacific beachheads. Price is an ardent outdoorsman, a skilled horseman, expert flycaster, and big game hunter. Mr. and Mrs. Price have a two-year old son, Clifton Ray. Price's current record release is "The Twenty-fourth Hour" and "Heart Over Mind."

Inquiries from prospective entrants in the Country Music Contest and from those who desire tickets for the Price shows, contest or dance should be sent to Mr. R. J. Alford, Jr., Jubilee Chairman, P.O. Box 248, Winchester, Virginia.

SPORTS AFIELD

When the Atlantic flyway is heavy with traffic of waterfowl heading southward—then salt-water fishing has changed completely. The summer varieties of fish have long since left for waters farther south and fish such as ling, cod, hake, whiting and flounders, who prefer colder temperatures, gradually move inshore.

One species of fish that is exceedingly popular with anglers sailing from many of the ports of New Jersey and Long Island is

the codfish, reports Robert D. Hall, Salt-Water Angling Editor of Sports Afield Magazine. A cod cannot be classed as a fighting game fish, for its usually runs in weight from six to 12 pounds. However, it is not uncommon to catch a fish that may tip the scales at 30 pounds. The cod is widely distributed on both sides of the north Atlantic and is found along our eastern coast from North Carolina to the area of Greenland.

Those who cannot stand the heave and roll of the winter seas should seek the more peaceful waters of the bays and rivers in search of the winter variety of flounder. This is a small-mouthed species, with its eyes on the right side, that moves inshore to the shallow water during the approach of winter and seeks the colder deep off-shore waters again as the waters become warm in the spring and summer.

North of Cape Cod the winter flounder is reported to be a year-round resident and stays in fairly shallow water as long as the water temperature remains low. South of the Cape, there is more of a pronounced inshore and offshore migration, and this movement toward shallow waters will vary according to the water temperature and the location. The winter flounder is a winter and early spring breeder, spawning from January to May in New England and during February and March in the Massachusetts Bay region.

Cod and flounders are just a few of the many species of fish that are found along our north Atlantic shores during the winter. There are also haddock, pollock, ling, frostfish and halibut. The pollock, with its greenish coloration, is one of the most active cold-water fish that inhabit our northern coast and is considered an excellent game fish because it will strike a moving lure, such as a feather jig or metal spoon.

While there is usually plenty of activity in the offshore waters

for the north Atlantic boat fishermen, we should not overlook the fact that frostfish and whiting attract hundreds of anglers to the fishing piers that jut seaward from the northern coast of New Jersey. It is not unusual to see piers, black with dense crowds of fishermen when the winter run of these fish takes place.

DAILY DIET

WEIGHTY EVIDENCE of need for "economic freedom in transportation," says David I. Mackie, chairman of the Eastern Railroad Presidents Conference, is contained in these 300 pounds of government reports. In Pittsburgh speech, Mr. Mackie urged "the nation's youngest President" to free the railroads, "the nation's oldest regulated industry," from "74 years of economic slavery." He announced that the railroads have established a four-point "emancipation" program for 1961.

Wonderful World by WALDMAN

During International Geophysical Year, collaboration between our U.S.A. and the Union of South Africa accounted for much knowledge gained by observation of artificial satellites. "Moon-watching" teams operated throughout S. Africa.

The two U.S.A.'s co-operate in rewarding student exchange programs. South Africans visit America to study education, journalism, theology and science. Americans come to S.A. under Smith-Mundt, Fulbright and other programs.

American capital and skill have played important roles in S.A. industrialization since the end of World War II. Our investments in the Union amount to about \$500,000,000. Many large U.S. companies have built factories in the other U.S.A. K

Finland has 60,000 glacial lakes.

Not A Flying Saucer—It's A Floating Marina

Anchored near yachting centers, this proposed seagoing marine store complete with snack bar and showers would make gasoline, fishing tackle, bait, boating supplies, first aid and radio-telephone service available to passing small craft. The marina was designed by the aluminum market development group of Olin Mathieson Chemical Corporation for the Lone Star Boat Company, Plano, Tex., which is exhibiting this artist's rendering in boat shows around the nation. The aluminum marina would be powered by two large outboard motors, concealed below decks and controlled from the domed cockpit. The 35-foot long structure could be hauled overland on highways, with side sections of the main deck and canopy folded upward and wheels added so it could be towed like a trailer. Lone Star is evaluating the design for possible production.

Wife Can Pitch In To Install Insulation

One do-it-yourself project around the house that isn't limited to the man of the house alone is installing insulation. Putting mineral wool in place in attic floors and in walls and ceilings that are accessible is a job the entire family can tackle. Batts or blankets of mineral wool are light and easy to handle. Husband and wife working together can make the job go fast, one measuring and cutting, the other stapling.

CARD OF THANKS

May I take this opportunity to thank the wonderful friends who helped in any way in our emergency recently. To the Civil Defense for emergency helicopter service for my step-brother, Chester Sartwell, to the State Police for their assistance, to Edgar Emrich who spent hours in our behalf, to Robert Saylor who organized the gang of men who took over the chores and made it possible for fuel, dairy feed, etc. to be delivered, to Charles Eyer Jr. and Marshall Sharrer who helped to get the milk out and open the road, to Francis and Jimmy Hobbs who so kindly bulldozed our road after the County officials (excluding Mr. Emrich) flatly refused us any help at all in clearing our road; to Mollie Buchana for her efforts in my behalf, to Dr. Carr who attended our animals immediately. Our loss would have been much more were it not for the combined efforts of everyone who cared. Mr. Grant Long and Roy Sanders, who are still on the job for me, again my sincere thanks. May God Bless each and everyone.
Alta R. Eckenrode 1t

VFW Auxiliary

Will Distribute Clothes To Needy

The Frederick Chapter of the Red Cross and the VFW Auxiliary are cooperating in the distribution of clothing to the needy in the Emmitsburg District it was announced this week.

Present plans call for the distribution of the clothing at the Emmitsburg VFW Post Home. On each Wednesday of every week, until further notice, members of the Auxiliary will be on hand to pass out clothing to those desiring it, on the second floor of the veteran's building from 10 a. m. to 3 p. m.

The clothing is being gathered by students of these schools: Lewistown Public School, Thurmont and Emmitsburg Public Schools and the Mother Seton School. Anyone in need of clothing is welcome to it free of charge and this includes the whole northern end of Frederick County.

Thurmont Cooperative Meeting Rescheduled

The annual stockholders meeting of the Thurmont Cooperative, Inc., which was postponed recently due to weather conditions, will be held Thursday, March 16 at the Thurmont High School beginning at 7:00 p. m.

The election of three directors will be held and business and educational reports given. The guest speaker, George M. Myers, manager of distribution and development services, Pennsylvania Farm Bureau, Harrisburg, Pa., will give the main talk and special musical presentation by Miss Mildred Trevvett and the school music department will be given. Door prizes will be awarded and refreshments will be served by the Room Mothers following the business meeting.

Bank Elects

At the recent regular annual meeting of the stockholders of The Detour Bank the following directors were re-elected: Arthur W. Clabaugh, Edgar G. Emrich, Earl H. Hoffman, Robert R. Saylor, William J. Stonesifer and John Wood. D. Leonard Reifsnider was elected a director to take the place of his father, the late David B. Reifsnider.

The board held its organization meeting and elected Mr. Wood as president, Mr. Emrich as vice president, Mrs. Mary Ellen Catlin as cashier and secretary, Miss E. Jeannette Blacksten as assistant cashier and Mrs. Kathryn F. Coshun as bookkeeper. Wood and McIntire serve as counsel for this bank.

Did you hear about the little country gal who always went out with the city fellers because farm hands were too rough?—Jax Air News, Jacksonville, Fla.

Scout Leaders Attend Meeting

The Committeemen of the Scout Troop and Explorer Post attended a Leader's Training Course in Frederick Monday evening. Hosts for the evening was Troop 799 from Fort Detrick. The workings of the Troop Committee was discussed and the summer program was outlined. Those making the trip were: Neighborhood Commissioner Bill Sanders; Explorer Post Committeemen, Sterling White, John S. Hollinger, George Danner, John Gilman and Advisor, Edward Houck; Troop 284 Committeemen, Ernest Rosensteel, Roger Zurgable and Bill Sanders; Eugene Rosensteel sat in for the newly forming Cub Pack in Emmitsburg.

Attend Roundtable

Explorers Terry Byard and Ronald Stouter attended the Explorer Roundtable along with Advisor J. E. Houck and Scoutmaster Robert Simpson, Tuesday evening in Frederick. These Explorers will chairmen the Ticket Committee for the Francis Scott Key Explorer Ball to be held in Frederick in April. Explorer Post 265 will also open the March Roundtable with a color guard from the post.

Order Of The Arrow Meets

The Francis Scott Key District Order of The Arrow held a meeting at Fort Detrick Sunday afternoon. Members from Emmitsburg attending were: Jerry Rightnour, Robert Wagerman, Jeff Zurgable, Joseph Eckenrode and Advisor J. E. Houck. Emmitsburg was appointed to make the trail markers for the Francis Scott Key Trail being laid in Frederick County. Elections in Scout units was discussed with the Emmitsburg election team going to Thurmont and Myersville while Myersville will hold elections in Troop 284 and Post 265.

Among many East African tribes, which prize cattle highly, the highest compliment a swain can pay to his maiden is to imply that she is bovine.

PERSONALS

Robert Gelwicks, Baltimore, visited over the weekend with his parents, Mr. and Mrs. Earle Gelwicks.

Mr. and Mrs. William Hopkins, York, spent the weekend at the home of the latter's parents, Mr. and Mrs. Clarence Wachter.

Daniel Saffer, Baltimore, spent the weekend with his mother, Mrs. Marie Saffer.

Mr. and Mrs. Wilbur Overholzer, Philadelphia, visited during the weekend with Mrs. Overholzer's father, Felix Adams.

Allen Sanders, Bethesda, spent the weekend at the home of his parents, Mr. and Mrs. Clarence Sanders.

Mrs. Mary C. Fuss celebrated her 96th birthday Wednesday.

Mr. and Mrs. Dale Shields and family have moved into their newly constructed home on Toll Gate Hill.

1961 Rose of the Year

In a landslide victory, Americana, a brilliant red hybrid tea, has been elected the 1961 Rose of the Year by the 10,000-member home rose testing panel of the Jackson & Perkins Company.
The name, Americana, is particularly appropriate since the red rose has always been the favorite flower of the American people. Further, Congress is considering legislation to make the red rose the official flower of the United States because of its overwhelming popularity.
Americana is the newest development in a distinguished line of red hybrid teas. One parent is the famous New Yorker which is rated among the top roses of all time. Both Americana and New Yorker were hybridized by E. S. Boerner, plant research director and secretary of the Jackson & Perkins Company.
Americana's rich color intensifies as the flowers unfold and its petals take on a velvet sheen which gives them a rich, textured appearance in the sunlight.
A red rose always makes dramatic arrangements for the home and Americana will be a particular favorite for table settings and other floral pieces. Its rich color and texture make it a striking focal point of color both indoors and out.
Reports from members of the home rose testing panel indicate that Americana is a standout performer in every section of the country, and that it will be a great favorite among exhibitors.

OFF AND RUNNING by John I. Day
Locking The Barn Door
Fifteen years ago, on January 15, a group of race tracks belonging to the Thoroughbred Racing Associations, Inc., took steps to lock the barn door before the horse was stolen — or tampered with, or substituted for a ringer. It was on that day that Spencer J. Drayton opened the offices of the Thoroughbred Racing Protective Bureau. This investigative organization went into operation on a nationwide, round-the-clock schedule with a let-the-chips-fall-where-they-may mandate from the TRA tracks and a half-million dollar working budget. Today 44 tracks fly the TRA banner, which means they operate under a Code of Standards suggested by Drayton and subscribed to by the program of the TRPB. This unique organization has been the envy of other sports, and proof of its effectiveness is the fact that racing has not suffered a headline-making scandal since the TRPB went into operation. The lip-tattoo system of horse identification has eliminated the ringer (a good horse running in the name of a poor one for betting purposes) and a fingerprint program keeps the hoodlum, racketeer or would-be fixer out. Fact finding is the backbone of the TRPB and integrity its objective. The sport that George Washington enjoyed as a participant and official is today the country's most popular with annual attendance of close to 34,000,000.

SPENCER J. DRAYTON

Red Strategy Revealed
 MANILA, The Philippines: — The Communists are working with a plan here in the strategic Philippine islands precisely like the one used to bring Castro to power in Cuba—a pattern or blueprint for conquest that they are carrying on with very little variation in nations throughout the world. Through channels of contacts which cannot be revealed, I have secured a copy of a highly secret Communist document containing the basic strategy for eventual conquest of the Philippines without a Russian or Chinese soldier being in action.

The Reds propose to conquer the Philippines by agitating for "Nationalism" and gaining control of the movement as it moves toward decisive power. The Communist document I obtained is more than 90 pages long. It is entitled "A Call to Unity for Independence, Prosperity, and Peace." From it, all the thousands of Communist agents, working in the press, the government, the schools and colleges, the labor unions, in professional and religious groups, and elsewhere, must take their cues for propaganda and action.

The document is very much like a textbook for Communist revolutionaries. It sets forth voluminous arguments for all the points considered pertinent for propaganda, agitation, influencing the thoughts of the masses, controlling the actions of the people. Americans, who established most of the production facilities of the Philippines and whose investments have lifted the country a substantial degree out of its onetime abject poverty, are labeled "foreigners" and "capitalists" exploiting the

Indians of Venezuela used to capture and eat electric eels. They drove horses into the eel waters to absorb the initial attacks and caught the eels after they had exhausted their power.

Ladies Spring Blouses and Skirts Just Arrived!
HOUCK'S
 Emmitsburg - Md.

resources and the people of the islands for purely mercenary purposes.

It is important for all Americans to know just what kind of enemy confronts us world-wide, and how he is outsmarting us at every turn. Thus some excerpts from this secret Communist document are in order: "The exploitation of Filipinos by aliens has not stopped in spite of the grant of independence. Seventy per cent of the domestic trade, 80 per cent of the foreign trade and 75 per cent of the manufacturing industries are held by aliens. The wealth exploited from the sweat of the Filipinos totaled over P2 billion a year, equivalent to the income of ten million Filipinos. Each foreign capitalist in the Philippines makes about P100,000 (\$3,000) a year, while each Filipino receives only P220 (\$66.00) annually."

Red Demagogues
 This is the line the Communist publication feeds to the farm and industry workers: "The life of the Filipino worker confirms the sayings that, 'We did the planting, milling and cooking, while the foreigners and their stooges fattened themselves eating the food. The Filipinos are hungry slaves in their own country which is described as free!'"

"It is naturally unbearable for the exploited aliens to see the exploited people become free and prosperous. How many revolts staged by the Filipinos were cruelly suppressed by the Spanish friars before victory was achieved in 1896? How much force and deception were used by the imperialistic Americans to wrest away the freedom of the Filipinos for which they invested their blood and their lives?"

This is precisely the same hue and cry used by Castro in Cuba, still being used by Castro and his Moscow agents. The objective for accomplishment is a state of mind among the Filipinos that will permit the Communist activist groups to succeed in their agitation for socialist government measures, nationalizing of industries, "Philippines for the Filipinos," agrarian reform and all the other pacemakers for Communist takeover.

"Hate America!"
 "The imperialistic Americans," document says, "took advantage of the weak and hard-pressed condition of the Philippines, the hospitable attitude of the Filipinos toward the American soldier, the prestige of the late President Roosevelt, and the gratitude of the Filipinos for driving out the Japanese, in order to force the acceptance of the 'agreements' that would preserve their dominance of the Americans in the Philippines, such as the agreements on the military bases, JUSMAG, Bell

Act, Parity, etc . . ."

In this, of course, they are fomenting agitation for neutralizing the American bases so important to the free world's protection against an all-out Soviet attack. Will our American leadership devise a plan to halt the Communist advance? It can be done. Citizens should write their representatives urging intelligent action on a world-wide scale to wreck the Communist blueprint for conquest.

State Unemployment Highest in Decade

Maryland and Baltimore Metropolitan Area unemployment was greater in January than in any month since the Maryland Department of Employment Security began compiling total unemployment records in 1950.

There were some 87,000 persons, representing 7.8 per cent of the labor force, without jobs over the State.

Baltimore area unemployed numbered 56,700, also 7.8 per cent of the area labor force.

Both the number of unemployed and the rate of unemployment surpassed the previous jobless record high for a month, which was reached in January, 1959. In that month, 80,500 Marylanders — 7.6

per cent of the labor force—were unemployed. Of these, 52,600 persons were out of work in the Baltimore area.

January (1961) Statewide unemployment increased by 12,600 over the 74,400 level of December 1960. The jobless rate then was 6.6 per cent. Over-the-year unemployment was higher by the even wider margin of 20,300. In January, 1960, 66,700 were without work, or 6.1 per cent of the labor force.

In the Baltimore area, January 1961 unemployment rose by 7,400 over the 49,300 listed as jobless in December 1960, when the rate was 6.6 per cent. An over-the-year comparison of January unemployment showed an increase of 13,700 over the 43,000 jobless level for the same month in 1960. The rate then was 6.0 per cent.

Total Maryland employment in January 1961, was put at 1,022,900, a 37,500 drop from the 1,060,400 employed in December. Despite the sharp over-the-year increase in idled workers, the State registered a gain of 8,700 in total employment over the same period. In January a year ago, total employment was 1,014,200.

At the same time, total employment in the Baltimore area in January—674,500—was below both December's 698,300 and the 677,500 of January last year.

Robert B. Kimble, Executive Di-

rector, traced both the over-the-month and over-the-year increases in unemployment at a variety of seasonal and non-seasonal factors.

Seasonal employment drops over the December-to-January period were noted in agriculture (3,900), food processing (1,700), construction (6,100), retail trade (17,200) and government (4,600), the latter category reflecting layoffs of temporary postal workers. The extreme winter weather in the 30-day period brought most outdoor activities to a virtual standstill and adversely affected activities in other industries as well.

Despite a negligible increase in employment in the primary metals industry (200) between December and January, unemployment in this basic industry—concentrated in the Baltimore area—was off over the year by 8,700. Other industries suffering substantial non-seasonal employment losses over the year were railroad transportation (2,800) and chemicals and allied products (1,200).

One hopeful sign in the employment picture was an over-the-month (900) and over-the-year (1,600) job increase in the shop and boat-building industry, although employment in the transportation equipment industry as a whole was off by 100 over the year.

Other encouraging signs in the overall economy were over-the-year employment upturns in government (6,700), service (4,900), retail trade (4,900), wholesale trade (1,500), transportation (other than railroad) (1,300) and apparel manufacturing (700).

The total Maryland civilian labor force in January (1961) was 1,109,900, as compared with 1,134,800 in December (1960) and 1,080,900 in January a year ago.

The total Baltimore area civilian labor force in January (1961) was 731,200, compared with 747,600 in December (1960) and 720,500 in January a year ago.

What's ticking in the world of home fashions? It's ticking. The familiar striped cotton fabric we used to see only on mattresses and pillows has gone glamorous.

Now we'll see ticking used as draperies, as upholstery, even as wall covering. Take this sleek room — perfect for city or country, as an extra guest room or a live-in-one-room apartment. The matching ticking on walls, couches and bolsters imparts unity, serenity and a custom-made neatness.

The fabric is in a muted olive green tone by Burlington Industries, the nation's largest textile organization and a trend setter of home fashions. Walls that "tick" will be one of many dramatic features at a musical review to be presented by Burlington at the National Home Fashions Show in Chicago on January 10, 1961. Manufacturers and retailers will attend — and the next step: Mrs. American Housewife will be adapting these ideas to her own home.

Outboards Move 450-Ton Underwater Theater

SILVER SPRINGS, FLA. — The world's first floating underwater theater is moved into place at the head of Silver Springs by seven boats, each powered by two 80-hp Mercury outboards. The theater, designed to give visitors a fish-eye view of underwater life, is 135 feet long and weighs 450 tons — reportedly the heaviest load ever moved by outboard power. The seven boats towed the theater more than a mile up the Silver River from its construction site. Two boats were used to steer the long, arch-shaped theater up the narrow river while the other five, whose ten Mercurys had 800 horsepower, supplied the necessary towing force to move the 900,000-lb. theater against the current and the 25-mph winds. Since the theater draws eight feet of water, it actually enlarged the channel as it moved through shallow portions of the river. The delicate one-hour moving project was directed from a 30-foot tower erected atop the theater.

LIGHT UP!

"IT IS BETTER TO LIGHT A CANDLE THAN TO CURSE THE DARKNESS."
 — OLD CHINESE PROVERB.

Early Filing Brings Quick Refund

Hurry and file your Federal income tax return now and get that refund if one is due, is the word from the Internal Revenue Service.

District Director of Internal Revenue for the Baltimore District, Irving Machiz, said that 103 to 105 million dollars in refund money is waiting for over 900,000 taxpayers in the Baltimore District.

Despite the possibility of a refund, the pace of filing is slower this year than last. Up to this date, only 57,297, an average of approximately \$101 each, have received over \$5,788,966 in refunds. We expect to receive 1,500,000 individual income tax returns by April 15. As this is a Saturday date, Monday, April 17 will be the final date this year. However, Mr. Machiz urges taxpayers not to wait until the last minute to file, as this brings more chance of all types of errors.

The Director made the following check list to prevent common errors that taxpayers make in their rush to meet the deadline:

1. File NOW.
2. Print name, address, city and state on form. If joint, both names must be affixed.
3. List social security number and occupation.
4. List proper dependents.
5. List all places of employment of W-2 statements issued by employer. You should have a statement of wages and tax withheld from each employer.
6. Attach all W-2 statements before mailing return.
7. Read instructions for proper dependents and proper deductions.
8. Check arithmetic. Be positive you are right.
9. Sign the return. If joint,

both names must be affixed. 10. If tax is due, make check payable to Internal Revenue Service. It must be paid in full with return. Address envelope, District Director of Internal Revenue, for your area.

If assistance is needed, telephone PLaza 2-8460 and ask for Tax Information Service.

Msgr. Sheridan Still In Critical Condition

The Annie Warner Hospital in Gettysburg reports that the condition of Monsignor John L. Sheridan, president of Mt. St. Mary's College, remains unchanged. His condition has been critical since he suffered a severe heart attack two weeks ago at the college.

The 68-year-old priest has been closely associated with activities of the college for nearly one-half century. He has been president of the college since 1937, and recently announced plans to retire next June.

Gold is North Dakota's most important mineral resource. It is found in the Black Hills and after more than 50 years of continuous working, the mines still yield millions of dollars in gold each year.
