## Most Anything At A Glance

BY ABIGAIL

With the South struggling along with its worst winter in half a century, I can't help but wonder how Emmitsburg escape this phenomena of nature in one of its angry moods. This week there was snow, sleet, ice and wind all around this section but aside from cold temperatures here there wasn't much to talk about. People who have lived almost a lifetime in the land of cotton and who never saw snow before saw it this week. So severe has been the weather on a national pattern that over 100 deaths are attributable to it. We indeed have been fortunate here in the Free State. Perhaps we had our share of rough weather last winter when 70 inches of snow fell and remained most of the winter. I shouldn't build up any hopes though as every time I mention the weather in this column the darn thing does a flip-flop, so hold your breath.

Anybody wondering why the Christmas decorations are still hanging in place? Checking into the matter this week I was informed that the Potomac Edison Co. would handle the matter just as soon as its workers had a few spare hours. They have been right busy lately I am told, so just be patient folks, they'll be coming down one of these bright cold mornings.

Quite a number of parents have become highly incensed over the failure of the Frederick County Board of Education to see that "complete" transportation is provided for the students at Mother Seton School. The little tots, first graders and all, are sent to walk from the Public School to their own school several blocks away. Regardless of the weather, and its zero at this writing, the little ones must get out of a warm bus and trample through snow, rain, ice, wind or what ever the elements put forth for the day. On many occasions they must sit in school the day long, soaking wet and cold and then must rewalk the entire distance once more to board busses for the journey home. Our Town Council, PTAs, other organizations and individuals have implored the Board to take some remedial action to provide this transportation but to date, after several years, the situation remains positively unchanged. Just what does it take to goad the Board of Education into favorable action? Just remember folks, in a month or so there'll be a number of politicians knocking on your doors, patting you on the back and talking jovially in anticipation of obtaining your vote. Then is your time to start talking a bit yourself. In the meantime our little ones will continue to brave the elements and when they come home sick and ill with the fever deep down in your heart you will know that all this could have been prevented by a little assistance of a few politicians and the Board of Education. It really is a sad commentary on our educational system when it proposes luxurious swimming pools in Frederick schools and Emmitsburg children still are walking to school.

## Thurmont Pastor Accepts New Charge

Rev. Samuel A. Moyer, pastor of the Thurmont United Church of Christ charge for six years, tendered his resignation last Sunday to become effective February 25, at the close of the service. The letter of resignation was read by the pastor at the close of the service at Trinity Church in Thurmont. The charge includes three churches, Trinity and Apple's at Thurmont, and Mt. Tabor Church, Rocky Ridge.

Rev. Mr. Moyer has accepted a call to Little Farm United Church of Christ, 11008 Jefferson Highway, New Orleans, La. He will take up his duties there, Sunday, March 4.

## TAX RATE REDUCED

WESTMINSTER—A tax rate of 50 cents per \$100 of assessed valuation, a reduction of two cents over last year's 61 cent tax rate, was announced Wednesday in the Westminster city budget totaling \$425,875.

## Elevated By Navy

Herbert A. Glass, son of Mr. and Mrs. Milburn M. Glass, R2, Emmitsburg, was promoted to senior chief fire control technician, USN, Dec. 16, while serving at the Dam Neck Fleet Anti-Air warfare Training Center at Virginia Beach, Va.

The center, 25 miles east of Norfolk, Va., provides a firing range extending out over the Atlantic Ocean, offering live practice in all phases of anti-aircraft warfare, detection, and tracking of enemy planes and fire control systems for guns and missiles.

Before entering the service in November 1945, Glass was graduated from Emmitsburg High School.

## Marine Society Formed At College

It was announced by the Dean of Students Office of Mount St. Mary's College, that a chapter of the national Marine Corps fraternity, the Semper Fidelis Society, has been formed on the college campus. The new chapter has been designated the Chi Chapter by the parents organization which is located on the campus of the University of North Carolina.

The Semper Fidelis Society was inaugurated in October, 1956, with the expressed purpose and objectives of preparing young men as officers in the United States Marine Corps. It aids the formal military training program of the Corps by dissemination of policies, doctrines, and vital information pertinent to a better understanding of the future responsibilities of the candidates for Marine officers. It seeks to prepare its members for the twelve week summer training program and participates in the commission ceremonies which take place each year at commencement time.

The president of the new chapter is Gerard H. Kelly, senior, son of Mr. and Mrs. Kenneth J. Kelly, Williston Park, N. Y. Other officers are to be elected.

Mr. James J. Phelan, Mount Coach and instructor of physical education, who is also a former officer in the Corps, is the Chapter adviser.

## District Governor

## Addresses Lions Club

Eighteen members were present at the regular meeting of the Emmitsburg Lions Club held Monday evening in the Lutheran Parish Hall, President William G. Morgan presiding.

Present also were three guests from the Middletown club. Honored guest and principal speaker was District Governor of District 22-W Arthur Moats and his secretary, Paul Wagner.

President Morgan appointed Joseph M. (Cy) Haley Jr. as general chairman of the 1962 Horse Show. A meeting of the Penn-Maryland Horse Show Assn. is to be held tonight in Shepherdstown, W. Va., and the club will send several representatives there to establish a date for the horse show. Rev. Philip Bower and Clarence G. Frailey were appointed Bulletin editors by the president. Following the regular meeting a directors' meeting was held with the district governor and his secretary sitting in.

## Liners Upset By Brunswick

Nine turned out to be the unlucky number for the Emmitsburg Liners Tuesday night as the Railroaders of Brunswick halted the Liners, 74-58, as they tried for their ninth victory of the campaign.

Brunswick's one - two punch of Bill Kubat and John Wenner was too much for Emmitsburg, rated number one in the Frederick News Post rankings.

Wenner notched 21 and Kubat 20, while Sweeney led the local attack with 18 points.

## Town Election Date Changed; Registration On

The Mayor and Commissioners of the Town of Emmitsburg announced this week that a change in the local voting laws had been voted on at the regular meeting of the Town Council held Monday night in the town office, Chairman of the Board J. Norman Flax presiding.

In previous years the town election was always held the first Monday in May. However, the new ruling is that the election will be held this year as early as April. The exact date for the election has been set as Tuesday, April 24, 1962. Another change announced is in the voting hours. Other years the polls were open only from the hours of 2 to 7 p. m. This year the new ruling will open the polls at 12 noon and will continue until 7 o'clock.

The Town Fathers announce that registration for voting is now taking place and will continue, until 10 days prior to the election on April 24. To be eligible to vote a citizen must have resided in the corporation for at least 12 months prior to election day and must be 21 years of age or older. To be elected this year will be a Mayor and one Commissioner.

## George L. Wilhide Re-elected Bank President

The annual stockholders meeting of The Farmers State Bank was held Tuesday afternoon in the bank building. J. Ward Kerrigan was appointed temporary chairman of the meeting and conducted the annual election of directors. Of the 4000 shares of stock outstanding, 3363 of the shares were voted, either by proxy or in person. The voting by shares was as follows: 1837 shares voted by ballot and 1526 by proxy. Judges of election were Charles F. Troxell and Dr. D. L. Beegle.

Following the stockholders' meeting the board of directors organized as follows: President, George L. Wilhide; vice president, Quinn F. Topper; secretary, Frank W. Weant. The board made the following appointments: Harold F. Birely, cashier; Frank W. Weant, assistant cashier; George Springer, teller; Mrs. Alice S. Shorb, bookkeeper; Mrs. Marie C. Rosensteel, clerk; Maryland attorney, Amos A. Holter, and Pennsylvania attorney, J. Francis Yake.

Members of the Board of Directors are Roger Zurgable, Dr. W. R. Cadle, Charles A. Elder, Clarence J. Frailey, Frank W. Weant, Dr. J. W. Houser, Quinn F. Topper, Clarence J. Weybright, and George L. Wilhide.

## County Commissioners Oppose School Consolidation

The Frederick County Commissioners expressed their united opposition to a proposed consolidated elementary school for the Jefferson and Broad Run areas at their regular meeting Tuesday afternoon at the Courthouse.

They pointed out that the plan for the new consolidated school proposed by school authorities would result in the closing of the present elementary schools in Jefferson and in Burkittsville.

Delbert S. Null, president of the board, said, "I do not think that any elementary school in the county should be closed unless the people in the community concerned clearly approve of the school closing. Closing a public school is as bad as removing a church from a community."

A. Irvin Renn, vice president of the board, expressed his opinion that, "Elementary schools should stay in the community in which they are located unless the people in the community ask for a change."

C. Burton Cannan Jr., agreed with the other two commissioners but pointed out that the Board of Education could still close the two schools without the permission of the commissioners.

However, he added that it was up to the commissioners to decide if they would provide the funds for the proposed consolidated school which would be necessary if the two local elementary schools at Jefferson and Burkittsville were closed by the School Board.

Mr. Cannon said he was in agreement with the other two commissioners in opposition to the school closings and consolidation and added that he would issue a more detailed statement on his own school views at a later date.

## CITIZENS OF TOMORROW

This week's series of "Citizens of Tomorrow" shows the following children, left to right bottom row: Tracey Ann, 3 mos., daughter of Mr. and Mrs. Ray Toms, Emmitsburg; Theodore Samuel, 8 mos., son of Mr. and Mrs. Theodore Topper, Emmitsburg; Julia, 5 mos., daughter of Mr. and Mrs. F. S. Trumbower, Thurmont. Top row, l-r: Cathy, 7 years, daughter of Mr. and Mrs. Joseph Ott, Emmitsburg; Debora Lee, 2 years, daughter of Mr. and Mrs. Lee F. Jones, R2, Thurmont; Carol Ann, 7 mos., daughter of Mr. and Mrs. Leo M. Boyle, Emmitsburg.

## Legion Auxiliary Meeting Held

The regular meeting of the F. X. Elder Unit 121, American Legion Auxiliary, met at the Post Home January 2 at 8 p. m., with eight members present. Madeleine Harner presided.

Thank-you notes were read from Irene Ohler, Gelwicks family and the Dept. of Health for Cod Liver Capsules.

The theme for the Americanism Essay this year will be, "What Can we do, as J. Citizens, to help combat Communism?"

It was reported that there were 71 paid-up members to date.

It was announced that the annual party of the Post will be held Jan. 20. Serving will be from 6 to 9 and dancing from 9-12. Admission will be \$1.50 per person. Legion, Auxiliary, Social members and 1 guest are invited. 1962 membership cards must be presented at the door.

The refreshment committee for February was appointed as follows: Anna Bushman, Beatrice Umbel and Dian Small.

Elizabeth Bowers' name was called for the door prize but was not present.

There being no further business the meeting was adjourned and the ladies joined the post for refreshments.

## Three Cars In Sunday Mishap On Rt. 15

In a mishap on U. S. 15 north of Thurmont Sunday, investigated by Trooper N. F. Bechtol, of the Maryland State Police, three cars were involved in a front-and-rear crash. Police said that all three cars were proceeding north on 15 when the two in the lead, a 1960 Chevrolet operated by Thelma L. Harding, Frederick, and a 1956 Pontiac driven by Melvin W. Finneyfrock, Frock, slowed to avoid striking a slow-moving vehicle.

The third car, a 1957 Chevrolet driven by Robert B. Eiker, Emmitsburg, failed to slow in time, striking the rear of the Finneyfrock car and forcing it into the Harding car. Total damage to the three cars was about \$550.

## Girl Scouts Meet

Girl Scout Troop 91 under the leadership of Mrs. John Chatlos, met January 4 at St. Euphemia's Hall at 4 p. m. with the president, Dorothy Humerick, presiding.

A change of officers was announced as follows: Mary Kay Sherwin is now historian and Martha Byard is the reporter.

The trip to the home for aged women was postponed until Feb. 10. Gloria Orndorff taught the girls a new game. The meeting closed with the promise and the Friendship Circle.

## 4-H BOYS MEET

Emmitsburg 4-H Boys held their monthly meeting in Emmitsburg High School Monday.

The boys practiced for the 4-H basketball tournament which will be held in Frederick on the last of January or the first of February. A practice game with Rocky Ridge is planned for Sunday.

Record books were given to the members for their 1962 records on their projects. The meeting was closed and refreshments served after the meeting. The club asked for new members.

## Observe Anniversary

Mr. and Mrs. Joseph Eyer Jr., observed their 48th wedding anniversary on New Year's Day.

## New Frontier Club Meets Here

The New Frontier Democratic Women's Club met on Monday evening in the Fire Hall in Emmitsburg with Mrs. Jane Bollinger, president, presiding. Twenty-nine members were present.

Mrs. Hazel Topper, chairman of the Ways and Means committee, with her co-chairman, Mrs. Curtis Topper, are planning a public card party to be held on February 15 in the VFW Annex at 8 p. m.

The president reported that she attended a meeting in Winchester Hall, Frederick, Dec. 28, at which plans were made to hold a gubernatorial candidates night at the West Frederick Junior High School on Jan. 25 at 7 p. m. Governor Tawes, George P. Mahoney, David Hume and Tyson Lee will be the guests. There will be music and refreshments.

The speaker at the Emmitsburg meeting was William Houck, delegate to the Maryland General Assembly, who was introduced by Mrs. Jane Nolan. Delegate Houck spoke of the apathy of the general public in elections and stressed the importance of voting in the primaries. He called attention to the fact that the Northern end of Frederick County represents one fourth of the voting population of Frederick County.

Mrs. Louise Fraley, Thurmont, was appointed historian of the club.

It was announced that the Women's Democratic League card party will be held in Frederick on Jan. 17 at 8 p. m. in the Pythian Castle Building. After refreshments, the meeting adjourned to reconvene on Monday, Feb. 12 in the VFW Auxiliary room, Emmitsburg, at 8 p. m.

## LADIES' BOWLING LEAGUE (Emmitsburg Recreation Center)

	W	L
Grange	27	12
Farmerettes	24	25
Red Birds	21	18
Ramblers	20	19
Alley Kats	18	21
Troopers	7	32

## January 4 Results

Grange 2; Farmerettes 1  
Alley Kats 2; Red Birds 1  
Ramblers 2; Troopers 1

High game, 113, R. Seidel, (Troopers), N. Toms (Ramblers), E. Fuss (Farmerettes), and M. Meadows (Grange).

High set, E. Fuss, 326, (Farmerettes).

## Scout Troop 72 Meets

Intermediate Girl Scout Troop 72 met on Tuesday evening with leaders Mrs. Charles Shorb and Mrs. Ralph Ohler. Thirteen members were present. After roll call and collections of dues the girls arranged a telephone call system to be used in case of emergency.

Secretary, Karen Shorb, announced that she had written a thank-you note to the Boy Scouts for the recent party at which the girls were guests. The group decided to prepare a short program on Mexico for March 16. Monday, January 15, is the second birthday of Troop 72. The girls will observe the Troop birthday on Tuesday when they will each wear their uniform all day. At their meeting in the evening a Troop picture will be taken. The meeting ended with a Friendship Circle.

Many a man preaches economy, but leaves it up to his wife to practice it.

## Two-Week Mission To Start Here Sunday

A two week mission will begin on Sunday, January 14 in St. Joseph's Catholic Church. The first week will be for the married and single women and high school girls and girls of high school age. The second week will be for the married and single men, high school boys and boys of high school age. The date for the children's mission will be announced later. Rev. James Twomey, pastor, was well pleased with the spiritual success the 1960 mission and hopes that each parish will co-operate one hundred per cent to make this mission prosperous. At the masses on Sunday the women will vote as to what time is most convenient for the daily masses. The first session for the women will be held Sunday evening at 7 o'clock and each week night at 7:30. The regular Miraculous Medal Novena devotions will be taken-in with the mission prayers on Monday evening. Two well-known, renowned missionaries from Toronto, Canada, Father Joseph Keefe, C.M., and Father Louis Storms, C.M., will conduct the mission. The members of the parish are earnestly requested to take an intense, active interest in this mission and to encourage their friends, Catholic and non-Catholic, to attend the exercises. The mission will consist of a course of sermons, instructions on the Sacraments, Mass prayer, commandments and precepts of the church and a daily round of religious exercises, such as the Holy Mass, public prayer, Rosary and Benediction of the Blessed Sacrament. An indulgence of seven years is granted for every sermon or instruction heard; a plenary indulgence is granted to all who make the Mission in the proper manner. Another plenary indulgence is attached to the Papal Blessing given at the end of the Mission.

Babies of the parish will be blessed on Saturday, Jan. 20 at 11 a. m. Should inclement weather prevail the blessing will be postponed to the following Saturday.

The speaker at the Emmitsburg meeting was William Houck, delegate to the Maryland General Assembly, who was introduced by Mrs. Jane Nolan. Delegate Houck spoke of the apathy of the general public in elections and stressed the importance of voting in the primaries. He called attention to the fact that the Northern end of Frederick County represents one fourth of the voting population of Frederick County.

Mrs. Louise Fraley, Thurmont, was appointed historian of the club.

## Fire Company Announces Annual Shrimp Feed

President John J. Hollinger presided at the regular meeting of the Vigilant Hose Company held Tuesday night in the Fire Hall. The president reported that the local muscular dystrophy drive netted \$35.00.

Fire Chief Sterling White reported on four fires handled since the last meeting. They were as follows: Chimney fire at the Donald Sweeney property; gas stove fire at C. G. Frailey residence; furnace fire at the Methodist Church and a house fire at the William Ohler property east of town.

The auditing committee reported it has completed its audit of the books and that the report was ready for publication. New members voted into the group and placed on the active list were: John Balmer, James E. Wantz, Carson B. Sager, Donald Sweeney and John F. Horne. It was announced that the 1962 dues are now payable. President Hollinger reported that the group had selected Thursday, February 22 at 7 p. m. as the date and the time for the annual shrimp and oyster feed. The affair is for members only and the admission has been set at \$1.00.

## SCHOOL MENU

The school lunch menu at the Emmitsburg Public School for the week beginning January 15 has been announced as follows:

Monday: Sliced luncheon meat, macaroni and cheese, stewed tomatoes, peach cobbler.

Tuesday: Hamburger on bun, french fries, cabbage and carrot salad, apricot and orange sections.

Wednesday: Creamed dried beef, mashed potatoes, peas, carrot strips, pineapple upside down cake.

Thursday: Chili Con Carne, cheese, crackers, molded vegetable salad, juice, cookies.

Friday: Egg salad and cheese sandwiches, soup, apple sauce and brownies.

Milk, bread and butter served each day.

## Senior Scouts Meet

Senior Girl Scout Troop met on Wednesday evening at 6:30. President, Phyllis Chatlos presided, treasurer Harriet Harner collected the dues and gave the financial report. Minutes of the last meeting were read. The girls decided to make favors for a county hospital. They prepared their calendar for the year. The meeting was then adjourned.

## Mount Having Great Year; Play Here Sat.

Mount St. Mary's College basketball team continued to mop up its Mason-Dixon Conference opponents this week and last weekend when they added three more victories to the win column. Saturday night the Blue and White men will engage their arch rivals Loyola on the local floor.

Last Saturday night the Phelanmen, ranked tenth in the nation among small colleges, had little difficulty plastering Roanoke, 98-69.

The victory boosted the Mountaineers' overall record to 7-2 including a 4-0 mark in the northern division of the M-D Conference.

Roanoke gave promise of offering stiff opposition when they set the scoring pace in the first seven minutes of the game. John O'Reilly sent the Mount ahead 16-14 at that point and from then on Coach Jim Phelan's outfit was in command. At half time the local outfit led 38-29.

A fine performance in the second half after sluggish play in the first 20 minutes enabled the Mount to win handily.

The game was broken wide open in the first four minutes of the second half when the Mountaineers shot ahead 54-33 on some fine shooting from the field. In the second half the Phelan-men landed 61 per cent of their tries.

O'Reilly topped all scorers with 20 points while Dave Maloney netted 17, Eddie Pfeiffer and Dick Talley 12 each, and Bill Neuss, 10. Steve Baker led the Maroons with 22.

Continuing the court war, Mt. St. Mary's chalked up its fifth straight conference victory by clobbering Western Maryland 95-74 Monday evening at Westminster.

Each team landed 31 goals but the Mount converted 33 of 45 foul tosses as compared to but 12 of 17 for the Terrors.

Western Maryland set the scoring pace in the early minutes before the Mount began to pick up steam and midway in the half Jim Phelan's outfit took the lead never to be headed. At half time the Mount enjoyed a 50-31 advantage.

Throughout the second half the Blue and White dribblers easily maintained their advantage and were never in trouble.

Dick Talley, Dave Maloney and John O'Reilly turned in the bulk of the scoring for the Mountaineers with 22, 20 and 18 points respectively.

Wednesday night's action was just another sample of the winning pattern the Mounties are showing. They easily downed Baltimore U., 85-49, here, for their 6th straight conference win without a defeat. Maloney and Talley led the scoring with 17 points each.

## LINERS MAUL SMITHSBURG

The Emmitsburg Liners led by Don Sweeney swept Smithsburg off its feet Friday night as Emmitsburg won its eighth consecutive game, 75-59.

Little Don Sweeney, smallest man on the floor was too hot for the Smithies to handle as he dumped in 16 field goals for 32 points.

Other high scorers for the Liners were Jim Hewitt and Ken Slick with 20 and 13.

Bill Zimmerman and Hewitt controlled both boards for Emmitsburg as they pulled down 32 rebounds between themselves.

35 million people in the U. S. are served every day by 68 foreign language daily newspapers. These newspapers are credited with contributing greatly toward the indoctrination of the foreign born and their children with American ideals and ideas.

PERSONALS

Ralph Keilholtz and Guy Baker Sr. were among a group of 20 men who went on a fishing trip recently to Ocean City. They returned with many fish ranging in size from four to 15 pounds.

Weekend guests of Mr. and Mrs. Ralph Lindsey were Mr. and Mrs. Robert Pallansch and children of Alexandria, Va.

Mr. and Mrs. James Brady and family, Waynesboro, visited recently with Mrs. Brady's parents, Mr. and Mrs. Clarence Sanders.

Guy Hartdagen, Baltimore, visited friends and relatives in town during the weekend.

Mr. and Mrs. Samuel Wagerman, Madison, Tenn., are visiting Mr. and Mrs. Charles Wagerman.

Visitors at the home of Mr. and Mrs. Roy Wivell and family recently were: Sister M. Cyril and Sister M. Hortense of Mt. Washington, Md.; Mr. and Mrs. Louis Topper, Mr. and Mrs. Joseph Wivell and family, Mr. and Mrs. James Wivell and family, Phil Topper, Mr. and Mrs. C. Sheffield and family, Baltimore; Mrs.

Frank Snyder, Mr. and Mrs. Henry Wivell and family, Mr. and Mrs. Bernard Wivell and family, Mr. and Mrs. Fred Hoff and family, Mr. and Mrs. Edward Reaver and family, Mr. and Mrs. Robert Wivell and Mr. Thomas Wivell.

Mr. and Mrs. Roy Wivell and children visited recently with Mr. and Mrs. Charles Wivell and family, Smithsburg.

Mr. and Mrs. Roy Wivell and children, Richard, Joan, Sammy and Roy, visited last Thursday with Mr. and Mrs. Frank Snyder and son.

Paul, Therese, Dick, Joan, Jenny Wivell and Phil Topper, visited recently with Mr. and Mrs. Thomas Wivell and family of Brookeville, Md.

Jenny, Joan, Paul, Dick and Sammy Wivell, visited recently with Mr. and Mrs. Fred Hoff and family.

Mr. and Mrs. Alfred Hahn and family visited on Thursday evening with Mr. and Mrs. Charles Eyer Jr. and family, Rocky Ridge.

Mrs. Charity Kaas quietly observed her birthday Tuesday at

her home on W. Main St.

George Eyster has returned to the University of Pennsylvania Veterinary School after spending the holidays with his parents, Mr. and Mrs. Andrew Eyster.

Miss Percy A. Shriver, St. Petersburg, Fla., has been visiting friends in the vicinity.

Mr. Frank Trumbower recently sailed on the Queen Elizabeth for the University of London where he is studying, after visiting with his wife, Sally, and his mother-in-law, Mrs. George Paxson.

Mrs. Emma Lawson, Philadelphia, is visiting with Mr. and Mrs. Clarence Sanders, Allen Sanders, Bethesda, visited during the weekend at the home of his parents.

Miss Elizabeth White, Washington, spent the weekend with her parents, Mr. and Mrs. Herbert White.

Miss Linda Humerick, Damascus, spent the weekend with her parents, Mr. and Mrs. John Humerick.

Vicky Long, daughter of Mr. and Mrs. Ralph Long, celebrated her third birthday on Friday.

Recent visitors at the home of Mrs. Regina Rybikowsky were: Paul Goulden, Washington; Mr. and Mrs. Roger Goulden and family, Towson; Mr. and Mrs. Marion Capezio Jr. and son, Timothy of Baltimore, and Mr. and Mrs. John Rooney and daughter, Catherine Regina, Montgomery, Ala.

Recent dinner guests at the home of Mr. and Mrs. Andrew T. Shorb were Mr. and Mrs. Fred Gebhart and daughter of Bonneauville; Mr. and Mrs. Thomas Shorb and daughter of Union Bridge; Mr. and Mrs. Harry Jones and daughters of Northfield, N. J.; Mr. and Mrs. Samuel Wagerman of Madison, Tenn.; Mr. and Mrs. Charles Wagerman, and Russell Overholtzer of Fairfield.

**Ford Co. Will Deliver State Cars Soon**

Paul F. Herfurth, fleet sales manager for the Washington Ford district sales office, announced today that delivery of 328 Ford Galaxie Mainliners and 30 Ford trucks for the State of Maryland will start on January 15.

The units are destined for use by the Maryland State Department of Health and the Maryland State Commission. Bids for the units were opened in December.

An additional 38 Ford Galaxie Mainliner police cars for Baltimore County Police are also scheduled for production this month. The units will feature a special DuPont Lucite reflective paint for increased safety, recognition and night time visibility. The Baltimore County Police are one of the first police units in the country to specify the new reflective paint for the safety of their officers and the convenience of motorists.

**Elect Officers**

Recently elected officers of the Blessed Virgin Mary Sodality of St. Joseph's Parish are as follows: President, Loretta Adelsberger; vice president, Mary Sherwin; secretary, Kathleen Shorb, and treasurer, Gloria Martin.

Kindness is contagious, sometimes.

Factory Built Motels, Garden Apartments

**SOMETHING NEW IN BUILDING** is being introduced by Seaboard Homes, Inc., of Hawthorne, New York, specialist in manufactured homes. For the first time in the United States in low cost motel and garden apartment units are being prefabricated for delivery to builders and motel developers throughout the country. These will cost approximately one-third prices for comparable units completely constructed at the site. Motels will average \$2,000 per room as under current motel construction, and will offer considerably lowered room charges to travelers. Garden apartments can be built to provide rentals as low as \$35 per room for apartment tenants in locations in which \$50 per room is usual. The low cost of prefabricated apartment units, some realty authorities say, could provide a practical solution for the private building industry to meet the nationwide need for real middle income rental housing.

DENIM MEN OF AMERICA

**THE CLOTHES WE WEAR**

Latest fashion news for Fall is a man's business suit made of denim—the first revolutionary use of natural fibers in years. America's 1,100,000 apparel production workers (many denim-wad themselves) produce the greatest variety and quantity of clothing in the world. 21,000,000 dozen shirts and 15,000,000 dozen blouses alone are made yearly, for the market where Americans invest an annual \$23 billion in clothing and accessories—women and children spending twice as much as men and boys! Almost non-existent before 1920, in formal wear now accounts for half of all sales of men's clothing. 2 out of every 3 shirts are for sports wear. Given to charity in the end, \$100,000 worth of used clothing is exported annually to underdeveloped areas such as Africa—where worn American shorts sell for 20 cents!

**"Little Lady" VELVETS**

100 YEARS AGO

## EIGHTY SHIPS SET SAIL IN BURNSIDE EXPEDITION

By Lon K. Savage

It was night. The lights from approximately 80 ships shone through the darkness and reflected in the waters of Hampton Roads, off Norfolk on the Virginia coast, 100 years ago this week.

Aboard the ships—it was a motely assortment of gunboats, steamers, barges, transports and supply vessels—nearly 15,000 federal soldiers and sailors talked of their forthcoming venture. Bands played on some of the ships, and the martial music blended with the men's voices and filled the air.

"The harbor probably never presented a finer appearance than on that night," wrote the commander of the expedition. Gen. Ambrose E. Burnside of the federal army. He was about to set forth on an offensive that would capture Roanoke Island in North Carolina's inland Waterway, that would give federal control over much of the Carolina coast and that would put him, Burnside, in the history books.

### Sealed Orders

Sealed orders were passed out to the ships' commanders, and when the ships set sail next night, only a handful of men knew where they were going. (In Washington, President Lincoln was implored by a public official to reveal the destination. After lengthy persuasion, he agreed: "I will tell you in great confidence where they are going, if you will promise not to speak of it to any one." The promise was given, and the President said to him, "Well, now, my friend, the expedition is going to sea!")

The expedition sailed around Cape Henry and headed south, and then, at last, the commanders opened their orders and learned their destination: Hatteras Inlet.

Despite heavy wind and fog, all of the vessels rounded the treacherous Cape Hatteras and arrived off Hatteras on the 13th.

That night, they began moving across the bar into the inlet. A supply ship ran aground and was lost; a troop transport also grounded but was pulled free by a tug; and when all the ships were safely in the inlet, only two men had been drowned.

### Another Barrier

But the voyage was far from over. The vessels crowded close against each other in the confines of the inlet, and the men looked at still another barrier of shallow water leading to Pamlico Sound and Roanoke Island.

Nearly two weeks later, the last of the ships got across that final barrier, after the men had dredged their own channel and had undergone severe hardships for lack of water.

The hardships proved well worthwhile for the Northern cause, however. It would follow on February 7th and 8th, the expedition attacked the Confederate positions at Roanoke Island, silenced them, and the troops, some marching waist deep in the mud of the swamps, carried the Confederate positions in a bloody three-hour fight.

In the fighting, 37 Union men were killed; 214 were wounded, and 13 were missing. The Confederates reported 23 killed, 58 wounded and 62 missing. But when the Yankees reported their victory, they could also report they had taken 2,650 Confederates, including 159 officers, as prisoners.

Next week: Mill Springs—The Kentucky Line is Broken.

## EFFICIENT FEEDING AND LIVESTOCK MANAGEMENT

By Dr. Gustav Bohstedt  
Emeritus Professor of Animal Husbandry  
University of Wisconsin

### Salt Is More Than An Appetizer

The medical profession has become far more nutrition conscious during recent decades than it used to be. I believe they now would disown a member of their profession who in the thirties, as health editor of a big city newspaper, wrote an article disparaging the use of salt.

He stated that salt additions to a diet had no nutritional purpose in the body, that salt was merely a condiment for which people had developed a craving, and in any event no inorganic chemical like salt could be assimilated by the body.

I wrote him to ask what authority he had for that statement. Because of his assertion held true, a whole army of research men and women would have to discard their experimental results built up over years of work with inorganic salts for humans and livestock too.

Certainly man and beast assimilate inorganic compounds. Calcium carbonate and phosphate is assimilated to serve bone and other tissue formation, and to play a very important part in body metabolism.

Iron and copper compounds are assimilated and are used in the prevention of nutritional anemia.

Iodine can be assimilated in its inorganic form of potassium iodide, to prevent goiter.

In recent years even fluorine in its inorganic form, as dis-

solved in water supplies, can be assimilated to prevent dental caries in children.

I received no reply from this health editor, although I had sent him the required self-addressed stamped envelope. He must have realized that he had spoken out of turn.

The field of medicine has made enormous advances during recent years, many in the profession having made outstanding contributions to the science of nutrition.

Physicians may have their proper reservations regarding the unlimited use of salt by some of their patients, but few of the profession now would express themselves regarding salt as did this old-timer of the thirties. Salt serves too many vital purposes and any healthy human being needs to supplement the natural salt contained in food. Its elements, sodium and chlorine, take part in respiration, digestion, and blood circulation—and are therefore identified with life itself. In addition, salt serves as a carrier of vital trace minerals for livestock providing minute amounts of such minerals as iodine, cobalt, copper, iron, zinc and manganese.

**Question:** When whole grain has passed through the digestive tract of cattle and appears in the manure, has any of its feed value been absorbed by the animal?

**Answer:** No, at least extremely little of it. The outer seed coat is a very protective shell against the effect of the digestive enzymes. Only when the seed coat is broken, and the inside laid bare, is there a digestive breakdown.

Dr. Bohstedt

moon. And understandably so. For

## Comptroller Files For Re-election

State Comptroller Louis L. Goldstein Saturday filed for re-election as the Democratic candidate for State Comptroller on the ticket headed by Governor J. Mil-lard Tawes.

With his family present, Mr. Goldstein filed for re-election in the office of Secretary of State Lloyd Simpson exactly four years to the day that he filed in 1958.

He is the third member of the ticket to file. Both Congressman Daniel B. Brewster (D-2) and Attorney General Thomas B. Finan filed early in December. Mr. Brewster is seeking the Democratic nomination to the United States Senate while Mr. Finan is seeking

election to his present post. Governor Tawes was scheduled to file for the Democratic nomination as the State's Chief Executive on Monday.

In a statement issued at the time of his filing, Comptroller Goldstein said: "My decision to seek re-election to this most important office is based on the encouragement and cooperation which my co-workers and I have received from the people of Maryland.

"I am also deeply honored and proud to be associated with Governor Tawes, Congressman Brewster and General Finan. These men have demonstrated their belief that sound governmental operations must be based on policies that are fiscally prudent yet consistent with the welfare of the people of this State.

"This type of approach has made our State a front-runner in the Nation in the area of financial responsibility. We cannot afford to risk the sanctity of this reputation.

"The greatest achievement of the present Democratic Administration is that it has been able to expand services tremendously while retaining a tax structure favorable to Maryland and its citizens.

"That this is and was being accomplished during a period marked by a rapid expansion of State Aid programs, population explosions, cost increases and the like, is a tribute to the ability of Governor

Tawes as a public administrator, to the members of his Administration and to the General Assembly.

"As Comptroller, I feel that my co-workers and I are contributing no small measure in seeing that this type of government continues.

"Our open-door policy, with the emphasis on the fact that, in our business, the most important individual is the taxpayer and that we are to serve his best interests at all times, has helped produce a new spirit in Maryland with reference to fiscal policies and financial responsibility.

"Since I have been Comptroller, there has been a reorganization of the Sales Tax Division and the Cigarette Tax Unit with the one thought in mind of providing better service to the public.

"Income tax reports are processed faster with the result that tax refunds are made within a short time after filing. Each taxpayer also is provided with a brief annual fiscal report showing how tax dollars are spent. New branch offices have been opened.

"In 1960, a Data Processing Division was established within the Comptroller's office to check spiraling clerical costs while improving our accounting and statistical procedures. This Division serves seven major State agencies.

"Training programs have been initiated. Loopholes, inequities and conflicts have been eliminated from the Alcoholic Beverages Law and improvements have been made in all departments within the Comptroller's office.

"I feel that my service as Comptroller during the past three years, my four years in the Maryland House of Delegates, twelve years in the Maryland Senate, as Floor Leader and President, eleven years on the Legislative Council and service on numerous State agencies, including the Board of Public Works, qualifies me for re-election as State Comptroller.

"It is my deep and abiding hope that the people of Maryland will afford me the privilege of serving them again in the office of State Comptroller of Maryland."

Born in Prince Frederick, Calvert County, Comptroller Goldstein, 48, is married to the former Hazel Horton. They have three children, Philip, 13, Luisa, 9, and Margaret, 7.

A graduate of Washington College, Chestertown, Mr. Goldstein received his law degree from the University of Maryland in 1938. He served in the Marine Corps

TV TODAY AND TOMORROW  
BY RALF HARDESTER  
Feature Editor of TV GUIDE MAGAZINE

DARRYL HICKMAN IS SET FOR ANOTHER SERIES, after having starred in The Americans. The new show, a half-hour nighttime series commissioned by ABC, is called Hooray for Love and is planned for the 1962-63 season. It's about married undergraduates who live in a houseboat colony off the campus of a large university . . . NBC must have had the same idea on their minds when they bought The Young Men for the same season. The new show involves four young men (not yet cast) working their way through college. The show may take over the spot now occupied by Wagon Train when that series moves over to ABC . . . Bill Leyden, out of a job when NBC canceled It Could Be You in January, may emcee Your First Impression, a new NBC daytime panel show beginning the same month. Dennis James will be one of the panelists.

Darryl Hickman  
... in new series

GROUCHO MARX'S NEW SERIES, Tell It to Groucho, and Mrs. G. Goes to College in January, will take over the spot now held by The Investigators. The last episode of The Investigators will be aired on Dec. 28. In that spot on Jan. 4 CBS may present a ballet special, but it won't be the long-promised "Noah and the Flood." Composer Igor Stravinsky is still busy with other projects . . . "My Old Man," Ernest Hemingway story, will be adapted for a forthcoming Bus Stop episode . . . Jack Benny's daughter Joan and James Mason's son Morgan will guest together on a forthcoming Joey Bishop segment . . . Then, over on the Perry Mason set, Sarah Marshall, daughter of Herbert, and Harry Carey Jr. guest on one of Perry's cases for next year . . . Victor (Man-hunt) Jory is starring in The President's Man, a new syndicated series now being prepared.

David Wayne  
... the king of B'way

DAVID WAYNE WILL STAR IN NBC's prospect for next season, Kings of Broadway. The series will be produced by Bob Banner Associates. Wayne is a Broadway star and veteran of TV's first network color series . . . Bobby Crawford gets the title role in MGM's planned Andy Hardy series . . . Madelyn Martin and Bob Carroll, original and long-time writers of I Love Lucy, are now preparing a feature film, "The Beardsley Story," for Lucille Ball . . . Richard Boone, Laraine Day, Dan O'Herlihy and the Mormon Tabernacle Choir are set for a CBS special on the afternoon of Dec. 31 . . . Here's Hollywood, reported canceled as of January, has been renewed for another 13 weeks. Music Match, which was to replace it, has been delayed at least until April.

(All rights reserved — TV GUIDE)

## WASHINGTON AND "SMALL BUSINESS"

By C. WILSON HARDER

War has been declared.

The 25 year old cold war that has been waged against the people of the United States through various administrations and different partisan affiliations by the U. S. State Dept., the international socialists, the international cartellists, and left wing professors, has now become the battle for survival.

Active hostilities were announced with the information that pressure will be put on Congress to enable the government to ally with the European Common Market, probably through an extension that would be called the North Atlantic Common Market.

A big argument that will be advanced is that the growth rate of the gross national product in Western Europe is now at an annual rate of 4.5% compared to 2.6% in the U.S.

No mention was perhaps made of the fact that the Western Europe growth rate has been greatly helped by a large share of the \$100 billion received in U.S. foreign give aways, and also to the fact that American corporations who had less than \$2 billion invested in European plants in 1950, now have over \$7 billion invested.

Cheap labor was one lure to American corporations. While the average U.S. manufacturing labor cost is now \$2.68 per hour, in Holland it's only 57 cents. In fact, the wage scale

in no European Common Market nation equals that of Sweden, which is not in the combine as yet, but even Sweden's rate is only \$1.08 per hour.

Neither will it be mentioned by proponents that European countries generally have lower taxes on business, better depreciation allowances, and other concessions to encourage business to grow. American corporations abroad escape U.S. taxes on earnings, pay usually only small taxes to the nation they operate in. If a company will locate a plant in Sicily, home of the Mafia, and some other parts of underdeveloped Southern Italy, the Italian government forgives all taxes for a ten year period.

It is not hard to imagine what would happen in New England, hard hit by the flood of cheap textile imports, if the government forgave taxes there for a ten year period.

But there is only one fly in the ointment. Cheap labor in Europe can produce a lot of goods for American firms located there. But cheap labor cannot buy much.

In the European Common Market nations, auto ownership is only 76 per 1000. In the U.S. it's 339 per 1000. The same holds true in TV and radio sets, telephones and appliances.

Thus, under guise of cementing bonds for peace, U.S. will be asked to scrap protective tariffs to bail out U.S. corporations operating in Europe.

The peril to America looms great. Probably never before has it been so important for those who believe in the American way to keep in close contact with their Congressmen.

from 1942 to 1946, rising from Private to First Lieutenant. During the war, Mr. Goldstein saw

service in the Pacific and Asiatic Theatres. He is now a Captain in the U. S. Marine Corps Reserve.

## Do You Know?

Everything in Canada is on a big scale.

Populated by slightly more than eighteen million people, Canada occupies the northern half of North America with the exception of Alaska and Greenland. And in latitude, the country extends from Middle Island in Lake Erie actually to the North Pole, with the northernmost point of land being Cape Columbia on Ellesmere Island.

In size, Canada's 3,851,809 square miles make it the largest country in the Western Hemisphere and the second largest country in the world.

Stretching across the continent from the farthest eastern point of land at Cape Spear, Newfoundland, westward to Mount St. Elias in the Yukon Territory, Canada's size is forty times that of the United Kingdom and eighteen times that of France.

Then, too, accounting for the unexcelled and almost inexhaustible fishing areas, Canada has more than one-half of the world's fresh water—29,571 square miles of it.

In one of the ten Provinces, alone, Ontario, there are 750,000 lakes which provide plenty of elbow room for vacationists and fishermen alike.

In the awe-inspiring and cloud-piercing Canadian Rockies, is located the largest national park in North America—Jasper, with an area of 4,200 square miles of mountains, alpine meadows, rivers, lakes, glaciers, valleys and one of the world's leading resorts, Jasper Park Lodge, as well as

mile-high Maligne Lake, the largest glacial lake in the Rockies; locale of many Hollywood film productions.

Canada also has the largest railroad system in North America; the Canadian National Railways, which stretches across the Continent from Newfoundland to British Columbia and northward to Hudson's Bay—more than 25,000 miles of track in addition to hotel, telecommunications, express and steamship services.

Montreal in Quebec Province, is the second largest French-speaking city in the world and the ancient and historic city of Quebec, on the north bank of the mighty St. Lawrence River, is the only walled city in North America.

## Mahoney Questions

### Tawes' Veto

Speaking on behalf of the Mahoney-Lee-Barick ticket, gubernatorial candidate George P. Mahoney this week addressed to Gov. Tawes a new question concerning his handling of regulation of the savings and loan industry.

"All over Maryland," stated Mahoney, "growing numbers of our citizens continue to be shocked and angered at the almost daily revelations of corruption and dishonesty in the savings and loan industry. To the voices of the thousands of people who have personally lost millions of dollars in savings and loan swindles has been added a growing chorus of protest from ordinary citizens concerned about the aimless drift in all phases of public affairs in Maryland."

"Five times in recent weeks I have asked Governor Tawes a question—and I shall ask him the same question five, fifty, or five hundred times more until the citizens of Maryland receive from their Governor either a satisfactory answer or an admission that he has at best committed a most serious blunder in his handling of the savings and loan scandals. That question is: Why did he veto the Tydings Savings and Loan Bill in the spring of 1960?"

"To date, Mr. Tawes' answers have been vague and unsatisfactory. He was aware, according to

Lydia Mowatt, who testified in the Senate, that he was aware of the fact that the Tydings Bill was not strong enough, that it would not have done the complete job, and that he therefore vetoed this first effort at regulation of Maryland's savings and loan industry.

"This explanation, of course, says nothing. For the next question which Mr. Tawes must answer is this: if he felt that the Tydings Bill was unsatisfactory, why did he not exercise his unquestioned influence in the legislature to have the Tydings Bill amended so that it was satisfactory? Where were the Tawes legislative leaders, who must be presumed to have knowledge of the Governor's solutions to State problems, when opportunities for amending the bill arose? Where was Governor Tawes? Despite Mr. Tawes' protestations to the contrary, the heavy majorities by which the Tydings Bill passed both the House and Senate clearly indicate that sentiment for regulation in the Legislature was overwhelming. If Mr. Tawes were at all sincere in his concern for the fate of the thousands of unfortunate depositors with money in shaky savings and loan institutions, this ought to have been his primary task in the 1960 legislative sessions.

"At the very least, therefore, he stands convicted of a characteristic abdication of executive leadership.

"But the evidence indicates that he stands convicted of much more. For while the Tydings Bill was not an ideal solution to regulation of the savings and loan industry, it by no means was as inadequate as Mr. Tawes would have our citizens believe! The Bill would have prohibited the funneling of depositors' investments into dubious second, third and fourth mortgages, and, above all, it would have focused public attention on the industry during the 14 months that elapsed before the passage of recent regulatory legislation. At least some of the 100,000 Marylanders affected by the savings and loan scandals would have been saved their portion of the \$11,000,000 already lost. Nevertheless,

the probably isn't part of the aging process at all. California has more autos—7,800,000—than 43 of our states have people.

Electronic control has been applied to bacon slicing. Next time you open a package, see if the end slice is of different thickness from the others. Albright-Nell says that final slices are gauged electronically to make the exact weights for half-pound, pound and two-pound packages. And it's automatically done in less than one-twentieth of a second. Five thousand lives usually lost in auto accidents will be saved annually by 1973 due to the improved design of the superhighways which make up the U. S. interstate highway system, says the U. S. Bureau of Public Roads. The system, which will link all major population centers, will be completed in 1972.

## The Doctor Says, Walk, Don't Ride

Walk up stairs, urges Dr. Joseph T. Freeman of Philadelphia. He contends that bone defects occur less often in persons who climb apartment house stairs than those who live in single-story homes. Steps, Dr. Freeman says, are an ideal exercise to retain muscle tone and keep a sound bone structure. Elevators, escalators and ramps may make life easier, he says, but he doubts that they make it any healthier. Parts of the U. S. Air Force X-15, an experimental rocket plane for manned space flight, grew hot as an ingot in a steel mill when pilot Joe Walker hit a record 3,920 m.p.h., almost six times the speed of sound.

Experiment of the week—Here's a simple way to demonstrate the operation of a fire extinguisher: Drop some baking soda in a glass jar. Lower a burning candle into the jar. It will continue to burn. Now pour water into the jar and lower the candle again. The flame goes out. Reason? Water reacts with the baking soda to produce a gas, carbon dioxide, which immediately smothers the flame. Many commercial and residential extinguishers operate on this principle.

Think you lose mental ability as you age? Well, University of Washington researchers have taken pot shots at this venerable assumption. A 12-year study conducted at the school indicates that there may be no particular decline in the I. Q. of elderly persons who remain healthy and vigorous and that a drop in intelli-

## A "How-To-Do-It" PAINT POINTERS

Glare from kitchen walls caused by reflection from high gloss paint can be annoying. Even though the impact of glare may not be particularly noticeable, after several hours' exposure, eye fatigue and sometimes headaches result.

Accordingly, Du Pont paint experts, with long experience controlling glare in industrial working areas, advise using satin sheen (semi-gloss) enamel on kitchen walls.

Another reason for preferring soft satin sheen colors over gloss is the high order of scrubability of these modern paints. Once upon a time, homemakers preferred gloss in bathrooms and kitchens because it was easier to wash. This is no longer true.

(Du Pont Paint Information Service)

## A New Look at the Three R's

Imagine the impact on our way of life if we could increase educational achievement in America by 80%!

According to William H. Armstrong, outstanding teacher in the famous Kent School of Kent, Conn. and recipient of the 1961 prize for the best article of general interest in the field of education by the Independent Schools Education Board, the average child actually uses only about 20% of his learning ability. This shocking but well-substantiated statement appears in Mr. Armstrong's recently published book, "87 Ways to Help Your Child in School—The Parents' Common-Sense Guide to Sound Elementary Education." Concerned with the most important thing in a child's life—his life-time career—this book outlines the best possible preparation to develop his inborn talents. It explains why elementary school years are the "golden years" of receptivity to learning and what must be done to offset the current "Relax Now—Pay Later" maxim of irresponsibility.

Even with ideal classroom conditions, how much individual attention can the most dedicated of teachers give to your child? Parents must therefore do more for the child's education than "pay school taxes and forget it." "87 Ways" is based

on the sound and newly reaffirmed theory that the communication skills (the three R's) are the most vital working tools for all educational progress. Omissions in these areas during elementary school years are tragically revealed when children move up to the secondary school; where undoing and retraining is a painful, often expensive process.

The purpose of this book is to provide the basis for a working partnership between parent, child and teacher. The gap between what your child is doing and what he could be doing can be filled by putting into practice the day-by-day practical suggestions crammed into each chapter. Some vital topics covered are: how to improve handwriting; simple steps to grasping math; how to study and review without cramming; a planned schedule of study; the art of learning to listen; reading with understanding.

Published by Barron's Educational Series, Inc., Great Neck, New York, "87 Ways," priced at \$1.95 in paperback, points out that the skills acquired during these formative years—skills that we now recognize to be as much the parent's responsibility as the teacher's—will remain with the child during all the years of his future education.

CIVIL DEFENSE siren at Winston-Salem, N. C., is installed by a fire department electrician on the Wake Forest College campus with the assistance and technical advice of Edmund P. Sullivan (on ladder), new city-county deputy CD director. Sullivan's salary is paid 50-50 by Federal and local governments as part of a nation-wide program to strengthen State and local civil defense units. (OCDM Photo)

## Louisiana Architect's Own New Home Turns Out to Be an Award Winner

What kind of a house does an architect design for his own family?

In the case of architect John J. Desmond of Hammond, La., it's a house with an extreme open plan utilizing broad expanses of glass and wide roof areas. The house won a Merit Award in the 1961 Homes for Better Living competition sponsored by the American Institute of Architects in cooperation with House and Home and Life magazines.

"The architect," House and Home commented, "wrapped outdoor areas around and between each unit of the plan, and then created almost invisible walls to extend the rooms into these outdoor areas."

The big roofs shade the glass and "... give the sense of shelter needed in such an open house," House and Home observed.

A dark shade of asphalt shingles was used for this award-winning house because it blended well with the generously wooded surroundings, Desmond said. He pointed out that light-color, heat-reflective roofing was not essential because shade trees block the sun's rays.

The use of asphalt shingles on low-pitch roofs—such as on the Desmond home—is made possible by special application methods.

The house is air conditioned, and insulated with mineral wool according to the architect's specifications to help keep out the Louisiana heat and to reduce air conditioning costs.

Architect John Desmond's award-winning home in Hammond, La., is made up of a cluster of four units linked by glass corridor. The plan is extremely open, with large glass areas, but has brick walls in key areas for privacy. The house features broad, low-pitch roofs of dark asphalt shingles which blend in with the wooded grounds. Plan features unique zoning of all living areas.

## for the Perfect Wedding.

your invitations and announcements must be flawlessly correct!

Let us show you the

"Flower Wedding Line"...

created by Regency!

NATURALLY, they're important to you! That's why we want you to see these invitations for yourself. And please don't let that costly look mislead you... the magic is in the making of these invitations! Feel that fine, sharp raised lettering. It's done by a very special process! ## ALL ABOUT BABIES...

A Public Service of the  
National Baby Care Council

By Mary K. MacDonald, R.N.  
Baby Care Counselor  
Collingswood, N. J.  
The Most Common Questions

Of all the questions mothers ask me when I visit their homes, those that have to do with diaper hygiene are by far the most com-

### Glass Brick Admits Light to Fallout Shelters

A major psychological objection to fallout shelters is the cave-like atmosphere created by the absence of natural daylight.

Now this problem may be solved by the installation of solid glass bricks that transmit light while affording full protection against radiation.

These bricks have a density — 149 pounds per cubic foot — equal to that of solid concrete. Density, or mass, is a key factor in stopping deadly gamma rays.

The Office of Civil Defense advises that the bricks meet their requirements for use in fallout shelters when substituted for concrete on an inch-for-inch thickness basis. In practice, the bricks would be installed back to back in a wall as a frameless window.

Three layers of 3-inch thick brick — 9 inches of solid glass — would give the same protection as 9 inches of concrete.

and still transmit 54 per cent of the available light. This is more light than is transmitted through a quarter-inch of the glare-reducing glass often used in modern office buildings.

According to Civil Defense authorities, light is one of the most important requisites for shelter living, ranking immediately after the absolute necessities of air, water and food.

With adequate thicknesses of solid glass bricks, enough light still would reach the interior of the shelter to allow the performance of certain tasks and ease the strain of limited battery-powered light sources. But of even greater importance would be the higher morale of those in the shelter as the result of the outside light and partial visibility.

Produced by Pittsburgh Corning Corporation, the bricks come in two sizes: 5 inches square by 2-3/4 inches thick and 3 inches square by 3 inches thick.

moon. And understandably so. For good diaper hygiene during baby's entire diaper wearing period is in the interest of baby's comfort and health.

It is because of this that I accepted the invitation of the National Baby Care Council, to participate in a series of monthly columns written by professional baby care counselors for "All About Babies" discussing diapering problems at baby's various age levels, from birth to the end of the diaper period.

This column, the first in this series, establishes the four basic steps of good diaper hygiene.

1. Change diapers as soon as possible after baby wets or soils them, but do not disturb the baby's sleep to do so. Prompt changing helps control bacteria and the breakdown of urine into skin-irritating ammonia. Wetness favors the growth of invading bacteria.

2. Adequate cleansing of the diaper area is essential. When changing the diaper of a very young infant, gently wipe the area clean with a soft cloth dampened with warm water and dry it. With older infants, use a mild soap and water solution. Rinse the diaper area free of soap and dry thoroughly.

3. It is important that the diapers be free of any soap or detergent residue. Otherwise, there's the risk of chafing baby's skin because of diaper harshness and the risk of scalding because of the possible chemical action of traces of washing materials left in the diaper. Diaper services aware of this, put diapers through six separate rinses with water temperatures ranging up to more than 180 degrees, far hotter than is available in the home.

4. Diapers should be treated with non-toxic, non-irritating antiseptic substances to inhibit the growth of bacteria when the diaper becomes wet or soiled. Diaper services automatically impregnate all diapers they process with such an antiseptic. For that matter, diaper services give baby's diapers a complete scientific treatment based on all of the mandatory steps required for proper diaper processing. Professional diaper processing is done under strict laboratory control, using specialized washing and rinsing equipment.

The next column in this series will discuss the problems of diaper hygiene of the baby from birth to two months of age.

Superstition is diminishing, according to the social scientists. Keep your fingers crossed and it may go away altogether.—Changing Times.

### Stephenson Appointed Wildlife Week Chairman

Fred Stephenson, prominent Baltimore businessman and conservationist, has been appointed the Chairman of Maryland's annual observance of National Wildlife Week, March 18 to 24, it was announced this week by Nimrod Davis, Baltimore, President of the Maryland Wildlife Federation.

The Chairman will be assisted by John Schilling, Outdoor Editor, Hagerstown Morning Herald and Malcolm E. King, Game and Inland Fish Commission.

President Davis stated that the 1962 observance will spotlight some of the problems surrounding state and national wildlife conservation. However, the event is intended to highlight problems involved with preserving continental flights of migratory waterfowl.

He added that the theme of the week is "waterfowl for the future, by conservation of wetlands which benefit man and wildlife."

Davis pointed out that the numbers of potholes, marshes, and swamps are rapidly dwindling, due largely to drainage for agricultural purposes or for use as industrial sites, airports or roads. Additional wetlands have been hit by drought. "Enough suitable wetland areas must be reserved and held for waterfowl or these resources will dwindle away to insignificance," he concluded.

As an informative aid in the program for the protection of wetlands, the National Wildlife Federation has announced the release of a booklet on wetlands preservation which was prepared by the staff. Another publication on the same subject is being prepared by the Bureau of Sport Fisheries and Wildlife for general distribution.

During this year's hunting seasons, and particularly the deer seasons, many hunters violated State laws by failing to secure permission to hunt on privately owned property, according to the Maryland Game and Inland Fish Commission. Not only were such persons subject to arrests and fines, but convicted hunters could have their hunting licenses revoked for one year. In reality this experience by 8 hunters during the month of November.

Of primary importance to all hunters is to have land available on which to hunt now and in future years. Since the State will

never be able to supply all the necessary land to accommodate the growing army of hunters, this means only one thing, that either hunters must respect the rights of farmers and other landowners, and secure permission before hunting, or face the loss of hunting privileges on private lands entirely.

### Hunting Seasons Nearly Over

The Maryland Game and Inland Fish Commission reminded hunters today that the season ended Friday, January 5, except for quail which ended January 10 and doves which ended January 6.

The goose season terminated at sunset on Monday, January 8.

Hunters need not give up the sport of going afield for there is excellent cross shooting over the entire state.

For those who enjoy following a pack of baying hounds trailing the elusive 'coon and 'possum may do so until midnight January 31; however, the season will continue until midnight, February 28 in Cecil County.

The muskrat, mink and other trapper may pursue his sport through March 15 except in Allegany, Washington, Garrett, Carroll, Howard, Montgomery and Frederick Counties where the season on muskrat and mink will end March 1.

### 1961 Deer Kill

Mr. Charles Milton, Chief Game Warden, Game and Inland Fish Commission released an official figure of 6,507 deer killed during the 1961 season. This is 325 more than in 1960, the total for which was 6,182. However, there were 12 counties open for the 1961 antlerless season as compared to 6 counties in 1960. A special antlerless season, not available last year, also added to the kill.

### Fag Tax For Conservation Use

A penny-a-pack increase in the Wisconsin state cigarette tax has been put into effect by Governor Gaylord Nelson. The pennies will go into a ten-year conservation program for outdoor resources.

The Sport Fishing Institute Bulletin, in reporting this fact,

comments as follows: "We regard this as conservation leadership of the highest order and commend the Governor for his foresight and conviction in this vital matter."

According to the same source, other states and the federal government appear to be thinking along the same lines. Secretary of the Interior Stewart L. Udall has proposed an increase in the federal cigarette tax to allow for expansion of the system of National Parks and recreation areas.

Officers Busy In November  
Hundreds of hunters and a handful of fishermen were contacted by Maryland Game and Inland Fish Commission officers during November. The contacts turned up 193 alleged violations. Eleven cases were dismissed in court.

### Cigarette Tax Distributed

State Comptroller Louis L. Goldstein this week announced that

the Cigarette Tax Unit of the Retail Sales Tax Division has just made the following distributions of \$2,615,919.99 to the 23 counties and Baltimore City from cigarette tax revenue for the October-December 1961 quarter of this fiscal year ending June 30, 1962.

These distributions represent one half of the revenue from the 6c per package cigarette tax which became effective July 1, 1961.

This tax was increased from 3c to 6c as of that date in order to raise new revenue for the subdivisions to enable them hold down their local property tax rates.

The original 3c tax imposed in 1958 was dedicated to the political subdivisions towards teachers salaries.

Yellowstone was the first park to be incorporated into the National Park System. Since then, 26 other parks have joined the System. The National Park System was set up in 1916 to manage it.

## HERE IS EASIEST WAY TO PUT ON TIRE CHAINS

It can be done in six minutes, and without a jack!

1. W. B. (Walt) Lashar, Jr., chairman of National Safety Council test committee, shows Marion Olund, Clintonville, Wis., the first step. Spread chains on the ground to remove tangles. Reinforced chains are best, and the projecting teeth or cleats should be up.

2. Then put end links of side chains on loops of "applier" and push onto tire as shown. No jack is needed.

3. It is wise to gather the cross chains up close in back of tire on some cars, so chains won't catch on back of fender when car is moved forward to encircle the rear wheels.

4. Now drive ahead one wheel revolution, until side chain fastener is near fender. Remove the spring steel wire "applier" and fasten the inside hook. Lashar shows Marion that the usually difficult inside hook can be fastened by "feel" (without getting under car) after you practice it once and learn how.

5. Marion has now learned how to put on a pair of tire chains in six minutes, the easy way. She is seen showing Joan Klemp, Clintonville, the final step—fastening the outside hook.

6. Lashar congratulates the girls on their aptitude and reads them Council's tips for safe winter driving, one of which is "always carry reinforced chains and use them for severe snow or ice conditions to help avoid traffic blockades and accidents."

STATE COLLEGE, PA.—Prof. A. E. Neyhart of The Pennsylvania State University and educational consultant to the AAA, recently advised all high school driver training teachers to include "how to put on tire chains" in their basic courses for teen-agers. This would "serve to give American youth more self-reliance, and some would teach their parents in this old fashioned virtue. It would help reduce dangerous traffic troubles such as occurred when chainless vehicles blocked snowplows, and even fire trucks, in Boston and hundreds of other cities last winter." Above photos illustrate the easiest method. Don't be a traffic blocker.

## BABSON

## Writes . . .

BY ROGER W. BABSON

## Babson Discusses Automation: Promise Of The Future

BABSON PARK, Mass., Jan. 11—Only a few years ago automation was little more than a trickle within the economy, but today it is a river and tomorrow it will be a flood. The great question is whether its obvious benefits will be outweighed by the problems that it raises—such as mass unemployment.

## Automation's Problems Will Be Solved

I have said before and I will say again that there has never been any indication that more machinery means fewer workers. Look back over the industrial history of this country, and you will find that there has been an unending outflow of more efficient machines and yet employment has soared from one new height to another simultaneously.

The sheer volume of machines to run machines is today almost incredible, and still employment keeps reaching ever higher. For the most part, our joblessness is due to an exploding population, a rather impressive group of people who would rather live on charity or unemployment insurance than work, and a reluctance to develop swiftly-paced programs to restrain and relocate workers displaced by the advance of technological improvements.

## We Are Moving Rapidly

The influx of automation has been so unexpectedly rapid that many have been badly frightened; they think we are moving too fast for our own good. Some wish they were living back a hundred years ago so they would have fewer complications; others say they wouldn't want to be around a hundred years from now with things changing at such a pace. Even the labor movement—which has some pretty fast-moving men—is frightened by automation, and some laborites are crying aloud that there may not be any jobs in a few years. Let them be assured that there will be plenty of jobs, —but many will be very different jobs.

## Facing Up To Changes

The change-over to automated production is going to spread on and on, and certainly nobody will deny that a great many workers will have to move to other jobs. This is a fact

and must be faced. Farsighted experts have often warned that, without automation, we would soon find we would not have a sufficiently large labor force to accomplish our work, introduce new products, and maintain our prosperous standard of living.

I notice that a good deal of human effort is still needed even in industries and offices where the most completely automatic processes have been installed. It is said that a factory could be built so that every step from raw material to final product could be turned out by a handful of people at pushbutton. Keep in mind, however: Human brains must still work out the entire scheme, and human hands must build, set up, start, tend, repair, and maintain—and sometimes even stop! —these "automatic" machines.

## Automation Means More Spare Time

It doesn't seem to me that we are going too fast, everything considered. It cannot be denied that we in America are materially and spiritually better off than the people of the backward nations who have not yet had any such machines. It might also be said that no workers in the world's history ever

had more healthful and attractive working conditions or received better pay than our workers today. It is the machine that has helped to bring about this prosperity, and newer and more amazing machines will bring still more in the years to come.

I am particularly impressed by the fact that high-velocity machinery and all forms of automation mean—and will continue to mean—steadily more spare time for workers. There will be a greater opportunity for enjoyment of the home and the family, for pleasant and healthy do-it-yourself pursuits. Even more important: Perhaps we can all employ some of this increasing spare time to cultivate the spiritual values which we may have been neglecting while building up purely material prosperity!

## Income Tax

## Forms Simplified

In an effort to improve individual income tax returns and make the instructions more meaningful, Irving Machiz, District Director of Internal Revenue for the Baltimore District, which comprises Maryland and District of Columbia, said this week that individual taxpayers who are required to file 1961 Federal income tax returns will have two forms to choose from instead of three.

Taxpayers will find in their income tax package the new two-page Form 1040 which combines

the better features of the first two pages of the 1960 Form 1040 and the discontinued Form 1040W.

Page one of the new Form 1040 provides space for listing the sources of income, the computation of tax either the Optional Tax Table or the Tax Rate Schedule, a listing of tax payments and credits and a computation of tax due or refund. Page two provides a schedule for listing exemptions and various schedules for itemizing deductions.

The revised Form 1040 should make the preparation of tax returns much easier for those individual taxpayers who previously filed on Form 1040 and whose income was from salary and wages and in addition did not receive more than \$200 of dividends and interest.

Those taxpayers who have previously filed on Form 1040W will also be able to use the Form 1040 for 1961 in the same manner as they have used Form 1040W in the past.

Schedules for reporting various types of income which heretofore appeared on page 3 and 4 of the Form 1040 will be contained in a separate Schedule B for 1961. Therefore, this schedule and other convenient schedules need only be completed and attached to the Form 1040 by the small percentage of taxpayers whose income consists of income other than salaries and wages or receives dividends and interest in excess of \$200.

Improved printing techniques have enabled the Service to also revise the format of the forms

package, which consists of all necessary forms, schedules and instructions, and to rearrange its contents in a more orderly sequence. Forms and schedules are now perforated for easy removal from the package thus eliminating the confusion of removing and separating bulky and sometimes unnecessary forms and schedules.

The convenient line-by-line instructions developed for assisting taxpayers in preparing their return have been inserted in the forms package to immediately follow the forms and schedules to which the instructions apply. In addition, the instructional material has been clarified by eliminating confusing and unnecessary technical language and phraseology.

Mr. Machiz further announced that there were very few changes in the simple punch card Form 1040A other than minor revisions for clarity and typography.

He urged taxpayers with income of less than \$10,000, which consisted entirely of wages reported on Form W-2 and not more than \$200 total of dividends, interest and other wages, to avail themselves of this form.

Mr. Machiz said that over \$1,600,000 packages for delivery to

individual taxpayers in the Baltimore District, have been placed in the mails and every effort was made to send each taxpayer the simplest form he can file.

The Baltimore District again is ready to provide telephone service to taxpayers. Those needing assistance may call their local Internal Revenue office. In Baltimore, the number is PLaza 2-8460. Ask for 'Tax Information Service.'

Mondays and Fridays will be Special Assistance Days when extra personnel will be on hand to insure that taxpayers requiring assistance will be given the best possible service.

Mr. Machiz added his annual timely advice—those who file early and are eligible for refunds, will receive such payments in quick order.

## TOPS FOR OLDER HOMES

Asphalt shingles are a favorite roofing material for families who prefer to buy older homes and then remodel to bring them up to date.

Since asphalt shingles usually can be applied directly over the weather-worn roofing, this eliminates the expense of tearing off the old roofing material, as well as the mess.

## People, Spots In The News

'FRANCE,' new flagship of French Line, at Saint Nazaire fitting-out dock, nearing readiness for maiden trip.

RHONDA Fleming models outfit she used to fool 'I've Got A Secret' panel (CBS Mondays); everything she was wearing was purchased at Woolworth's for total of \$12.97.

COY and cuddly as a teddybear, this Mama Bear at London zoo "fixes her hair" to look her best.

NEAT TRICK over neat trick: Multiple-exposure photography makes it appear five moons are chasing each other over Pittsburgh's new shutter-domed indoor-outdoor Civic Auditorium, itself a neat trick.

Giving thanks always for all things.—(Eph. 5:20)

The giving of thanks is so rewarding that we all want to take an active part in thanks giving. If we have an experience that makes us happy, let us tell God that we are thankful.

## Winter Months Good Time to Buy Air Conditioner

Spring, in many parts of the country, is a sort of twilight zone where temperatures are mysteriously mild one day and uncomfortably hot the next.

One way to guard against surprise spring hot spells, as well as summer heat waves, is to install one or more electric room air conditioners during the winter months.

Buying during the off season offers a number of other advantages to home owners. It gives them ample time to determine air conditioning requirements and to select the units most suitable—without the pressure of torrid weather. If the particular model wanted isn't in stock, it can be ordered and installed well ahead of time.

Although many models can be installed without trouble by the average home owner, a few types such as through-the-wall units may require professional installation. When this is the case, the appliance dealer can provide this service more readily in the off season.

Many families find they use their air conditioners in the dead of winter to freshen rooms closed tight against the weather, and when entertaining to clear the air of stale air and smoke.

A room air conditioner also is a thoughtful gift. Installed in the family or play room, it's a gift everyone in the family will appreciate and enjoy. A light, trim unit is an especially appreciated wedding present.

The newlyweds will find that many models can be put in place and removed so easily that they can take them when they move just as they would their radio or television sets.

## "EVERY LITTER BIT HURTS"

KEEP AMERICA A BEAUTIFUL

## Long May They Wave

Opposing armies fought in confusion at the first Battle of Bull Run—The flags of the Union and Confederacy were so alike! Thus, the battle banner of the South was changed, now appears on the Georgia and Mississippi state flags!

One of the oldest and most colorful flags in the world flies over the Maryland State Capitol at Annapolis. It bears the coat of arms of the family who founded the state—the Lords of Baltimore.

All 50 state flags are displayed each holiday at the Mall of the State Mutual Life Assurance Company of America, one of the few places in the country to do so. For a free illustrated four-color leaflet which tells about every flag, write to their Public Relations Branch, Worcester 5, Mass.

## HERE ARE 2 OF THE NEW JET-SMOOTH CHEVROLETS

WHICH ONE IS THE CONVERTIBLE AND WHICH THE HARDTOP?

Top one's our new Impala Sport Coupe whose steel roof line is a dead ringer for the Impala Convertible's below. But after rich new styling, what? In glamor and go, comfort and craftsmanship, here's all you'd reasonably expect of an expensive car. Except the expense.

Slip inside a Jet-smooth Chevrolet, relax and just notice how good you feel. Ready for action? Just flick the key and let 'er purr (your choice of two standard engines—a 135-hp 6 or 170-hp V8—or optional-at-extra-cost V8's way up to a 409-hp

mile-shrinker). That gentle cradling motion you enjoy is Jet-smooth ride at work. And the rich interior and neat craftsmanship are Body by Fisher at work. Have your dealer give you the whole story. That's the work he loves best.

See the new Chevrolet, new Chevy II and new Corvair at your Chevrolet dealer's One-Stop Shopping Center

Mr. Ralph Reck is a surgical patient at Johns Hopkins Hospital. His condition is improving.

Mr. and Mrs. Maurice Troxell and children, Debbie, Paula and Russell, were recent visitors of Mr. and Mrs. Kenneth Mathias.

A dinner was served at the home of Mr. and Mrs. Elbert Harbaugh on Christmas Day, celebrating the 35th wedding anniversary of Mr. and Mrs. Harbaugh and also the 15th wedding anniversary of Mr. and Mrs. Richard Valentine on Dec. 22. Mrs. Valentine is the daughter of Mr. and Mrs. Harbaugh. Those present besides the celebrants were Mr. and Mrs. Sterling Seiss, Carolyn, Kenny and Phyllis; Mr. and Mrs. Donald Harbaugh, Linda and Bonnie; Gary and Dennis Valentine.

Mr. and Mrs. Richard Saylor and family were dinner guests of Mr. and Mrs. Robert Saylor on New Year's Day.

Mr. and Mrs. Kenneth Mathias, Nancy and Dennis, were dinner guests of Mr. and Mrs. Edwin metee, Pikesville, on New Year's Day.

Holiday visitors in the home of Mr. and Mrs. Ralph Reck were: Mr. and Mrs. Francis Barnes, Nola and Lois, Mrs. Evelyn Wilhide and son, Dennis, Oak Orchard; Mr. and Mrs. Richard Stine, Camden, N. J.; Mr. and Mrs. William Reck and son, Webb, Mr. and Mrs. Joseph Wunderlick and Mrs. Doris Saunders, Baltimore.

John Kaas attended the Pennsylvania Farm Show held at Harrisburg on Monday.

**Mothers March**  
Mrs. Anna Stoner, chairman of the local Mothers' March on Polio, announced this week that the annual drive will be held in Emmitsburg on the evening of Tuesday, January 23.

**Auxiliary Will Sponsor Dimes Dance**

The Ladies Auxiliary to Emmitsburg Memorial Post 6658 will sponsor a March of Dimes Dance on Saturday, Feb. 3, from 8 until 11 for the teenagers. The music will be furnished by the Vibrations, a local group. The admission will be 50c per person and will be held in the VFW Annex. All proceeds will go to the March of Dimes drive.

Take a look into your wife's purse if you want proof that money isn't everything.

## Birthday Party

A birthday party was held Sunday at the home of Mrs. Marianne Ripka in honor of the 12th birthday of her son, Ricky. Guests present were Mary K. Sherwin, Gerolf and Harold Englestadter, Diane Dutrow, Pamela Topper, Michael Ryder, John Sherwin, Michael Orndorff, Mr. and Mrs. C. D. Gillean, Debbie and Cookie Gochenour and Mrs. Donald Gochenour.

## Licenses Revoked

The State Vehicle Dept. this week announced the revocation of the following district drivers' licenses: James Leroy Furr and Samuel Bernard Stoner, Thurmont. Also the Dept. reported it has suspended the licenses of Clinton William Davie and Carrol Eugene Wastler, both of Thurmont. The Dept. announced it has reissued a license to Daniel Bruce Markle, R2, Taneytown.

## Hospital Report

## Week of Prayer Services To End

The Emmitsburg Community Week of Prayer services will close with the service tonight (Friday), at 7:30 o'clock in the Lutheran Church. The sermon will be by the Reverend Forrest Davis, Minister of the Methodist Church of Emmitsburg and Toms Creek.

## Alien Registration Satisfactory

Immigration officials are well pleased with the response of aliens in this State to address report requirements.

Mr. H. L. Woolwine, District Director of the Immigration and Naturalization Service stated that although the program has been underway only eight days, the number reported thus far is well ahead of the number reporting during the same period last year.

Aliens have until the end of January to submit their address reports to the Government. Forms for the purpose may be obtained at any Post Office or any office of the Immigration and Naturalization Service.

All aliens, with few exceptions, are required to report. Those excused from this requirement include diplomats, persons accredited to certain international organizations and persons who were admitted temporarily as agricultural workers.

Aliens who are minors must also

report, but the parent or legal guardian should submit the report for an alien child under fourteen years of age.

The National Safety Council says: Reduced visibility and inadequate traction are major, added hazards of winter driving. Be sure your wiper blades are in good condition, and have arm pressure of one ounce per inch of blade length to sweep off snow and sleet instead of sliding over it. Check defroster, and always carry a pair of reinforced tire chains to back up your ability to go and stop safely.

When trailing a heavy boat such as a cruiser, it's best to use a safety chain in addition to the usual one. It's possible that if the trailer comes uncoupled on the road, a single chain would snap from the shock.—Sports Afield.

## Campus Comment

Under the guidance of our well-trained teachers, we apply our learnings to practical ends. The girls who study child psychology find a valuable aid for later life in understanding and guiding their children. Often misunderstood, child psychology brings to mind a child allowed undisciplined liberties and unrestrained freedom. This picture results from cartoons, television, movies, and other unprofessional sources which exaggerate to convince. These media present a false picture of a science which uses common sense in directing children.

A child who willfully injures himself or is subject to temper tantrums can be helped with a knowledge of child psychology. Examine this situation of an average child. A four year old girl with blonde curls and an angelic face arrives at her aunt's house for a family dinner. Underneath that angelic face is a demon spirit. The aroma from the kitchen floats into the living room and the children march in to the table. The family starts to eat. Suddenly, a loud piercing noise is heard re-

sembling the wail of a fire engine. This sound emits from Angel. Something is too soft or too hard, too hot or too cold, and no action or words of the parents can pacify her.

The parents with a knowledge of child psychology could rely on four points in this situation. First, the sensitivity of the child should be considered. Secondly, the child should not be punished in public for humiliation which brings resentment, destroys the effectiveness of the punishment. Thirdly, before the child is punished, she should know the reason. Fourthly, the time between the action and the punishment should be relatively close so that the child sees the full implication of her action.

Apparently, child psychology is a matter of common sense. Children have developed into normal mature individuals before the word "psychology" was ever coined. However, knowing a few of the principles of child psychology can make the roles of you, the parents and of us, the students, simpler and thus lead to a better understanding of child development.

southern coast, is without question one of the fastest moving fish found in tropical waters. Its great bursts of speed, together with its frequent high leaps and its inexhaustible amount of power, qualifies this particular fish as a worthy opponent for light tackle. The kingfish is the largest of the Spanish mackerel group, with an average size of about six or seven pounds. It does reach much larger sizes, as is indicated by the rod-and-reel record, an 81-pound fish.

The king mackerel is found along the Florida and Gulf coasts. It is generally believed that the migration of this fish may conform with that of the Spanish mackerel. The schools appear to winter from the St. Lucie River southward, with the greatest concentration occurring in the area of the Florida Straits. There is a large concentration of kingfish found around Rebecca Shoals east of the Dry Tortugas from early October through March. Large schools are also known to summer along the northern Florida coast. In recent years it has not been uncommon for anglers to catch king mackerel as far north as New Jersey during the warm summer months.

### Contractor Would Eliminate Luxuries In New Schools

Parking lots complete with curb and gutter at the newer schools in the county were the target of a blast this week by a member of the Board of Education.

Norman W. Etzler, a contractor by trade, said at the recent school board meeting he feels that curbs around the school parking areas are unnecessary added expenses.

He said "I can see why they're added." The architect gets six per cent of the cost of the project, so the more costly the job, the more money he makes, Mr. Etzler stated. He said concrete curbing costs about \$2 a foot.

Reference was then made to the six separate parking areas at the new school at Central—all surrounded by curb and gutter.

Mr. Etzler said a blacktopped area is sufficient for any school. "We're just throwing money away on parking facilities," he said.

Another member mentioned that it would be difficult to keep the drivers from driving off the black-top area and onto the grass.

"Let them get on the grass. After they get stuck in the mud once they won't do it again," Mr. Etzler stated.

He said he cannot see why the parking area cannot be a black-topped area which can also serve as playing area for the students during school hours.

The discussion of the parking lots came as a result of a proposal to have Paul Kea - David Shaw Associates of Hyattsville, architects of the addition to the Lewistown school, use the same plans for the addition to the Adamstown school.

The board agreed to hire Kea-Shaw as architects on the Adamstown addition at a four per cent rate if they can transfer the Lewistown plans to join in with the old Adamstown school.

Several members of the board were critical of the landscaping done at Lewistown. It was stated that the slope of the land in front and back will drain water toward the building instead of away.

William J. E. Null, Assistant in Maintenance, suggested to the board that another well be drilled

at the New Market school since the present one is producing only seven gallons of water per minute. When, in answer to a question, Mr. Null said he felt the school could get by this year with the present well. The board decided to wait before drilling another well.

Mr. Null said that the well drilled struck a good stream of water at Yellow Springs where a well was bored a few weeks ago when they could no longer get sufficient water from the line leading from Fishing Creek Reservoir to Frederick.

The well was bored 200 feet and is producing 35 gallons of water a minute, the board was told.

In other business taken at the meeting, the board approved some change orders amounting to \$8,452.15 for regrading and drainage work at the Lingamore High School.

### Jordan To Benefit By CARE Packages

Jordan, where three out of every five people depend on relief aid for subsistence, is included among the nineteen nations which this year will share 5,000,000 food packages CARE hopes to send abroad.

According to Mrs. Robert Nyburg, vice-chairman of the CARE Food Crusade in Maryland, 90 per cent of the Jordanians who will receive CARE food are chil-

dren. Many of them, she said, are in orphanages or refugee camps where they never receive meat more than twice a week and then only as a part of soup.

The CARE packages, made up mostly of government surplus stores, contain rice, margarine and milk powder. With these basic items provided, welfare officials in Jordan are able to use their own funds to buy meat, fruit and vegetables.

Jordan, Mrs. Nyburg said, will need about 50,000 of the food parcels if the assistance program is to continue. She asked that donations be sent to CARE, 1123 North Eutaw Street, Baltimore 1, Maryland.

### Beverage Dealers To Back State's Clean-Up Drive

The Metropolitan Baltimore Licensed Beverage Association, Inc., this week joined with other Maryland beverage associations in support of anti-litter efforts in Maryland.

President Phil Harris, announces unanimous passage of a resolution by the board of directors and the membership of the Baltimore area organization, added that it will urge all its members and all their employees to strive to get the public to dispose properly of litter rather than to toss it along roadways and streets.

Mr. Harris, pointing out that

the group believes, the beverage industry, as responsible citizens of Maryland, has a special interest in making Maryland attractive to its residents, as well as to visitors from other states, said the resolution is expected to get full support of the membership.

The resolution declared: "WHEREAS, significant progress in the prevention of litter in our state has been reported by the Keep Maryland Beautiful Committee, and

WHEREAS, it is apparent that even greater efforts are required to maintain our state in all its true beauty.

BE IT THEREFORE RESOLVED that the Board of Directors of the Metropolitan Licensed Beverage Association on this day goes on record in support of the continuing and vigorous efforts to Keep Maryland Beautiful and

BE IT FURTHER RESOLVED, that we also urge our members and their employees to help educate the public, and particularly the trade of our licensed beverage establishments to dispose of litter of any kind in proper receptacles through direction of placards and by word of mouth."

### Pack Meeting Held

A Pack meeting of the Cub Scouts was held on Wednesday evening at 7 p. m. in the VFW Annex. Cub Scout Master, Eugene

Rosensteel presided at the short business meeting preceding the program. Articles which were made by the scouts were on exhibition. The program consisted of the presentation of the Motto, Slogan and Laws of the Webelos Den under the leadership of Bobby Rosensteel. Den 2 with Den Mothers, Mrs. Clarence Wivell and Mrs. Carroll Wivell, presented a short skit "Mr. Pumpkin Head." Den 3 with Den Mother Mrs. Edward Houck, presented a skit on "Magicians." Following the program, games were played and refreshments were served. Mrs. Loretta Adelsberger was chairman of entertainment for the evening.

## SPORTS AFIELD

By Ted Kestr

When the northern section of our country is buried under a white mantle of snow and the offshore cod fishermen are getting frostbitten fingers, it is time to head southward, where the skies are sunny and fishing more productive, says Robert Hall, Salt-Water Fishing Editor of Sports Afield Magazine.

The warm semitropical seas that gently break on the shores of Florida and the Gulf States contain many species of marine fish to lure the northern angler to the land where the pelicans fly in V formation and silver mullet make tantalizing leaps in the bays and passes.

The Gulf Stream, where sailfish jump, porpoises roll and flying gulls scream, is the main thoroughfare for a wide variety of marine life. The "Stream," origin-

ating in the Equatorial Current created by the trade winds, is deflected northward by the coast of South America into the Gulf of Mexico and skirts the tip and east coast of Florida on its journey to northern Europe. Along the edge of this warm body of water, moving northward along the Florida coast at the rate of about four miles an hour are the haunts of blue and purple sailfish and the blunt-headed leaping dolphin, with its coat of rainbow hues.

Along the east coast of Florida will be found an exciting variety of fishing. Cruising offshore the spectacular sailfish and numerous other great game fish, such as marlin, tuna, wahoo, barracuda, kingfish, dolphin, mackerel and bluefish are encountered. Inshore you will find snappers, groupers, sea trout, ladyfish, redfish and many others that will keep your mind off winter weather farther north.

While the Atlantic sailfish holds the spotlight as one of the most sought-after game fish of the Gulf Stream, the king mackerel, better known as "kingfish" along our

### KITCHEN TIPS

Tired scraping and scouring skillets? This chore's a thing of the past for modern homemakers now using new non-stick frying pans. One big reason such pans are becoming so popular across the nation is easy clean-up.

Secret to the relief from scrubbing sessions is a Du Pont material called "Teflon" TFE-fluorocarbon finish. A coating based on this material makes a pan so slick, virtually no food can stick to it. After cooking, a couple of swishes under a running faucet flushes away scraps—even most sticky burnt foods.

If further cleaning is desired for any reason, simply run some warm water into the pan, add a bit of detergent, swish the soapy water around with sponge or dishcloth, and rinse. Scouring pads and abrasive cleaners should never be used.

Pans with an ultra-smooth finish offer another major advantage with special appeal to weight and cholesterol-conscious Americans — greaseless cooking. For example, eggs fry beautifully without fat. In fact, you can plan a fat-free diet of almost endless variety without fear of food sticking to the pan.
